
Contents

1	Introduction—What Is this Guide About?	1
1.1	Introduction.	1
1.2	Motivation for Writing this Guide	2
1.3	MTCS Course	3
1.3.1	MTCS Course Overview.	3
1.3.2	Course Population.	5
1.3.3	Course Objectives.	6
1.3.4	Recommended Teaching Methods Used in the MTCS Course	6
1.4	The Structure of the Guide to Teaching Computer Science	7
1.4.1	Guide Structure and Organization.	7
1.4.2	The Content of the Guide Chapters.	8
1.5	How to Use the Guide?	11
1.5.1	Instructors of the MTCS Course.	11
1.5.2	The Prospective Computer Science Teachers Enrolled in the MTCS Course.	13
1.5.3	Computer Science Instructors in the University.	13
1.5.4	Instructors of In-Service Teachers' Professional Development Programs.	13
1.5.5	High School Computer Science Teachers.	13
	References	14
2	Active Learning and Active-Learning-Based Teaching Model	15
2.1	Introduction.	15
2.2	Active Learning.	16
2.3	Why Active Learning Is Suitable for Implementation in the MTCS Course?	17
2.4	Active-Learning-Based Teaching Model	19
2.5	The Role of the Instructor in the Active-Learning-Based Teaching Model	20
	References	21

3	Overview of the Discipline of Computer Science	23
3.1	Introduction.	23
3.2	What Is Computer Science?	24
3.3	History of Computer Science	28
3.4	Computer Scientists	30
3.5	Social Issues of Computer Science.	31
3.5.1	Ethics in Computer Science Education.	32
3.5.2	Diversity	33
3.5.3	Soft Skills	35
3.6	Programming Paradigms.	38
3.7	Computer Science Soft Ideas	42
3.7.1	What Are Computer Science Soft Ideas?	42
3.7.2	Computer Science Soft Ideas in the MTCS Course	43
3.8	Computer Science as an Evolving Discipline.	49
3.9	Computer Science: An Integrated and Integral Part of Other Disciplines	51
	References	52
4	Research in Computer Science Education 4	55
4.1	Introduction.	55
4.2	Research in Computer Science Education: What is it and Why and How is it Useful?	56
4.2.1	Computer Science Education Research Categories	56
4.2.2	Computer Science Education Research on Learning and Teaching Processes.	58
4.2.3	Resources for Computer Science Education Research	61
4.3	MTCS Course Activities.	62
	References	70
5	Problem-Solving Strategies	75
5.1	Introduction.	75
5.2	Problem-Solving Processes.	76
5.3	Problem Understanding	78
5.4	Solution Design.	79
5.4.1	Defining the Problem Variables	79
5.4.2	Stepwise Refinement.	82
5.4.3	Algorithmic Patterns	84
5.5	Debugging.	86
5.6	Reflection	89
	References	92
6	Learners' Alternative Conceptions.	95
6.1	Introduction.	95
6.2	Pedagogical Tools for Dealing with Alternative Conceptions	97
	References	104

7 Teaching Methods in Computer Science Education	105
7.1 Introduction	105
7.2 Pedagogical Tools	106
7.2.1 Pedagogical Games	106
7.2.2 The CS-Unplugged Approach	110
7.2.3 Rich Tasks	111
7.2.4 Concept Maps	116
7.2.5 Classification of Objects and Phenomena from Life	120
7.2.6 Metaphors	121
7.3 Different Forms of Class Organization	124
7.4 Mentoring Software Project Development ⁷	129
References	134
8 Lab-Based Teaching	137
8.1 Introduction	137
8.2 What Is a Computer Lab?	139
8.3 Lab-First Approach	143
8.4 Visualization and Animation	149
8.5 Using the Internet in the Teaching of Computer Science	158
References	160
9 Types of Questions in Computer Science Education	163
9.1 Introduction	163
9.2 Types of Questions	165
9.2.1 Type1. Development of a Solution	166
9.2.2 Type2. Development a Solution That Uses a Given Module	166
9.2.3 Type3. Tracing a Given Solution	167
9.2.4 Type4. Analysis of Code Execution	167
9.2.5 Type5. Finding the Purpose of a Given Solution	168
9.2.6 Type6. Examination of the Correctness of a Given Solution	168
9.2.7 Type7. Completion of a Given Solution	169
9.2.8 Type8. Instruction Manipulations	170
9.2.9 Type9. Efficiency Estimation	172
9.2.10 Type10. Question Design	172
9.2.11 Type11. Programming Style Questions	173
9.2.12 Type12. Transformation of a Solution	173
9.2.13 Combining Several Types of Questions	174
9.3 Problem-Solving Questions	176
9.4 Kinds of Questions	178
9.4.1 Story Questions	178
9.4.2 Closed Questions	179
9.4.3 Unsolvable Questions	181

9.5	Assimilation of the Types of Questions to Different Computer Science Contents	181
9.6	Question Preparation	182
	References	185
10	Assessment	187
10.1	Introduction	187
10.2	Tests	191
10.3	Project Assessment	195
10.3.1	Individual Projects	196
10.3.2	Team Projects	196
10.4	Portfolio	200
10.5	The Evaluation of the Students in the MTCS Course	203
	References	204
11	Teaching Planning	207
11.1	Introduction	207
11.2	Top-Down Approach for Teaching Planning	208
11.2.1	Broad Perspective: Planning the Entire Curriculum	209
11.2.2	Intermediate Level Perspective: Planning the Teaching of a Study Unit	209
11.2.3	Local Level Perspective: Planning a Lesson	210
11.2.4	Building Concept Understanding in a Spiral Gradient Manner	210
11.3	Illustration: Teaching One-Dimensional Array	211
11.3.1	Planning the Teaching of a Study Unit about One-Dimensional Array	212
11.3.2	Planning the Teaching of the First Lesson about One-Dimensional Array	213
11.3.3	Illustration Summary	216
	References	219
12	Integrated View at the MTCS Course Organization:	
	The Case of Recursion	221
12.1	Introduction	221
12.2	Classification of Everyday Objects and Phenomena: The Case of Recursion	223
12.3	Leap of Faith	225
12.4	Models of the Recursive Process	228
12.4.1	The Little People Model	229
12.4.2	The “Top-Down Frames” Model	232
12.5	Research on Learning and Teaching Recursion	233
12.6	How Does Recursion Sound?	236

12.7	Assessment	238
12.8	Additional Activities	239
	References	241
13	Getting Experience in Computer Science Education	243
13.1	Introduction.	243
13.2	The Practicum in the High School	244
13.2.1	General Description	244
13.2.2	The Practicum as a Bridge Between Theory and Its Application	245
13.3	Computer Science Teacher Training Within the Professional Development School Collaboration Framework	252
13.3.1	General Description and Main Objectives	252
13.3.2	Training Computer Science Prospective Teachers Within the PDS	253
13.3.3	The Practice of Teaching Within the PDS.	255
13.4	A Tutoring Model for Guiding Problems-Solving Processes	256
13.4.1	The Implementation of the Tutoring Model	256
13.4.2	The Contribution of the Mentoring Model to Prospective Computer Science Teachers Teaching Experience.	258
13.5	Practicum Versus Tutoring	259
	References	260
14	Design of Methods of Teaching Computer Science Courses	263
14.1	Perspectives on the MTCS Course	263
14.2	Suggestions for MTCS Course Syllabi.	265
14.2.1	Course Structure	265
14.2.2	Course Syllabus	265
	References	268
15	High School Computer Science Teacher Preparation Programs	269
15.1	A Model for High School Computer Science Education	269
15.1.1	Background.	270
15.1.2	The Model Components and Their Amalgamation.	270
15.1.3	Connections Among the Model Components	274
15.1.4	Comments About the Model.	276
15.2	Construction of a Computer Science Teacher Preparation Program—the ECSTPP Workshop	276
15.2.1	Rationale	276
15.2.2	Population	276
15.2.3	Objectives	277
15.2.4	Structure and Contents	277
15.2.5	ECSTPP Workshop—Summary	279

15.3	Computer Science Teaching as an Additional Profession.	279
15.3.1	Program Description and Rationale	280
15.3.2	The Computer Science Education Track of the Program.	280
15.3.3	Computer Science Students' Perspective and Contribution	281
	References	282
16	Epilogue	285
Index	287

Guide to Teaching Computer Science
An Activity-Based Approach

Hazan, O.; Lapidot, T.; Ragonis, N.

2014, XXIV, 296 p. 10 illus., Hardcover

ISBN: 978-1-4471-6629-0
