

Contents

1	Introduction	1
1.1	Background and Motivation	1
1.2	Cognitive Radio in a Nutshell	2
1.3	Video over Cognitive Radio Networks	4
1.4	Outline	4
2	Video over Cellular CR Networks	7
2.1	CR Video Multicast Framework	9
2.1.1	Network Model	9
2.1.2	Spectrum Sensing	10
2.1.3	Opportunistic Spectrum Access	12
2.1.4	Modulation-Coding Schemes	12
2.1.5	Proportional Fair Allocation	13
2.2	Optimized Video Multicast in CR Networks	14
2.2.1	Outline of the Proposed Approach	14
2.2.2	Enhancement Layer Partitioning and Tile Allocation	15
2.2.3	Tile Scheduling in a Time Slot	21
2.3	Simulation Results	23
2.4	Related Work	28
2.5	Conclusion	28
3	Video over Cooperative CR Networks	31
3.1	Network Model and Assumptions	32
3.1.1	Spectrum Access	33
3.1.2	Zero-Forcing Precoding	34
3.2	Problem Formulation	35
3.3	Solution Algorithms	38
3.3.1	Case of a Single Channel	38
3.3.2	Case of Multiple Channels with Channel Bonding	44
3.3.3	Case of Multiple Channels Without Channel Bonding	44
3.4	Performance Evaluation	47
3.4.1	Case of a Single Licensed Channel	48
3.4.2	Case of Multiple Channels Without Channel Bonding	49

3.5	Related Work	50
3.6	Conclusion	52
4	Video over Femto CR Networks	53
4.1	System Model and Preliminaries	54
4.1.1	Spectrum and Network Model	54
4.1.2	Spectrum Sensing and Access.	55
4.1.3	Channel Model	56
4.1.4	Video Performance Measure.	57
4.2	MGS Video over Femtocell CR Networks	58
4.2.1	Case of Single FBS.	58
4.2.2	Case of Multiple Noninterfering FBS's	63
4.2.3	Case of Multiple Interfering FBS's	64
4.3	Simulation Results.	70
4.3.1	Case of Single FBS.	70
4.3.2	Case of Interfering FBS's	74
4.4	Related Work	77
4.5	Conclusions	78
5	Video over Multi-hop CR Networks	79
5.1	System Model.	81
5.1.1	Network Model.	81
5.1.2	Spectrum Sensing	83
5.1.3	Spectrum Access.	84
5.1.4	Link and Path Statistics	85
5.2	Problem Statement.	85
5.2.1	Multi-hop CR Network Video Streaming Problem	86
5.2.2	Centralized Algorithm and Upper/Lower Bounds	89
5.3	Dual Decomposition	90
5.3.1	Decompose Problem OPT-CRV	90
5.3.2	Solve the Channel Scheduling Subproblem	90
5.3.3	Solve the Path Selection Subproblem	91
5.3.4	Optimality and Convergence Analysis	93
5.3.5	Practical Considerations.	96
5.4	Simulation Results.	97
5.4.1	Methodology and Simulation Settings	97
5.4.2	Simulation Results	98
5.5	Related Work	101
5.6	Conclusion	103

6 Conclusion and Open Problems	105
6.1 Summary	105
6.2 Open Problems and Future Work	105
Bibliography	109
About the Author	115
Index	117

Video over Cognitive Radio Networks
When Quality of Service Meets Spectrum

Mao, S.

2014, XVII, 119 p. 37 illus., 36 illus. in color., Hardcover

ISBN: 978-1-4614-4956-0
