

Contents

1	Distributions and Function Spaces	1
1.1	Elements of Functional Analysis	1
1.1.1	A Survey of Abstract Spaces	2
1.1.2	Linear Operators in Normed Linear Spaces	6
1.1.3	Sublinear Functionals	9
1.1.4	Linear Functionals on Hilbert Spaces	13
1.1.5	Interpolation of Banach Spaces	19
1.2	Basic Function Spaces	21
1.2.1	Spaces of Continuous Functions	21
1.2.2	Spaces of Integrable Functions	24
1.3	Distributions	26
1.3.1	Test Functions and Distributions	26
1.3.2	Operations with Distributions	30
1.3.3	Tempered Distributions	36
1.3.4	Fourier Transform of a Tempered Distribution	40
1.4	Sobolev Spaces	43
1.5	Anisotropic Sobolev Spaces	51
1.6	Besov Spaces	56
1.7	Interpolation Properties of Sobolev Spaces	57
1.8	Multiplier Spaces	58
1.9	Fourier Multipliers and Mollifiers	66
1.9.1	Fourier Multipliers	66
1.9.2	Definition of Mollifier	69
1.9.3	An Admissible Class of Mollifiers	73
1.9.4	Mollifiers of Tempered Distributions	76
1.9.5	Multipliers and Mollifiers on Periodic Spaces	83
2	Elliptic Boundary-Value Problems	91
2.1	Existence and Uniqueness of Solutions	91
2.2	Approximation of Elliptic Problems	104
2.2.1	Introduction to the Theory of Finite Difference Schemes	105

2.2.2	Finite Difference Approximation in One Space Dimension	106
2.2.3	Finite Difference Scheme for a Univariate Problem	115
2.2.4	The Multi-dimensional Case	122
2.2.5	Approximation of a Generalized Poisson Problem	126
2.3	Convergence Analysis on Uniform Meshes	144
2.3.1	The Bramble–Hilbert Lemma	144
2.3.2	Optimal Error Bounds on Uniform Meshes	150
2.4	Convergence Analysis on Nonuniform Meshes	153
2.4.1	Cartesian-Product Nonuniform Meshes	154
2.4.2	An Alternative Scheme	167
2.4.3	The Rotated Discrete Laplacian	170
2.5	Convergence Analysis in L_p Norms	176
2.5.1	Discrete Fourier Multipliers	176
2.5.2	The Model Problem and Its Approximation	184
2.5.3	Convergence in Discrete Bessel-Potential Norms	196
2.6	Approximation of Second-Order Elliptic Equations with Variable Coefficients	202
2.6.1	Convergence in the Discrete W_2^1 Norm	202
2.6.2	Convergence in the Discrete W_2^2 Norm	210
2.6.3	Convergence in the Discrete L_2 Norm	211
2.6.4	Convergence in Discrete Fractional-Order Norms	215
2.6.5	Convergence in the Discrete L_2 Norm: Separated Variables	216
2.7	Fourth-Order Elliptic Equations	220
2.8	An Elliptic Interface Problem	228
2.8.1	Finite Difference Approximation	233
2.8.2	Convergence in the Discrete W_2^1 Norm	236
2.9	Bibliographical Notes	240
3	Finite Difference Approximation of Parabolic Problems	245
3.1	Parabolic Equations	245
3.1.1	Abstract Parabolic Initial-Value Problems	246
3.1.2	Some a Priori Estimates	248
3.1.3	Application to Parabolic Partial Differential Equations . .	255
3.1.4	Abstract Two-Level Operator-Difference Schemes	258
3.2	Classical Difference Schemes for the Heat Equation	263
3.2.1	Explicit and Implicit Schemes	264
3.2.2	Stability of Explicit and Implicit Schemes	267
3.2.3	Error Analysis of Difference Schemes for the Heat Equation	273
3.3	The Heat Equation with Nonsmooth Data	276
3.3.1	The Initial-Boundary-Value Problem and Its Discretization	276
3.3.2	Error Analysis	277
3.3.3	The Case of Independent Mesh-Sizes	284
3.4	Parabolic Problems with Variable Coefficients	285
3.4.1	Formulation of the Problem	285

3.4.2	The Finite Difference Scheme	286
3.4.3	Error Analysis	287
3.4.4	Factorized Scheme	296
3.5	A Parabolic Interface Problem	297
3.5.1	Finite Difference Approximation	298
3.5.2	Factorized Scheme	303
3.6	A Parabolic Transmission Problem	305
3.6.1	Weak Solutions and Function Spaces	306
3.6.2	Finite Difference Approximation	310
3.6.3	Factorized Scheme	320
3.7	Bibliographical Notes	323
4	Finite Difference Approximation of Hyperbolic Problems	327
4.1	Hyperbolic Equations	327
4.1.1	Abstract Hyperbolic Initial-Value Problems	328
4.1.2	Some a Priori Estimates	329
4.1.3	Abstract Three-Level Operator-Difference Schemes	333
4.2	Classical Difference Schemes for the Wave Equation	337
4.2.1	Explicit and Weighted Schemes	338
4.2.2	Stability of the Weighted Difference Scheme	341
4.2.3	Error Analysis of Difference Schemes for the Wave Equation	344
4.3	The Wave Equation with Nonsmooth Data	347
4.3.1	The Initial-Boundary-Value Problem and Its Discretization	347
4.3.2	Error Analysis	347
4.4	Hyperbolic Problems with Variable Coefficients	358
4.4.1	Formulation of the Problem	358
4.4.2	The Finite Difference Scheme	359
4.4.3	Convergence of the Finite Difference Scheme	360
4.4.4	Factorized Scheme	369
4.5	Hyperbolic Interface Problem	370
4.5.1	Finite Difference Approximation	371
4.5.2	Factorized Scheme	377
4.6	Hyperbolic Transmission Problem	378
4.6.1	Finite Difference Approximation	380
4.7	Bibliographical Notes	386
	References	389
	Index	399
	List of Symbols	405

Analysis of Finite Difference Schemes
For Linear Partial Differential Equations with
Generalized Solutions

Jovanović, B.S.; Süli, E.

2014, XIII, 408 p. 7 illus. in color., Hardcover

ISBN: 978-1-4471-5459-4
