

Contents

1	Preliminaries	1
1.1	Matrices	1
1.2	Eigenvalues of Symmetric Matrices.	5
1.3	Generalized Inverses	8
1.4	Graphs	10
	References and Further Reading.	11
2	Incidence Matrix	13
2.1	Rank	14
2.2	Minors	15
2.3	Path Matrix	17
2.4	Integer Generalized Inverses.	18
2.5	Moore–Penrose Inverse	20
2.6	0–1 Incidence Matrix	22
2.7	Matchings in Bipartite Graphs	23
	References and Further Reading.	25
3	Adjacency Matrix	27
3.1	Eigenvalues of Some Graphs	28
3.2	Determinant	30
3.3	Bounds	33
3.4	Energy of a Graph	38
3.5	Antiadjacency Matrix of a Directed Graph	40
3.6	Nonsingular Trees.	42
	References and Further Readings	48
4	Laplacian Matrix	49
4.1	Basic Properties	50
4.2	Computing Laplacian Eigenvalues.	51
4.3	Matrix-Tree Theorem	52

4.4	Bounds for Laplacian Spectral Radius	54
4.5	Edge-Laplacian of a Tree	55
	References and Further Reading	59
5	Cycles and Cuts	61
5.1	Fundamental Cycles and Fundamental Cuts	61
5.2	Fundamental Matrices	63
5.3	Minors	64
	References and Further Reading	68
6	Regular Graphs	69
6.1	Perron–Frobenius Theory	69
6.2	Adjacency Algebra of a Regular Graph	74
6.3	Complement and Line Graph of a Regular Graph	75
6.4	Strongly Regular Graphs and Friendship Theorem	78
6.5	Graphs with Maximum Energy	81
	References and Further Reading	85
7	Line Graph of a Tree	87
7.1	Block Graphs	87
7.2	Signless Laplacian Matrix	93
7.3	Nullity of the Line Graph of a Tree	95
	References and Further Reading	99
8	Algebraic Connectivity	101
8.1	Preliminary Results	101
8.2	Classification of Trees	103
8.3	Monotonicity Properties of Fiedler Vector	108
8.4	Bounds for Algebraic Connectivity	110
	References and Further Reading	114
9	Distance Matrix of a Tree	115
9.1	Distance Matrix of a Graph	117
9.2	Distance Matrix and Laplacian of a Tree	120
9.3	Eigenvalues of the Distance Matrix of a Tree	125
	References and Further Reading	130
10	Resistance Distance	131
10.1	The Triangle Inequality	132
10.2	Network Flows	134
10.3	A Random Walk on Graphs	137
10.4	Effective Resistance in Electrical Networks	138
10.5	Resistance Matrix	139
	References and Further Reading	144

11 Laplacian Eigenvalues of Threshold Graphs	145
11.1 Majorization.	145
11.2 Threshold Graphs	149
11.3 Spectral Integral Variation	151
References and Further Reading.	155
12 Positive Definite Completion Problem	157
12.1 Nonsingular Completion	157
12.2 Chordal Graphs	158
12.3 Positive Definite Completion	160
References and Further Reading.	164
13 Matrix Games Based on Graphs	165
13.1 Matrix Games	165
13.2 Vertex Selection Games.	167
13.3 Tournament Games.	169
13.4 Incidence Matrix Games	171
References and Further Reading.	177
Hints and Solutions to Selected Exercises	179
Bibliography	187
Index	191

Graphs and Matrices

Bapat, R.

2014, XI, 193 p. 32 illus., Softcover

ISBN: 978-1-4471-6568-2
