

Contents

- 1 Introduction to Video Text Detection** 1
 - 1.1 Introduction to the Research of Video Text Detection..... 1
 - 1.2 Characteristics and Difficulties of Video Text Detection 5
 - 1.3 Relationship Between Video Text Detection and Other Fields..... 7
 - 1.4 A Brief History of Video Text Detection..... 8
 - 1.5 Potential Applications 14
 - References 16
- 2 Video Preprocessing** 19
 - 2.1 Preprocessing Operators 20
 - 2.1.1 Image Cropping and Local Operators..... 21
 - 2.1.2 Neighborhood Operators 22
 - 2.1.3 Morphology Operators..... 25
 - 2.2 Color-Based Preprocessing 26
 - 2.3 Texture Analysis..... 29
 - 2.4 Image Segmentation..... 34
 - 2.5 Motion Analysis 39
 - 2.6 Summary..... 44
 - References 46
- 3 Video Caption Detection** 49
 - 3.1 Introduction to Video Caption Detection..... 49
 - 3.2 Feature-Based Methods 51
 - 3.2.1 Edge-Based Methods 51
 - 3.2.2 Texture-Based Methods..... 56
 - 3.2.3 Connected Component-Based Methods..... 63
 - 3.2.4 Frequency Domain Methods 67
 - 3.3 Machine Learning-Based Methods 72
 - 3.3.1 Support Vector Machine-Based Methods 72

3.3.2	Neural Network Model-Based Methods	72
3.3.3	Bayes Classification-Based Methods	73
3.4	Summary.....	78
	References.....	78
4	Text Detection from Video Scenes	81
4.1	Visual Saliency of Scene Texts	82
4.2	Natural Scene Text Detection Methods	90
4.2.1	Bottom-Up Approach	91
4.2.2	Top-Down Approach.....	96
4.2.3	Statistical and Machine Learning Approach.....	100
4.2.4	Temporal Analysis Approach	106
4.2.5	Hybrid Approach.....	110
4.3	Scene Character/Text Recognition	113
4.4	Scene Text Datasets	116
4.5	Summary.....	122
	References.....	124
5	Post-processing of Video Text Detection	127
5.1	Text Line Binarization	127
5.1.1	Wavelet-Gradient-Fusion Method (WGF)	128
5.1.2	Text Candidates	129
5.1.3	Smoothing	131
5.1.4	Foreground and Background Separation.....	132
5.1.5	Summary	132
5.2	Character Reconstruction	133
5.2.1	Ring Radius Transform	135
5.2.2	Horizontal and Vertical Medial Axes	136
5.2.3	Horizontal and Vertical Gap Filling	138
5.2.4	Large Gap Filling	139
5.2.5	Border Gap Filling	140
5.2.6	Small Gap Filling	141
5.2.7	Summary	142
5.3	Summary.....	142
	References.....	143
6	Character Segmentation and Recognition	145
6.1	Introduction to OCR and Its Usage in Video Text Recognition	145
6.2	Word and Character Segmentation	147
6.2.1	Fourier Transform-Based Method for Word and Character Segmentation.....	149
6.2.2	Bresenham's Line Algorithm.....	149
6.2.3	Fourier-Moments Features.....	150
6.2.4	Word Extraction	152
6.2.5	Character Extraction	153
6.2.6	Summary	153

6.3	Character Segmentation Without Word Segmentation	154
6.3.1	GVF for Character Segmentation	155
6.3.2	Cut Candidate Identification	155
6.3.3	Minimum-Cost Pathfinding	157
6.3.4	False-Positive Elimination	158
6.3.5	Summary	159
6.4	Video Text Recognition	159
6.4.1	Character Recognition	160
6.4.2	Hierarchical Classification Based on Voting Method	160
6.4.3	Structural Features for Recognition	164
6.4.4	Summary	166
6.5	Summary	166
	References	167
7	Video Text Detection Systems	169
7.1	License Plate Recognition Systems	170
7.1.1	Preprocessing of LPR Systems	172
7.1.2	License Plate Detection	175
7.1.3	Skew Correction	176
7.1.4	Character Segmentation	177
7.1.5	Character Recognition	178
7.2	Navigation Assistant Systems	181
7.3	Sport Video Analysis Systems	183
7.4	Video Advertising Systems	188
7.5	Summary	191
	References	191
8	Script Identification	195
8.1	Language-Dependent Text Detection	196
8.1.1	Method for Bangla and Devanagari (Indian Scripts) Text Detection	197
8.1.2	Headline-Based Method for Text Detection	197
8.1.3	Sample Experimental Results	199
8.1.4	Summary	199
8.2	Methods for Language-Independent Text Detection	200
8.2.1	Run Lengths for Multi-oriented Text Detection	201
8.2.2	Selecting Potential Run Lengths	201
8.2.3	Boundary Growing Method for Traversing	202
8.2.4	Zero Crossing for Separating Text Lines from Touching ..	204
8.2.5	Sample Experiments	205
8.2.6	Summary	206
8.3	Script Identification	207
8.3.1	Spatial-Gradient-Features for Video Script Identification	210
8.3.2	Text Components Based on Gradient Histogram Method	210

8.3.3	Candidate Text Components Selection	212
8.3.4	Features Based on Spatial Information	213
8.3.5	Template Formation for Script Identification	214
8.3.6	Summary	217
8.4	Summary.....	218
	References.....	218
9	Text Detection in Multimodal Video Analysis	221
9.1	Relevance of Video Text and Other Modalities in Video Analysis.....	223
9.2	Video Text-Related Multimodality Analysis Models.....	227
9.3	Text Detection for Multimodal Video Content Analysis	229
9.3.1	Text Detection and Multimodal Analysis in Broadcast Videos	229
9.3.2	Lyrics Analysis for Interpreting Karaoke Music Video	232
9.3.3	Multimodal Video Summarization	236
9.3.4	Web Video Category/Search Through Text Modality	240
9.4	Summary.....	243
	References.....	244
10	Performance Evaluation	247
10.1	Performance Evaluation Protocols	248
10.2	Benchmark Databases for Video Text Detection	248
10.3	Matching Detected Text Boxes with Ground Truths	249
10.4	Performance Metrics for Video Text Detection	250
10.5	Dataset and Evaluation of Video Text Recognition.....	252
10.6	Summary.....	253
	References.....	253
	Index	255

Video Text Detection

Lu, T.; Palaiahnakote, S.; Tan, C.L.; Liu, W.

2014, X, 264 p. 160 illus., Hardcover

ISBN: 978-1-4471-6514-9
