

Contents

Part I Multidisciplinary Part

1	Introduction	3
1.1	Examples	4
1.2	Definitions	7
1.3	Goal and Motivation	9
1.4	Methodology	10
1.5	What This Book Is Not	11
1.6	Research Questions	11
1.7	Book Outline	11
	References	12
2	Related Work on Social Interaction and Social Simulation	13
2.1	Sociology	13
2.2	Social Psychology	15
2.3	Sociolinguistics	18
2.4	Anthropology	22
2.5	Learning	23
2.6	Communication Studies	26
2.7	Social Philosophy	28
2.8	Neurobiology	29
2.9	Medicine	31
2.10	Social Robotics	34
2.11	Computer Science	37
2.12	Summary of Findings	44
2.13	Shortcomings of Previous Approaches	44
2.14	Summary and Outlook	44
	References	47
3	Scenarios of Social Interaction	57
3.1	Typical Culturally Homogeneous Scenarios of Social Interaction	58
3.2	Culturally Heterogeneous Scenarios of a Digital Globe	62

3.3	Culturally Heterogeneous Controversial Scenarios	67
3.4	One-Person Scenarios	81
3.5	Summary of Significant Modeling Dimensions	84
3.6	Inspirations for Further Scenarios	87
3.7	Summary and Outlook	87
	References	90

Part II Developmental Part

4	Acquisition of Intercultural Data	97
4.1	Acquisition on the Basis of Emotion-Related Data	97
4.1.1	Populating the Emotion-Related Model	99
4.1.2	Populating the Personality-Related Model	102
4.1.3	Populating the Culture-Related Model	104
4.2	Acquisition on the Basis of Personality-Related Data	105
4.2.1	Populating the Personality-Related Model	106
4.2.2	Populating the Emotion-Related Model	106
4.2.3	Populating the Culture-Related Model	108
4.3	Acquisition on the Basis of Case-Based Data	109
4.3.1	Populating the Culture-Related Model	109
4.3.2	Populating the Emotion-Related Model	110
4.3.3	Populating the Personality-Related Model	112
4.4	Empirical Cultural Data	112
4.5	Summary and Outlook	117
	References	118
5	Framework for Data Processing	121
5.1	Introduction	121
5.2	Generation	122
5.2.1	Data Definition	123
5.2.2	Extraction of Feature Groups	125
5.2.3	Generation Procedure	127
5.3	Evaluation	128
5.3.1	Classifier	129
5.3.2	Measures	129
5.4	Fusion	132
5.4.1	Feature Level	133
5.4.2	Decision Level	133
5.4.3	Probability Level	133
5.4.4	Decision-Integration Level	134
5.5	Optimization	134
5.6	Prototyping	135
5.7	Auxiliary	137
5.7.1	Storing Configuration	137
5.7.2	Visualizing Classification Results	139
5.7.3	Interaction Analysis of Affective Behavior	140

5.7.4	Populations	142
5.7.5	Interface to Jython Editor	143
5.7.6	Statistical Case-Based Expert System	143
5.8	Summary and Outlook	143
Appendix A	The HMM Classifier	144
Appendix B	The ARFF Wrapper	146
Appendix C	Storing Configuration	148
References	152
6	Prototypes of Social Simulation	153
6.1	Prototype Architecture	153
6.2	Prototyping Principle	154
6.3	Implemented Prototypes	156
6.3.1	Servlet-Based Prototypes	156
6.3.2	Content-Synchronized Communities	158
6.3.3	Sequential Dialog Systems	160
6.3.4	Interaction-Synchronized Experimentation Testbeds	160
6.3.5	GUI-less Populations	163
6.4	Implementations of Agent-Specific Modeling Dimensions	164
6.4.1	Identity	164
6.4.2	Emotions	164
6.4.3	Personality	164
6.4.4	Culture	165
6.4.5	Input/Output	165
6.4.6	Statistical Engines	166
6.4.7	Natural-Language Processing	166
6.4.8	Social Relationships	169
6.4.9	Context (Agent-Specific)	170
6.4.10	Knowledge (Agent-Specific)	170
6.4.11	Time (Agent-Specific)	170
6.5	Implementations of Simulation-Wide Modeling Dimensions	171
6.5.1	Explicit Specifications	171
6.5.2	History	178
6.5.3	Space	179
6.5.4	Context (Simulation-Wide)	180
6.5.5	Knowledge (Simulation-Wide)	181
6.5.6	Time (Simulation-Wide)	181
6.5.7	Social Network, Topological Issues	182
6.5.8	Alerts	182
6.5.9	Statistical Processing	183
6.6	Maintaining Prototypes	183
6.6.1	Governing Scalability	183
6.6.2	Dynamic Adaptation	185
6.6.3	Debugging Simulation	185
6.6.4	Simulation Mode	187

6.6.5	Recommendations on the Prototype Development	188
6.7	Summary and Outlook	189
Appendix A	The JADE Infrastructure	189
Appendix B	A Servlet-Based Template	192
Appendix C	A Content-Synchronized Community Template	194
Appendix D	A Sequential Dialog System Template	199
Appendix E	An Interaction-Synchronized Testbed Template	206
Appendix F	A GUI-less Population Template	213
References	216
7	Evaluation of the Prototyping Approach	219
7.1	Typical Culturally Homogeneous Scenarios of Social Interaction	219
7.2	Culturally Heterogeneous Scenarios of a Digital Globe	230
7.3	Culturally Heterogeneous Controversial Scenarios	232
7.4	One-Person Scenarios	233
7.5	Summary and Outlook	233
8	Conclusion	235
8.1	Theoretical Contributions	235
8.2	Application-Related Contributions	235
8.3	Practical Contributions	236
8.4	Answers to Research Questions	236
8.5	Resolution of Drawbacks	236
8.6	Further Work	237
References	237
Index	239

Social Interaction, Globalization and Computer-Aided
Analysis

A Practical Guide to Developing Social Simulation

Osherenko, A.

2014, XVII, 245 p. 82 illus. in color., Hardcover

ISBN: 978-1-4471-6259-9
