

Contents

1	Introduction	1
1.1	Multi-phase Flows	2
1.2	Multi-phase Solution Strategies	4
	References	6
2	PDF Method: A Stochastic Framework	9
2.1	Definition of a Stochastic Process	9
2.2	Markov Process	11
2.3	The Chapman–Kolmogorov Equation	11
2.4	Wiener Process	13
2.5	Diffusion Process	15
2.6	Jump Process	16
2.7	Stochastic Differential Equations	19
2.8	Fluid–Particle Systems	21
2.8.1	Definition of Distribution Function	22
2.8.2	Eulerian and Lagrangian Two-Point, Two-Particle Description	23
2.8.3	One-Point Description and Consistency Relations	24
2.8.4	Mass Density Function	25
	References	27
3	Eulerian–Eulerian Field Equations	29
3.1	EE Model Development: RANS Methods	29
3.1.1	Overview	29
3.1.2	Instantaneous Equations	29
3.1.3	Averaged Equations	31
3.1.4	Eddy Viscosity Models	34
3.1.5	Second Moment Closure Models	36
3.1.6	Algebraic Models	37
3.2	EE Model Development: PDF Methods	38
3.2.1	Overview	38
3.2.2	DIA and LHDIA Closure	39
3.2.3	Furutsu–Novikov–Donsker Closure	41

3.2.4	Van Kampen Closure	42
3.2.5	Langevin Models	42
3.3	Poly-dispersed Methods	44
3.3.1	Sectional Models	45
3.3.2	Non-sectional Models	47
3.4	Summary	48
	References	49
4	A Poly-dispersed EE Model	55
4.1	Single-Particle Motion	55
4.1.1	Molecular Particle Motion	55
4.1.2	Macroscopic Particle Motion	56
4.2	Introduction to PDF Method Through Kinetic Theory	57
4.3	PDF Evolution Equation.	60
4.3.1	Deterministic One-Point, Two-Particle Description	60
4.3.2	Choice of the Variables in the State Vector	62
4.3.3	Stochastic One-Point, Two-Particle Description	63
4.3.4	Transport Equation of a General Property	65
4.4	Fluid-Particle Field Equations.	70
4.4.1	Fluid Field Equations	71
4.4.2	Particle Phase Mean Equations	74
4.5	Summary	79
	References	80
5	Closure Problem	83
5.1	Fluid Phase Triple Correlation	83
5.2	Particle Phase Triple Correlations	85
5.2.1	Particle Velocity Triple Correlation $\langle u'_{p,i} u'_{p,j} u'_{p,k} \rangle$	85
5.2.2	Mixed Triple Correlation $\langle u'_{s,i} u'_{p,j} u'_{p,k} \rangle$	86
5.2.3	Mixed Triple Correlation $\langle \phi'_p u'_{p,i} u'_{p,j} \rangle$	87
5.2.4	Mixed Triple Correlation $\langle u'_{s,i} u'_{s,j} u'_{p,k} \rangle$	87
5.2.5	Mixed Triple Correlation $\langle \phi'_p u'_{s,i} u'_{p,j} \rangle$	88
5.2.6	Mixed Triple Correlation $\langle \phi'_p \phi'_p u'_{p,i} \rangle$	88
5.2.7	Particle Diameter Triple Correlation $\langle \phi'_p \phi'_p \phi'_p \rangle$	89
5.3	Non-integer Closure Problem	89
5.4	Summary	91
	References	91

6 PDF Reconstruction Methods	93
6.1 Introduction	93
6.2 Maximum Entropy Method.	96
6.2.1 Simple Analytical Solutions Using MEM.	98
6.3 Generalized Laguerre Polynomial Expansion	99
6.4 Direct Fractional Method of Moments	101
6.4.1 Fractional Derivatives and Integrals	101
6.4.2 RL Fractional Derivative	102
6.4.3 GL Fractional Derivatives	104
6.4.4 Estimating the Non-integer Moments.	106
6.5 Examples	108
6.5.1 Log-Normal Distribution	108
6.5.2 Mixture of Normal Distributions.	109
6.5.3 Rice–Nakagami Distribution.	111
6.6 Summary	113
References	113
Appendix A: Averaging Operators.	117
Index	121

Statistical Treatment of Turbulent Polydisperse Particle
Systems

A Non-sectional PDF Approach

Shrimpton, J.S.; Haeri, S.; Scott, S.J.

2014, XIII, 122 p. 16 illus., Hardcover

ISBN: 978-1-4471-6343-5
