

Contents

Preface	v
1 Forces and Moments	1
1.1 Introduction	1
1.2 Review of Vectors	14
1.3 Forces	24
1.4 Moments	30
1.5 Statically Equivalent Force Systems	39
2 Equilibrium	49
2.1 Equilibrium of Particle Systems	49
2.2 Equilibrium of Rigid Bodies in Two Dimensions	62
2.3 Equilibrium of Rigid Bodies in Three Dimensions	83
2.4 Method of Sections	93
3 Articulated Assemblages of Rigid Members	103
3.1 Method of Joints	103
3.2 Two-Dimensional Trusses	111
3.3 Three-Dimensional Trusses	122
3.4 Frames and Machines	129
3.5 Chains and Cables	137
4 Stress	149
4.1 Normal Stress, Saint-Venant's Principle	149
4.2 Shear Stress	157
4.3 Simple Stress States, Stress-Based Design	164
4.4 General State of Stress	175
4.5 Local Equilibrium Equations	183

4.6	Stress Transformation, Principal Stresses, Mohr's Circle	190
5	Deformation and Strain	209
5.1	Longitudinal Strain	209
5.2	Shear Strain	218
5.3	Displacement, General State of Strain	224
5.4	Strain Transformation, Principal Strains	233
6	Elasticity	241
6.1	Springs and Hooke's Law (Axial and Shear)	241
6.2	Generalized Hooke's Law	251
6.3	Elongation of Axially Loaded Elastic Bars	266
6.4	Static Indeterminacy in Linearly Elastic Bodies	279
6.5	Elastic Energy	290
6.6	Thermoelastic Properties of Solids	305
7	Torsion	313
7.1	Torsion of Elastic Circular Bars	313
7.2	Torsion of Non-circular Thin-Walled Tubes	325
7.3	Compound Shafts	332
7.4	Open Thin-Walled Sections	338
8	Elastic Bending of Beams	345
8.1	Shear and Bending-Moment Diagrams	345
8.2	Pure Bending of Beams	358
8.3	Bernoulli–Euler Beam Theory	371
8.4	Calculation of Elastic Beam Deflections	383
9	Additional Topics in Bending	397
9.1	Composite Cross-Sections	397
9.2	Asymmetric Bending of Beams	405
9.3	Shear Stresses in Beams	413
9.4	Stresses in Beams Under Combined Loading	426
10	Elastic Stability and Buckling	433
10.1	Buckling Fundamentals and Simple Models	433
10.2	Stability and Energy	442
10.3	Buckling of Elastic Columns	448

11 Inelasticity and Material Failure	463
11.1 Stress–Strain Diagrams	463
11.2 Material Failure	475
11.3 Structural Failure	485
Appendix A: Singularity Functions	499
Appendix B: Tables B-1–B-6	503
Photo Credits	507
Index	511

Introduction to Solid Mechanics

An Integrated Approach

Lubliner, J.; Papadopoulos, P.

2014, IX, 519 p. 469 illus., 13 illus. in color., Hardcover

ISBN: 978-1-4614-6767-0
