

Contents

- 1 Overview of Human System and Its Artificial Replacement 1**
 - 1.1 Human Body’s Superficial Anatomy..... 1
 - 1.2 Human Body Features 1
 - 1.3 Body Size, Type, and Proportion..... 2
 - 1.4 A Brief Outline of the Organization of the Human System 3
 - 1.4.1 Tissue + Tissue = Organ (Different Tissues Together Form an Organ)..... 3
 - 1.4.2 Organ + Organ = Organ System 4
 - 1.5 Major Organ Systems 4
 - 1.5.1 Integumentary System 5
 - 1.5.2 Muscular System 5
 - 1.5.3 Skeletal System..... 5
 - 1.5.4 Cardiovascular System 7
 - 1.5.5 Respiratory System..... 7
 - 1.5.6 Urinary System 7
 - 1.5.7 Reproductive System 9
 - 1.5.8 Nervous System..... 11
 - 1.5.9 Digestive System 11
 - 1.5.10 Lymphatic System 12
 - 1.5.11 Immune System 12
 - 1.6 Common Names of Internal Organs (in Alphabetical Order) 14
 - 1.7 Brief Idea of Artificial Organs 14
 - 1.7.1 Different Types of Organs 15
 - 1.7.2 Brain 15
 - 1.7.3 Cardia 16
 - 1.7.4 Corpora Cavernosa 16
 - 1.7.5 Ear..... 16
 - 1.7.6 Eye 16
 - 1.7.7 Heart 17
 - 1.7.8 Limbs 17
 - 1.7.9 Liver..... 17

1.7.10	Lungs	18
1.7.11	Pancreas	18
1.7.12	Bladder.....	18
1.7.13	Ovaries	18
1.7.14	Beyond Restoration.....	19
1.7.15	Timeline of Successful Transplants	19
	References.....	20

2.1	Introduction.....	23
2.2	Structural Versus Material Properties	23
2.2.1	Anisotropy and Nonhomogeneity.....	24
2.2.2	Viscoelastic Properties.....	24
2.2.3	Viscosity	25
2.3	Testing Procedures	25
2.4	Bones.....	26
2.4.1	Composition.....	26
2.4.2	Structure.....	27
2.5	Material Properties and Related Behavior	29
2.6	Cartilage	32
2.6.1	Composition.....	32
2.7	Material Properties and Related Behavior	33
2.8	Ligaments.....	34
2.8.1	Composition.....	34
2.9	Material Properties and Related Behavior	36
2.9.1	Ligaments Have Characteristics of Strain-Rate Sensitivity, Stress-Relaxation, Creep, and Hysteresis	36
2.10	Correlation Between Structure and Function.....	37
2.10.1	Ligament–Bone/Tendon–Bone Insertions	38
	Reading List.....	39
	Problems	39
3	Basics of Design Process	41
3.1	Introduction.....	41
3.2	Adoptive and Adaptive Design	41
3.2.1	Introduction.....	41
3.3	Introduction to Machine Design	42
3.4	Principle of Science or Mechanism to Be Used.....	43
3.5	Safety of Products.....	47
3.6	Manufacturability.....	47
3.7	Standardization	48
3.8	Customization	48
	For Further Details, the Following Books May Be Consulted.....	49
	Exercises	49

4 Biomaterials and Its Characterization.....	51
4.1 Introduction.....	51
4.2 Biomineralization.....	52
4.3 Abalone Shell.....	54
4.4 Self-Assembly.....	55
4.5 Structural Hierarchy.....	56
4.6 Applications.....	56
4.7 Compatibility.....	57
For Further Reading, These Papers May Be Consulted.....	58
4.8 Biopolymers.....	59
4.8.1 Applications.....	60
4.8.2 Sources.....	60
4.8.3 Applications.....	60
4.8.4 Sources.....	60
4.8.5 Applications.....	61
4.8.6 Benefits.....	61
4.9 Polymers for Healthcare.....	62
4.9.1 Sterilization.....	62
4.9.2 Compatibility with Sterilization Method of Various Industrial Biopolymers (Solviva).....	62
4.9.3 Polyether Ether Ketone (PEEK).....	63
4.9.4 Applications.....	64
4.10 Bioceramics.....	64
4.10.1 History.....	64
4.10.2 Current Status.....	65
4.10.3 Future Trends.....	65

22.2.1	History.....	363
22.2.2	Indications.....	363
22.3	Patient Characteristics.....	364
22.4	Types of Implants.....	365
22.5	Silicone Gel Implants	366
22.5.1	First Generation	366
22.5.2	Second Generation.....	366
22.5.3	Third and Fourth Generations.....	367
22.5.4	Fifth Generation	367
22.6	Implant Pocket Placement	367
22.7	Failure and Rupture	369
22.8	Implants and Mammography.....	369
22.8.1	Breast Implant Manufacturers.....	370
22.8.2	Artificial Breast Prostheses	370
22.9	Artificial Vagina.....	371
22.9.1	Veterinary Use.....	371
22.10	Usage as Sex Toy	371
22.10.1	Types	372
22.11	Materials	373
	References.....	373
	Problems	375
23	The Medical Device Market and Ethical Issues of Implants	377
23.1	Introduction to the Medical Device Market.....	377
23.2	Ethical Issues of Implants.....	379
23.2.1	The Need for Implants	380
23.3	Treatment Modality	380
23.4	Transplants and Implants	381
23.5	Implant Failure.....	382
23.6	Clinical Trials	384
23.7	Ethical Issues of Dental Implants	384
23.8	Cost	385
23.9	Moral Uncertainties	385
23.10	Religion and Morals	386

23.11	Ethical Issues of Transplants	387
23.11.1	Availability.....	389
23.12	Xenografts as a Solution.....	390
23.13	Life Expectancy	391
	Suggested References for Further Details.....	393
	Exercises	393
24	The Manufacturing, Testing, and Sterilization of Implants.....	395
24.1	Introduction.....	395
24.2	Casting	396
24.3	Forging.....	397
24.4	Metal-Shaping Machine Tools.....	397
24.5	Manufacturing Implants at a High Speed	399
24.6	Rapid Prototyping.....	400
24.7	Nonconventional Machining.....	402
24.8	Nondestructive Testing	403
24.9	Sterilization.....	404
24.9.1	Physical Agent	405
24.10	Conclusions.....	408
	For Further Reading, the Following References Are Given	408
	For Computer-Aided Design and Manufacture.....	408
	For Sterilization of Implants	409
	Problems	409
