**Part I    Developing Your Skills**

<b>1    Accessing and Developing Your Observing Skills .....</b>	<b>3</b>
1.1   Stargazer or Amateur Astronomer? .....	3
1.2   Perceptions and Expectations .....	7
1.3   Assessing Your Skills and Identifying Your Interests.....	7
1.4   Taking Stock .....	11
1.5   Some General Observing Rules .....	11
1.6   Managing Your Expectations .....	12
1.7   How the Human Eye Works.....	13
1.8   Dark Adaptation.....	14
1.9   Factors That Can Affect Your Night Vision.....	16
1.10   Maintaining Your Dark Adaptation .....	17
1.11   Eyesight Correction .....	18
1.12   Set Yourself Realistic Targets .....	19
1.13   Evaluate Your Favored List of Targets.....	20
1.14   Assess Your Abilities .....	20
<b>2    Planning and Recording Your Observing Sessions.....</b>	<b>21</b>
2.1   Preparing for an Observing Session.....	21
2.2   Weather .....	21
2.3   Gain Knowledge of Your Quarry .....	23
2.4   Keep an Observing Notebook .....	24
2.5   Date and Time of Observation .....	24
2.6   The Seeing Scale.....	26
2.7   Note Down How and What You Observed .....	27

2.8	Astronomical Drawing .....	28
2.9	Getting Started with Drawing .....	29
2.10	Equipment Needed for Drawing .....	29
2.11	How to Draw .....	30
2.12	Finalizing Your Drawings for Presentation.....	35
<b>3</b>	<b>Equipment .....</b>	<b>37</b>
3.1	Telescopes and Accessories .....	37
3.2	A Long Hard Look at Your Equipment.....	39
3.3	General Notes About Telescopes .....	40
3.4	Binoculars .....	41
3.5	Choosing Binoculars .....	42
3.6	Telescopes .....	43
<b>4</b>	<b>Accessories .....</b>	<b>47</b>
4.1	Finder Scopes.....	47
4.2	Eyepieces .....	49
4.3	Star Diagonal or Right-Angle Prism.....	53
4.4	Barlow Lenses.....	54
4.5	Filters .....	55
4.6	An Occulting Bar .....	58
4.7	Dew Prevention .....	59
4.8	Collimating Your Telescope.....	60
4.9	Cleaning/Resurfacing Lenses and Mirrors.....	61
4.10	Aperture/Equipment Fever.....	62
4.11	Your Own Observatory .....	63
 <b>Part II Practical Observing: Your Quarry Awaits</b>		
<b>5</b>	<b>Constellations, Asterisms and Stars .....</b>	<b>69</b>
5.1	Star-Hopping.....	70
5.2	Learn to Star-Hop.....	70
5.3	Positions of Objects on the Sky .....	73
5.4	Asterisms.....	76
5.5	The Brightness of Stars .....	78
5.6	The Bayer Designation .....	80
5.7	Limiting Naked Eye Magnitude.....	81
5.8	Estimating Star Magnitudes .....	82
5.9	The Colors of Stars .....	84
5.10	The Hertzsprung-Russell Diagram.....	84
5.11	Investigating the Colors of Stars .....	85
5.12	Simple Spectroscopy.....	87
5.13	Star Catalogs .....	88

<b>6</b>	<b>Variable and Double Stars .....</b>	<b>89</b>
6.1	Variable Stars .....	89
6.2	Naming of Variable Stars .....	89
6.3	Types of Variable Stars .....	90
6.4	Supernovae .....	91
6.5	Naming of Supernova .....	93
6.6	Variable Star Observing Programs .....	93
6.7	Double and Multiple Stars .....	96
6.8	The Main Types of Double Stars .....	97
6.9	Measuring Double Stars .....	98
6.10	Instruments for Splitting Double Stars .....	99
6.11	The Airy Disk .....	99
6.12	Dawes Limit .....	101
6.13	A Couple of Challenging Double Stars .....	102
6.14	Double and Variable Star Resources .....	105
<b>7</b>	<b>The Solar System: The Sun .....</b>	<b>107</b>
7.1	Observing the Sun .....	107
7.2	Observing the Sun Indirectly .....	108
7.3	Observing the Sun Directly .....	111
7.4	Sunspots .....	113
7.5	Counting Sunspots .....	114
7.6	Counting Sunspot Groups .....	115
7.7	Classification of Sunspot Groups .....	115
7.8	Hydrogen Alpha and Calcium Solar Observing .....	117
7.9	Solar Eclipses .....	117
7.10	Solar Resources .....	118
<b>8</b>	<b>The Solar System: The Moon .....</b>	<b>119</b>
8.1	Observing the Moon .....	119
8.2	Common Lunar Features .....	123
8.3	Transient Lunar Phenomena and Impact Flashes .....	127
8.4	Lunar Eclipses .....	127
8.5	The Danjon Scale .....	129
8.6	Lunar Occultations .....	129
8.7	Lunar Resources .....	131
<b>9</b>	<b>The Solar System: Observing the Planets .....</b>	<b>133</b>
9.1	Mercury & Venus: The Inner Planets .....	133
9.2	Visibility of the Inner Planets .....	134
9.3	Observing the Inner Planets .....	136
9.4	Observing Features on the Inner Planets .....	137
9.5	Mars, Jupiter, Saturn, Uranus & Neptune: The Outer Planets .....	138
9.6	Retrograde Motion of the Planets .....	139
9.7	Observing Mars .....	140

9.8	Observing Jupiter .....	144
9.9	Jupiter's Red Spot .....	145
9.10	Other Jovian Features .....	146
9.11	Jupiter's Moons .....	147
9.12	Observing Saturn .....	149
9.13	Saturn's Ring System .....	150
9.14	Saturn's Cloud Structure .....	151
9.15	Saturn's Moons .....	152
9.16	Uranus and Neptune .....	153
9.17	Moons of Uranus and Neptune .....	154
9.18	Planetary Occultations of Stars or Other Planets .....	154
<b>10</b>	<b>The Solar System: Minor Solar System Bodies and Other Phenomena .....</b>	<b>157</b>
10.1	Minor Solar System Bodies .....	157
10.2	Pluto .....	158
10.3	Get a Permanent Observatory Number .....	159
10.4	Measuring the Brightness of Minor Planets .....	160
10.5	Observing Minor Planet Occultations .....	160
10.6	Two Objects to Look Out For .....	161
10.7	Meteors and Meteor Showers .....	161
10.8	Meteorites .....	163
10.9	Planning a Meteorite Hunt .....	165
10.10	Observing Satellites .....	166
10.11	Observing Geosynchronous Satellites .....	168
10.12	Observing Passing Spacecraft .....	171
10.13	Satellite Resources .....	172
10.14	The Aurora .....	172
10.15	The Zodiacal Light .....	174
10.16	Atmospheric Effects .....	174
<b>11</b>	<b>The Solar System: Observing Comets .....</b>	<b>177</b>
11.1	Comet Behavior .....	177
11.2	Comet Naming .....	178
11.3	Comet Features .....	179
11.4	Structure of a Comet .....	180
11.5	Measuring the Comet's Coma .....	182
11.6	The Comets Tail(s) .....	183
11.7	Predicting a Comets Future Appearance .....	184
11.8	Daylight Comets .....	185
11.9	Hunting for New Comets .....	186
11.10	Comet Resources .....	189
<b>12</b>	<b>Beyond the Solar System: Deep Sky Objects .....</b>	<b>191</b>
12.1	Observing Deep Sky Objects .....	191
12.2	Deep Sky Catalogs .....	193

12.3	Open Star Clusters .....	195
12.4	Globular Star Clusters .....	196
12.5	Planetary Nebulae .....	198
12.6	Gaseous Nebulae.....	199
12.7	Supernova Remnants.....	201
12.8	Galaxies.....	202
12.9	Quasars.....	205
12.10	Deep-Sky Resources .....	205
<b>13</b>	<b>Basic Astrophotography .....</b>	<b>209</b>
13.1	Astro-imaging Background.....	209
13.2	Basic Astrophotography Primer.....	210
13.3	Taking Your First Images .....	213
13.4	Processing Your Hard Earned Images.....	214
13.5	Astrophotography Through the Telescope.....	218
13.6	Imaging the Planets.....	220
13.7	Imaging Deep Sky Objects .....	220
13.8	Astrophotography Resources.....	221
 <b>Part III Further Information Sources and Community</b>		
<b>14</b>	<b>Online Resources.....</b>	<b>225</b>
14.1	Software .....	225
14.2	Online Citizen Astronomy .....	226
14.3	Remote Telescopes.....	228
14.4	Astronomy Podcasts.....	228
14.5	Mobile Phone/Tablet Apps.....	229
14.6	Meeting Other Observers .....	229
14.7	Local Astronomical Clubs/Societies.....	230
14.8	National and International Organizations .....	231
14.9	Online Discussions and Resources .....	233
14.10	Astronomy Conventions.....	234
14.11	Remote Dark Sky Observing. Going it Alone .....	235
14.12	Remote Dark Sky Observing. Star Parties .....	235
14.13	Basic Rules for Star Parties.....	236
14.14	Some of the Biggest and Most Popular Star Parties .....	237
<b>15</b>	<b>Star Maps, Sources of Information, Publications and Further Reading .....</b>	<b>239</b>
15.1	Star Maps .....	239
15.2	Other Publications.....	241
15.3	Places of Astronomical Interest .....	241
15.4	Astronomical Holidays .....	244
15.5	Further Reading/References.....	245
15.6	Space Travel and Exploration .....	247

15.7 Light Pollution and Organizations ..... 248

15.8 The History of Astronomy ..... 249

**16 Conclusion ..... 251**

16.1 Keep the Passion Burning ..... 251

16.2 Author’s Closing Remarks ..... 253

**Index..... 255**
