<b>1</b>	<b>The Process of Risk Management</b>	<b>1</b>
1.1	Risks and Opportunities	1
1.2	Compilation and Identification of Risks	3
1.3	Evaluating Risks	8
1.4	Response to Risk	9
1.4.1	Avoiding Risks	9
1.4.2	Reduction of Risks	10
1.4.3	Transfer of Risks	11
1.5	Monitoring Risk	14
1.6	The Role of the Appointed Actuary in the Risk Management	
	Process	15
	References	16
<b>2</b>	<b>Risk Measures</b>	<b>17</b>
2.1	The Notion of a Risk Measure	17
2.2	Examples of Risk Measures	18
2.2.1	Measures Based on Moments	18
2.2.2	Value at Risk	20
2.2.3	Tail Value at Risk and Expected Shortfall	22
2.2.4	Spectral Measures	30
2.3	Choosing a Good Risk Measure	31
2.3.1	Risk Measures and the Intuition of Risk	31
2.3.2	Practical Considerations	38
2.4	Dynamic Risk Measures	43
2.4.1	Filtrations	45
2.4.2	General Dynamic Risk Measures	54
2.4.3	Dynamic Risk Measures on Filtered Product Economies	55
2.4.4	A Class of Dynamic Risk Measures on General	
	Filtrations	63
	References	72

<b>3</b>	<b>Dependencies</b>	73
3.1	Diversification	73
3.2	Copulas	74
3.2.1	Examples	87
3.2.2	Tail Dependence	95
3.2.3	Modeling with Copulas	98
3.3	Correlations	99
3.4	Functional Dependencies	101
	References	101
<b>4</b>	<b>Risk Capital</b>	103
4.1	Risk Capital and Cost of Capital	103
4.1.1	Risk Capital as a Criterion for Comparing Diverse Risks	103
4.1.2	Cost of Capital	104
4.2	Risk-Bearing Capital	107
4.3	Types of Risk Capital	107
4.3.1	Economic Risk Capital	107
4.3.2	Rating Capital	112
4.3.3	Solvency Capital	112
4.4	Valuing Insurance Liabilities	113
4.4.1	Concept and Definition	113
4.4.2	Approaches to Valuation of Insurance Liabilities	114
4.4.3	Implementation Concepts	118
4.4.4	Valuing Technical Provisions According to IFRS	124
4.5	Approaches to Modeling Risk Capital	124
4.5.1	Factor-Based Models	125
4.5.2	Analytic Models	126
4.5.3	Scenario-Based Models and Stress Tests	126
4.5.4	Monte Carlo Models	129
4.5.5	The Problem of Modeling Reinsurance	129
4.5.6	Feedback of Investment Risk on Capital	130
4.6	Risk Capital Models in Practice	131
4.6.1	The Swiss Solvency Test (SST)	131
4.6.2	The Standard Model in Solvency II	170
	References	194
<b>5</b>	<b>Allocation of Capital</b>	197
5.1	Introduction	197
5.2	Examples	200
5.2.1	Proportional Capital Allocation	201
5.2.2	Marginal Principles	202
5.2.3	Game-Theoretic Capital Allocation Principles	209
5.2.4	Kalkbrener's Axioms	224
5.3	Capital Allocation for Groups	234
	References	236

<b>6</b>	<b>Performance Measurement</b>	237
6.1	Performance Measurement Based on Balance Sheets	237
6.2	Profit Measurement	238
6.3	Absolute Performance Measures	239
6.4	Relative Performance Measures	242
6.5	A Numerical Example	243
6.6	Basics of Company Valuation	249
6.6.1	Various Perspectives for Company Valuation	253
6.6.2	Deterministic Valuation	254
6.6.3	Cost of Capital Based Valuation	255
6.6.4	Market Consistent Valuation	261
6.7	Key Performance Indicators and Constraints	267
6.8	Differing Requirements in Life Insurance and Non-life Insurance	268
	References	269
<b>7</b>	<b>Value-Oriented Company Management</b>	271
7.1	The Concept of Value-Oriented Company Management	271
7.1.1	The Strategic Component	272
7.1.2	The Measurement Component	274
7.1.3	The Organizational Component	276
7.1.4	The Process Component	277
7.1.5	Objective Setting and Supervision: Balanced Scorecard	280
7.2	An Example Company	282
7.2.1	Definition of Business Areas Subject to Risk Oriented Management	282
7.2.2	Mitigation of Risks for which Economic Capital is Only Partly Suitable	284
7.2.3	The Economic Capital Model of XYZ Inc	285
7.2.4	Criticism of the Capital Model for XYZ Inc	295
7.2.5	Indicators	300
7.2.6	The Organizational Components for Value-Oriented Management at XYZ Inc	305
7.2.7	The Process Components of Value-Oriented Management at XYZ Inc	307
	References	312
<b>8</b>	<b>Solvency and Regulatory Questions</b>	313
8.1	Law Regulating Control and Transparency in Business (KonTraG)	314
8.1.1	Goals of KonTraG	314
