

Contents

1	Introduction	1
1.1	Introduction	1
1.2	Microstructure and Texture	2
1.3	Description of Grain Orientation and Texture	3
1.4	Development of Texture During Processing	5
1.5	Macro- and Microtexture	6
1.6	Industrial Importance of Texture	6
	References	9
2	Representation of Texture	11
2.1	Introduction	11
2.2	Pole Figure Method	11
2.2.1	Stereographic Projection	12
2.2.2	Pole Figure	14
2.2.3	Interpretation of a Pole Figure	16
2.2.4	Pole Figures Showing Ideal Orientations	18
2.2.5	Pole Figures Showing Fiber Texture	20
2.2.6	Inverse Pole Figures	21
2.3	Orientation Distribution Function (ODF) Method	22
2.3.1	Description of an Orientation by the Euler Angles φ_1 , Φ , and φ_2	24
2.3.2	The Orientation Distribution Function	26
2.3.3	Pole Figure Inversion Using Series Expansion	27
2.3.4	Problems with the Series Expansion Method	28
2.3.5	Pole Figure Inversion Using Direct Methods	29
2.4	Representation of Texture in the Orientation Space	30
2.5	Volume Fraction of Texture Components	34
	References	37

3	Experimental Determination of Texture	39
3.1	Introduction	39
3.2	Macrotexture Measurement Techniques.	41
3.2.1	Texture Measurement by X-ray Diffraction	41
3.2.2	Texture Measurement Using Synchrotron X-rays	57
3.3	Microtexture Measurement Techniques	58
3.3.1	Scanning Electron Microscopy-Based Electron Backscattered Diffraction (SEM-EBSD)	58
3.3.2	Transmission Electron Microscopy-Based Orientation Imaging Microscopy (TEM-OIM)	67
	References	70
4	Texture Evolution During Solidification and Solid-State Transformation	73
4.1	Introduction	73
4.2	Solidification Texture in Metals and Alloys	73
4.2.1	Origin of Solidification Texture	76
4.2.2	Mechanism of Formation of Solidification Texture in the Columnar Zone	78
4.2.3	Some Examples of Texture Control During Solidification. . .	80
4.3	Transformation Texture	84
4.3.1	Transformation Textures in Steels	84
4.3.2	Transformation Textures in Titanium and Zirconium Alloys	88
	References	92
5	Deformation Textures	95
5.1	Introduction	95
5.2	Crystallography of Deformation	95
5.3	Deformation Microstructures	102
5.3.1	Crystallographic Dependence of Microstructural Features	104
5.4	Deformation Textures in Metals and Alloys.	108
5.4.1	Rolling Textures	108
5.4.2	Texture After Uniaxial Deformation	123
5.4.3	Shear Texture	128
5.5	Modeling and Prediction of Deformation Texture	128
5.5.1	The Sachs Model	130
5.5.2	The Taylor Model	131
5.5.3	Relaxed Constraint Models	132
5.5.4	More Recent Models	133
	References	137

6	Annealing Texture	143
6.1	Introduction	143
6.2	Stored Energy of Cold Work: A Precursor to the Annealing Process	143
6.3	Release of Stored Energy During Annealing	144
6.4	Primary Recrystallization	147
6.4.1	Nucleation of Recrystallized Grains	147
6.4.2	Role of Lattice Curvature in Recrystallization	151
6.4.3	Grain Boundary Migration and Its Orientation Dependence	152
6.5	Recrystallization Textures	154
6.5.1	Recrystallization Textures of FCC Metals and Alloys	155
6.5.2	Recrystallization Textures of BCC Metals and Alloys	163
6.5.3	Recrystallization Textures of Hexagonal Metals and Alloys	164
6.5.4	Recrystallization Textures in Two-phase Alloys	166
6.6	Texture Evolution During Dynamic Recovery and Recrystallization	166
6.7	Theories of Formation of Recrystallization Textures	166
6.7.1	The Oriented-Nucleation Theory	167
6.7.2	The Oriented-Growth Theory	168
6.7.3	Orientation Pinning Theory	169
6.7.4	The Oriented Energy Gain Theory	170
6.7.5	Relative Roles of Oriented Nucleation and Oriented Growth	170
6.8	The Cube Texture in FCC Metals: A Classic Example of Recrystallization Texture	171
	References	173
7	Texture Evolution in Thin Films	179
7.1	Introduction	179
7.2	Representation of Texture in Thin Films	180
7.3	Texture Measurement in Thin Films	182
7.4	Mechanism of Texture Formation in Thin Films	184
7.5	Stages of Texture Formation in Thin Films	184
7.5.1	Texture Formation During Pre-coalescence Stage	184
7.5.2	Texture Formation During Coalescence Stage	185
7.5.3	Texture Formation During Post-coalescence Stage	185
7.5.4	Texture Formation During Post-deposition Annealing Stage	186
7.6	Texture Developed During Various Methods of Film Deposition	186
7.7	Texture in Conducting Films: Electromigration and Texture	188
7.8	Textures in Magnetic Films	190

7.9	Texture in a Few Other Industrially Important Thin Films	190
7.10	Effect of Ion Irradiation on Texture of Thin Films.	191
	References.	191
8	Textures of Non-metals	195
8.1	Introduction	195
8.2	Textures in Ceramics	196
8.2.1	Alumina	197
8.2.2	Zirconia	197
8.2.3	Silicon Nitride	198
8.2.4	Composite Ceramics	198
8.2.5	Electric and Magnetic Ceramics	199
8.2.6	High T_c Superconductors	199
8.2.7	Ceramic Coating.	199
8.3	Texture in Geological Materials.	200
8.4	Textures in Crystalline Polymeric Materials	200
8.5	Textures in Semicrystalline Polymers	201
	References.	202
9	Texture and Properties	207
9.1	Introduction	207
9.2	Texture Dependence of Mechanical Properties	207
9.2.1	Texture and Elastic Modulus	208
9.2.2	Texture and Yield Strength.	210
9.2.3	Texture and r -Value	212
9.2.4	Texture and Fracture.	216
9.2.5	Texture and Fatigue	216
9.2.6	Texture and Stress-Corrosion Cracking.	219
9.3	Texture Dependence of Magnetic and Electrical Properties	219
9.3.1	Magnetic Properties	219
9.3.2	Electrical Properties	221
9.4	Texture Dependence of Chemical Properties.	222
9.4.1	Texture and Corrosion	222
9.4.2	Texture and Oxidation	222
	References.	223
10	Texture Control in Some Engineering Materials	225
10.1	Introduction	225
10.2	Texture Control in Cold-Rolled and Annealed Low-Carbon Sheet Steels	225
10.2.1	Batch Annealed Al-killed Steels.	226
10.2.2	Continuous Annealed Low-Carbon Steels.	228
10.2.3	Interstitial Free Steels.	230
10.2.4	Interstitial Free High Strength Steels.	232

10.3	Texture Control in Silicon Steels	233
10.3.1	Grain-Oriented Silicon Steels	233
10.3.2	Non-oriented Silicon Steels	236
10.4	Texture Control in Aluminum and Aluminum Alloys	237
10.5	Texture Control in Ni and Ni Alloys	239
10.6	Texture Control in Titanium Alloys	240
10.7	Texture Control in Zirconium Alloys	241
10.8	Texture Control in Magnetic Materials	245
10.8.1	AlNiCo Magnets	247
10.8.2	Nd-Fe-B Magnets	247
10.8.3	Sm-Co Magnets	249
10.9	Texture Control in the Coatings of Industrial Galvannealed Steels	249
	References	252
