

Contents

1	Introduction	1
1.1	Introduction	1
1.2	An Introduction to Photogrammetry	2
1.3	Computer Vision	3
1.4	Surface Topology and Retopologizing Workflows	3
1.5	Design Process	4
2	Technology Leaders and Adopters	5
2.1	The Nature of Technological Spread	5
2.2	A Further Introduction and History of Photogrammetry	7
2.2.1	Photography and Plane Tables	8
2.2.2	Stereoplotters and Airplanes	9
2.2.3	Computers and Mathematical Models	9
2.2.4	Digital and Computer Vision	9
2.2.5	Looking Ahead	9
2.2.6	The Cycle Between Art and Science	10
2.3	Photogrammetry Resources Connected to the Entertainment Industry	10
2.4	Microsoft Kinect	11
2.5	Microsoft (CV) Kinect Fusion	11
2.6	Photosynth	12
2.7	Weta Digital: Photospace	13
2.8	Autodesk 123D Catch	14
2.9	Challenges and Current Limitations	14
2.9.1	Occlusions and Number of Photographs Necessary	14
2.9.2	Photographs Need Features	14
2.9.3	No Transparent, Reflective, or Glossy Subjects	15
2.9.4	Subjects Cannot Move During the Image Capture Process	15
2.9.5	Consistent Lighting	15
	References	15

3	Conceptualizing Basic 3D Modeling Workflows	17
3.1	Compartmentalizing the Learning Curve	17
3.2	3D Modeling: A General Conceptual Approach	20
3.3	NURBS Patch Modeling	23
3.3.1	Methodologies	28
3.3.2	Attach/Detach	28
3.4	Box Modeling	30
3.4.1	Langer's Lines	33
3.5	Normal Mapping, Displacement Mapping, and UV Layout	37
3.6	Subtractive Modeling Workflow	42
3.6.1	Topology	46
3.6.2	Retopology	49
3.7	Digital Sculpture: Case Studies Using Pixologic ZBrush	51
3.7.1	Little Power	53
3.7.2	Batman	55
4	Photogrammetry and Design Workflows	59
4.1	Photogrammetry Workflows	59
4.2	Case Study: Roberley Bell	65
4.3	Case Study: Sucker Punch Studio's	66
4.3.1	3D Scanning of Faces and Clothing for "Infamous: Second Son" Game	66
	Reference	67
5	3D Design and Photogrammetry	69
5.1	Elements of Design	69
5.1.1	Color	70
5.1.2	Line	74
5.1.3	Shape	77
5.1.4	Texture/Pattern	78
5.1.5	Space	83
5.1.6	Form	84
5.2	Principles of Design	85
5.2.1	Camera: Lens, Film, and Exposure	86
5.2.2	Cinematography	87
5.2.3	Unity	88
5.2.4	Gestalt Grouping	89
5.2.5	Emphasis	90
5.2.6	Balance: Symmetry and Asymmetry	91
5.2.7	Repetition	93
5.2.8	Proximity	94
5.2.9	Dynamics	95
	References	96

6	Conclusions and Looking Forward	97
	Reference	98
7	Resources and Application	99
	7.1 Photogrammetry Resources	99
	7.2 Retopologizing Resources	100
	7.3 Color Resources	101
	References	101
	Index	103

Integrating 3D Modeling, Photogrammetry and Design

Foster, S.; Halbstein, D.

2014, IX, 104 p. 112 illus., 15 illus. in color., Softcover

ISBN: 978-1-4471-6328-2
