

Contents

1 Rank-Based Nonparametrics	1
Willem R. van Zwet and W. Albers	
1.1 Introduction to Two Papers on Higher Order Asymptotics	1
1.1.1 Introduction	1
1.1.2 Asymptotic Expansions for the Power of Distribution Free Tests in the One-Sample Problem	1
Reprinted with permission of the Institute of Mathematical Statistics	
1.1.3 Edgeworth Expansions in Nonparametric Statistics	7
Reprinted with permission of the Institute of Mathematical Statistics	
References	9
2 Robust Statistics.....	51
Peter Bühlmann	
2.1 Introduction to Three Papers on Robustness.....	51
2.1.1 General Introduction.....	51
2.1.2 One-Step Huber Estimates in the Linear Model.....	51
Reprinted with permission of the American Statistical Association	
2.1.3 Parametric Robustness: Small Biases Can Be Worthwhile ...	52
Reprinted with permission of the Institute of Mathematical Statistics	
2.1.4 Robust Regression Based on Infinitesimal Neighbourhoods	53
Reprinted with permission of the Institute of Mathematical Statistics	
References	53

3 Asymptotic Theory	99
Qi-Man Shao	
3.1 Introduction to Four Papers on Asymptotic Theory	99
3.1.1 General Introduction.....	99
3.1.2 Asymptotic Theory of Bayes Solutions.....	99
Reprinted with permission of Springer Science+Business Media	
3.1.3 The Bartlett Correction	100
3.1.4 Asymptotic Distribution of the Likelihood Ratio Statistic in Mixture Model	102
Reprinted with permission of Wiley Eastern Limited	
3.1.5 Hidden Markov Models	103
Reprinted with permission of the Institute of Mathematical Statistics	
References	105
4 Function Estimation	187
Hans-Georg Müller	
4.1 Introduction to Three Papers on Nonparametric Curve Estimation...	187
4.1.1 Introduction	187
4.1.2 Density Estimation and Goodness-of-Fit	188
Reprinted with permission of the Institute of Mathematical Statistics	
4.1.3 Estimating Functionals of a Density	190
Reprinted with permission of the Indian Statistical Institute	
4.1.4 Curse of Dimensionality for Nonparametric Regression on Manifolds	192
Reprinted with permission of the Institute of Mathematical Statistics	
References	193
5 Adaptive Estimation	243
Jon A. Wellner	
5.1 Introduction to Four Papers on Semiparametric and Nonparametric Estimation	243
5.1.1 Introduction: Setting the Stage	243
5.1.2 Paper 1	245
5.1.3 Paper 2	246
5.1.4 Paper 3	246
5.1.5 Paper 4	247
5.1.6 Summary and Further Problems	248
References	249

6 Bootstrap Resampling	333
Peter Hall	
6.1 Introduction to Four Bootstrap Papers	333
6.1.1 Introduction and Summary	333
6.1.2 Laying Foundations for the Bootstrap	334
6.1.3 The Bootstrap in Stratified Sampling	337
Reprinted with permission of the Institute of Mathematical Statistics	
6.1.4 Efficient Bootstrap Simulation	339
6.1.5 The m -Out-of- n Bootstrap	341
References	343
7 High-Dimensional Statistics	419
Jianqing Fan	
7.1 Contributions of Peter Bickel to Statistical Learning.....	419
7.1.1 Introduction	419
7.1.2 Intrinsic Dimensionality	420
7.1.3 Generalized Boosting	423
Reprinted with permission of the Journal of Machine Learning Research	
7.1.4 Variable Selections.....	427
References	428
8 Miscellaneous	507
Ya'acov Ritov	
8.1 Introduction to Four Papers by Peter Bickel	507
8.1.1 General Introduction.....	507
8.1.2 Minimax Estimation of the Mean of a Normal Distribution When the Parameter Space Is Restricted	507
Reprinted with permission of the Institute of Mathematical Statistics	
8.1.3 What Is a Linear Process?	508
8.1.4 Sums of Functions of Nearest Neighbor Distances, Moment Bounds, Limit Theorems and a Goodness of Fit Test	509
Reprinted with permission of the Institute of Mathematical Statistics	
8.1.5 Convergence Criteria for Multiparameter Stochastic Processes and Some Applications	509
References	510

Selected Works of Peter J. Bickel
Fan, J.; Ritov, Y.; Wu, C.F.J. (Eds.)
2014, XLIV, 584 p., Hardcover
ISBN: 978-1-4614-5543-1
