## Part I An Overview of Stellar Evolution

<b>1. The Biology of Supernovae .....</b>	<b>3</b>
Introduction .....	3
Spectra: Chemical Portraits of Stars.....	3
Photometry: Behavioral Studies of Stellar Death .....	8
The HR Diagram .....	10
The Power Sources of Nuclear Reactions in Stars.....	15
The Chemical Composition of Stars .....	18
Stellar Structure.....	20
Rotation and Angular Momentum .....	25
The Effects of Magnetism .....	28
The Biology of Supernovae.....	31
Supernova Taxonomy.....	33
Basic Identifying Features .....	35
Conclusions .....	40
 <b>2. The Anatomy of Stellar Life and Death .....</b>	 <b>41</b>
Initial Conditions .....	41
The Life of a Star .....	45
The Main Sequence .....	46
$\beta$ -Cephei Variables.....	52
The Neutron Star.....	67
The Fate of the Surrounding Star.....	70
Formation of Supernova Remnants.....	73
Messages From a Retreating Front .....	76
Conclusions .....	79

## Part II A Walk Across the Rooftops

<b>3. Stellar Evolution at the Summit of the Main Sequence .....</b>	<b>83</b>
Introduction .....	83

Looking Deeper into the Controversy .....	84
A Problem with Wolves .....	87
The Humphrey-Davidson Limit .....	89
Luminous and Violent Blue Variables .....	91
Evolutionary Paths of the Most Massive Stars .....	95
Type II <sub>n</sub> Supernovae .....	97
Explaining Type II <sub>n</sub> Properties.....	99
Catching the Wave .....	100
From Imposter to Supernova.....	103
Direct Detonation of LBVs.....	105
Slow Blow: The Case of Supernova SN 2008iy .....	106
The Impact of Collisions (No Pun Intended!) .....	109
Conclusions .....	116
 <b>4. Collapsars, Hypernovae and Long Gamma</b>	
<b>Ray Bursts</b> .....	119
Introduction .....	119
From Star Wars to Star Death .....	119
Beppo-SAX to the Rescue.....	120
Of Fireballs and Jets.....	123
A Best Fit: The Collapsar Model.....	126
Hypernovae and Hyperbolae .....	130
Reconstructing the Supernova-GRB Connection .....	136
Supernova: Or Supranova? .....	139
XRFs and Type Ibc Supernovae .....	142
SN 2010jp: The First Jet-Powered Type II Supernova.....	149
Conclusions .....	152
 <b>5. Death by Fallback</b> .....	153
Introduction .....	153
The Mystery of Cygnus X-1 .....	154
Controversial Supernovae .....	160
Populations .....	162
Conclusions .....	163
 <b>6. The Formation of Massive Stars by Collision</b>	
<b>and Their Fate</b> .....	165
Introduction .....	165
A Lack of Interpersonal Skills: Harassment and Scandal .....	166
Conclusions .....	173

<b>7. Electron-Capture Supernovae .....</b>	<b>175</b>
Introduction .....	175
Supernova or Imposter? .....	175
The Troubling Fates of Intermediate Mass Stars .....	176
Limiting Factors .....	178
Post Main Sequence Evolution .....	180
The Cassino da Urca .....	183
Many Roads Lead to Rome .....	190
Did the Progenitor of SN 2008S Spend Too Much Time at the Roulette Table? .....	191
SN 2009md: A Faint Type IIP Supernova with a Troubling Origin .....	193
A Coda from the Distant Past: Type I.5 Supernovae .....	196
Conclusion .....	198
 <b>8. Ultra-luminous Type II<sub>n</sub> Supernovae.....</b>	 <b>199</b>
Introduction .....	199
Taking the Pulse .....	199
A Lethal Pulse: SN 2006gy and 2006tf as Pulsational Pair-Instability Supernovae.....	205
SN 2008es: An Ultra-Luminous Type II-L Supernova.....	211
A Deadly Couple Embrace: Was SN 2007bi the First Pair Instability Supernova? .....	217
Was Pair Instability a Common Cause of Death in the Early Universe? .....	225
Conclusion .....	227
 <b>9. The Magnetar Model for Ultra-Luminous Supernovae ..</b>	 <b>229</b>
Introduction .....	229
The Magnetar Model .....	230
SN 2006aj and the X-ray Flashes .....	235
Conclusions .....	236
 <b>10. The Mysterious SN 2005ap and Luminous     Blue Flashes .....</b>	 <b>239</b>
Introduction .....	239
SN 2005ap .....	239
Arrival of the White Knights .....	242
The PPI Model .....	244
The Magnetar Model .....	246
The Buried GRB Model .....	247

Are These Blue Explosions Pair-Instability Events? .....	248
Pan-STARRS Events .....	248
Can We Tie Up All the Loose Ends? .....	249
Conclusions .....	250

### Part III Thermonuclear Supernovae

<b>11. Hypotheses and an Oxymoron .....</b>	<b>255</b>
Introduction .....	255
What Astronomers Know .....	255
What Astronomers Think They Know .....	257
What Astronomers Don't Know .....	258
Mechanisms and Scenarios .....	258
The Single-Degenerate Scenario .....	259
More Problems .....	262
A Precious Few .....	263
Double-Degenerate Models .....	265
The Explosion .....	267
SN 2011fe: A Defining Type Ia Supernova .....	271
Conclusions .....	274
<b>12. Are there Super-Chandrasekhar Supernovae? .....</b>	<b>275</b>
Introduction .....	275
Type Ia Supernovae: A Reprise .....	275
SN 1991T .....	276
SN 2003fg: Too Bright for Its Own Good? .....	278
Loneliness in a Crowd .....	280
Conclusions .....	283
<b>13. The Good, the Bad and the Ugly</b>	
<b>Thermonuclear Supernovae .....</b>	<b>285</b>
Introduction .....	285
R Corona Borealis: Born Again Stars .....	286
Mergers of More Massive White Dwarf Stars .....	289
AM CVn Systems .....	293
Type .Ia Supernovae: Descendants	
of AM CVn Binaries? .....	295
Record Breaking Type .Ia Supernova	
or Something Else? .....	299
Do Some Type Ia Supernovae Explode	
Without Detonation? .....	302
SN 2008ha: A Cousin of SN 2005hk? .....	305

PTF 09dav: Something Else? .....	310
SN 2005E: <i>Lex Parsimoniae</i> .....	313
Conclusions .....	318

## Part IV In Flagrante Delicto

<b>14. The Mysterious Case of V838 Monocerotis and the Red Novae.....</b>	<b>323</b>
Introduction .....	323
V838 Moncerotis .....	324
V4332 Sagittarii .....	330
A Stellar Merger Caught in the Act.....	331
M85's Red Nova.....	335
The Case of the Optical Transient NGC 300 OT.....	336
Once Red, Now Blue .....	338
What Do These Collisions Tell Us About Stellar Eruptions? .....	338
The Great Eruption of Eta Carinae: A Reprise.....	339
Conclusions .....	342
<b>15. Between Scylla and Charybdis.....</b>	<b>343</b>
Introduction .....	343
Type IIa? .....	343
What Might the New Scheme Be Based Upon? .....	347
Conclusions .....	350
<b>Glossary .....</b>	<b>351</b>
<b>Index .....</b>	<b>365</b>

Extreme Explosions

Supernovae, Hypernovae, Magnetars, and Other  
Unusual Cosmic Blasts

Stevenson, D.

2014, XIII, 369 p. 75 illus., 61 illus. in color., Softcover

ISBN: 978-1-4614-8135-5
