

Contents

1	Introduction	1
1.1	Theses About Biology	1
1.2	Fundamental Biological Concepts	2
1.3	A Classification of Mathematical Methods	3
2	Discrete Structures	5
2.1	Introductory Example: Gene Regulation and the Power of Combinatorics	5
2.2	Graphs and Networks	10
2.2.1	Graphs in Biology	10
2.2.2	Definitions and Qualitative Properties	11
2.2.3	The Graph Laplacian and its Spectrum	17
2.3	Descendence Relations	34
2.3.1	Trees and Phylogenies	34
2.3.2	Genealogies (Pedigrees)	45
2.3.3	Gene Genealogies (Coalescents)	48
	Exercises for This Chapter	54
3	Stochastic Processes	59
3.1	Random Variables	59
3.2	Random Processes	65
3.3	Poisson Processes and Neural Coding	66
3.4	Branching Processes	73
3.5	Random Graphs	79
	Exercises for This Chapter	85
4	Pattern Formation	89
4.1	Partial Differential Equations	90
4.1.1	The Laplace and the Heat Equation	90
4.1.2	The Eigenvalue Problem for the Laplace Operator and Expansions of Solutions of PDEs in Terms of Eigenfunctions	99

4.2	Diffusion and Random Walks	105
4.2.1	Random Walks on Graphs	105
4.2.2	Diffusion Processes and Partial Differential Equations. . .	111
4.3	Dynamical Systems	115
4.3.1	Systems of Ordinary Differential Equations	115
4.3.2	Different Time Scales	133
4.4	Reaction-Diffusion Systems	140
4.4.1	Reaction-Diffusion Equations	140
4.4.2	Travelling Waves	146
4.4.3	Reaction-Diffusion Systems	149
4.4.4	The Turing Mechanism	155
4.5	Diffusion and Continuity Equations	163
	Exercises for This Chapter	169
5	Optimization	175
5.1	Optimization of Resource Allocation	175
5.1.1	Cost and Reward	176
5.1.2	Reward Functions and Strategy Types	178
5.1.3	Complementarity.	179
5.1.4	Dynamical Interaction Between Individual Strategies and Population Effects.	181
5.1.5	Generalizations	183
5.1.6	Why do We Have Sex?	186
5.2	Variational Methods.	189
	Exercises for This Chapter	197
6	Population Genetics	199
6.1	Mutation, Selection and Recombination	200
6.2	The Wright-Fisher Model and its Diffusion Approximation . . .	204
6.3	The Geometry of Probability Distributions	206
6.4	Population Dynamics	210
	Bibliography	217
	Index	221

Mathematical Methods in Biology and Neurobiology

Jost, J.

2014, X, 226 p. 37 illus., 13 illus. in color., Softcover

ISBN: 978-1-4471-6352-7
