Contents

1 Introduction 1
- 1.1 Overview of Vehicular Networks 1
- 1.2 Capacity Scaling Laws 3
- 1.3 Capacity of Vehicular Networks 5

2 Capacity Scaling Laws of Wireless Networks 7
- 2.1 Preliminaries: Milestone of Throughput Capacity Scaling 7
  - 2.1.1 Notion of Throughput Capacity 7
  - 2.1.2 Random Networks 8
  - 2.1.3 Throughput Capacity of Random Networks 9
- 2.2 Throughput Capacity of Ad Hoc Networks 10
  - 2.2.1 Strategies to Improve Throughput Capacity 10
  - 2.2.2 Other Factors Affecting Scaling Laws 12
- 2.3 Fundamental Tradeoffs: Capacity, Delay, and Mobility 14
  - 2.3.1 Mobility Models 14
  - 2.3.2 Tradeoffs Between Throughput Capacity and Delay 16
  - 2.3.3 Impact of Restricted and Correlated Mobility 18
  - 2.3.4 Capacity and Delay Scaling without Exploiting Mobility 19
- 2.4 Infrastructure Matters: Capacity of Hybrid Wireless Networks 19
  - 2.4.1 Ad Hoc Networks with Supportive Infrastructure 20
  - 2.4.2 Ad Hoc Networks with Wireless Aiding Nodes 22
  - 2.4.3 Multihop Access Networks 23
  - 2.4.4 Cognitive Radio Networks 24
- 2.5 Summary 25

3 Unicast Capacity of Vehicular Networks with Socialized Mobility 27
- 3.1 Introduction 27
- 3.2 System Model 28
  - 3.2.1 Street Pattern 28
  - 3.2.2 Socialized Mobility Model 29
  - 3.2.3 Traffic Model 33

3.2.4 Communication Model 33
3.2.5 Definitions 34
3.3 Asymptotic Capacity Analysis 34
3.3.1 Two-Hop Relay Scheme 35
3.3.2 Bounds of Per-Vehicle Throughput Capacity 36
3.3.3 Average Per-Vehicle Throughput 44
3.4 Case Study 49
3.5 Summary 52

4 Downlink Capacity of Vehicular Networks with Access Infrastructure 53
4.1 Introduction 53
4.2 System Model 55
4.2.1 Urban Street Pattern 55
4.2.2 Spatial Distribution of Vehicles 55
4.2.3 Propagation and Channel Capacity 56
4.3 Analysis of Downlink Capacity 57
4.3.1 Network with Deployment of BSs 57
4.3.2 Network with Deployment of WMBs 63
4.3.3 Network with Deployment of RAPs 67
4.4 Case Study 70
4.4.1 Impact of Coverage of Infrastructure Nodes 70
4.4.2 Comparison of Deployment Scales 72
4.4.3 Capacity-Cost Tradeoffs 72
4.5 Summary 74

5 Conclusions and Future Directions 75
5.1 Conclusions 75
5.2 Future Research Directions 76
