

Contents

Part I Preliminaries

1	Introduction	3
1.1	Programming Languages and Software Engineering	4
1.2	Programming Paradigms	4
1.3	Components of a Programming Language	5
1.3.1	Computer Architecture	6
1.3.2	Language Implementation	7
1.3.3	Syntax	10
1.3.4	Semantics	14
1.4	Further Reading	17
1.5	Exercises	17
	References	19
2	Mathematical Background	21
2.1	Sets and Relations	21
2.2	Logic Formulas	25
2.3	Transition Systems	28
2.4	Induction	29
2.5	Further Reading	40
2.6	Exercises	40
	References	41

Part II Imperative Languages

3	General Features of Imperative Languages	45
3.1	Variables	45
3.2	Assignment	50
3.3	Control Statements	51
3.3.1	Selection Statements	51
3.3.2	Iterative Statements (Loops)	53

3.4	Branching Statements	56
3.5	Structuring the Program: Blocks and Subprograms.	56
3.6	Further Reading	58
3.7	Exercises.	58
	References	60
4	Operational Semantics of Imperative Languages	61
4.1	Abstract Syntax of SIMP	62
4.2	An Abstract Machine for SIMP	65
4.3	Structural Operational Semantics for SIMP	74
4.3.1	Reduction Semantics: Small-Step Semantics	75
4.3.2	Evaluation Semantics: Big-Step Semantics	81
4.3.3	Equivalence between Small- and Big-Step Semantics.	83
4.4	Adding Blocks and Local Variables to SIMP	85
4.5	Further Reading	87
4.6	Exercises.	87
	References	90
 Part III Functional Languages		
5	General Features of Functional Languages	93
5.1	Defining Functions.	95
5.2	Evaluation.	97
5.3	Building Functional Programs	100
5.3.1	Local Definitions.	101
5.4	Types: General Concepts	102
5.5	Polymorphism	104
5.6	Type Checking and Type Inference	107
5.7	Data Structures and Data Type Definitions	110
5.8	Reasoning About Programs	115
5.9	Further Reading	117
5.10	Exercises.	117
	References	120
6	Operational Semantics of Functional Languages	121
6.1	Abstract Syntax of SFUN	121
6.2	A Type System for SFUN	124
6.3	Operational Semantics of SFUN	129
6.3.1	Call-by-Value Semantics of SFUN	130
6.3.2	Properties of SFUN	132
6.3.3	Call-by-Name Semantics of SFUN	134

6.4	Extensions of SFUN	136
6.4.1	Abstract Syntax of FUN	137
6.4.2	A Type System for FUN	139
6.4.3	Operational Semantics of FUN	143
6.4.4	Properties of FUN	147
6.5	Further Reading	149
6.6	Exercises.	149
	References	151

Part IV Logic Languages

7	General Features of Logic Programming Languages	155
7.1	The Herbrand Universe.	156
7.2	Logic Programs	157
7.3	Finding Answers	159
7.4	Further Reading	163
7.5	Exercises.	164
	References	166
8	Operational Semantics of Prolog	167
8.1	Unification	167
8.2	The Principle of Resolution.	169
	8.2.1 SLD-Resolution.	170
8.3	Prolog's Search in the SLD-tree	173
8.4	Further Reading	174
8.5	Exercises.	174
	References	177
9	Answers to Selected Exercises.	179
	Index	207

Programming Languages and Operational Semantics

A Concise Overview

Fernández, M.

2014, IX, 209 p. 10 illus., Softcover

ISBN: 978-1-4471-6367-1
