# Contents

<b>1</b>	<b>Functional Analysis and Sobolev Spaces</b>	<b>1</b>
1.1	Normed Spaces	1
1.2	Bounded Linear Operators	6
1.3	Adjoint Operator	14
1.4	Sobolev Space $H^p[0, 2\pi]$	17
1.5	Sobolev Space $H^p(\partial D)$	23
<b>2</b>	<b>Ill-Posed Problems</b>	<b>27</b>
2.1	Regularization Methods	28
2.2	Singular Value Decomposition	30
2.3	Tikhonov Regularization	36
<b>3</b>	<b>Scattering by Imperfect Conductors</b>	<b>45</b>
3.1	Maxwell's Equations	45
3.2	Bessel Functions	47
3.3	Direct Scattering Problem	51
<b>4</b>	<b>Inverse Scattering Problems for Imperfect Conductors</b>	<b>63</b>
4.1	Far-Field Patterns	64
4.2	Uniqueness Theorems for Inverse Problem	67
4.3	Linear Sampling Method	72
4.4	Determination of Surface Impedance	78
4.5	Limited Aperture Data	81
4.6	Near-Field Data	83
<b>5</b>	<b>Scattering by Orthotropic Media</b>	<b>85</b>
5.1	Maxwell Equations for an Orthotropic Medium	85
5.2	Mathematical Formulation of Direct Scattering Problem	89
5.3	Variational Methods	94
5.4	Solution of Direct Scattering Problem	105

<b>6</b>	<b>Inverse Scattering Problems for Orthotropic Media</b> . . . . .	111
6.1	Formulation of Inverse Problem . . . . .	112
6.2	Interior Transmission Problem . . . . .	114
6.3	Transmission Eigenvalue Problem . . . . .	122
6.3.1	The Case $n = 1$ . . . . .	123
6.3.2	The Case $n \neq 1$ . . . . .	136
6.3.3	Discreteness of Transmission Eigenvalues . . . . .	136
6.3.4	Existence of Transmission Eigenvalues for $n \neq 1$ . . . . .	140
6.4	Uniqueness . . . . .	147
6.5	Linear Sampling Method . . . . .	151
6.6	Determination of Transmission Eigenvalues from Far-Field Data . . . . .	160
<b>7</b>	<b>Factorization Methods</b> . . . . .	165
7.1	Factorization Method for Obstacle Scattering . . . . .	166
7.1.1	Preliminary Results . . . . .	166
7.1.2	Properties of Far-Field Operator . . . . .	176
7.1.3	Factorization Method . . . . .	180
7.2	Factorization Method for an Inhomogeneous Medium . . . . .	186
7.2.1	Preliminary Results . . . . .	186
7.2.2	Properties of Far-Field Operator . . . . .	191
7.2.3	Factorization Method . . . . .	193
7.3	Justification of Linear Sampling Method . . . . .	199
7.4	Closing Remarks . . . . .	202
<b>8</b>	<b>Mixed Boundary Value Problems</b> . . . . .	203
8.1	Scattering by a Partially Coated Perfect Conductor . . . . .	204
8.2	Inverse Scattering Problem for Partially Coated Perfect Conductor . . . . .	211
8.3	Numerical Examples . . . . .	216
8.4	Scattering by Partially Coated Dielectric . . . . .	221
8.5	Inverse Scattering Problem for Partially Coated Dielectric . . . . .	231
8.6	Numerical Examples . . . . .	237
8.7	Scattering by Cracks . . . . .	240
8.8	Inverse Scattering Problem for Cracks . . . . .	251
8.9	Numerical Examples . . . . .	258
<b>9</b>	<b>Inverse Spectral Problems for Transmission Eigenvalues</b> . . . . .	263
9.1	Entire Functions . . . . .	263
9.2	Transformation Operators . . . . .	267
9.3	Transmission Eigenvalues . . . . .	269
9.4	An Inverse Spectral Theorem . . . . .	274
<b>10</b>	<b>A Glimpse at Maxwell's Equations</b> . . . . .	279
	<b>References</b> . . . . .	287
	<b>Index</b> . . . . .	295

A Qualitative Approach to Inverse Scattering Theory

Cakoni, F.; Colton, D.

2014, X, 297 p. 15 illus., Hardcover

ISBN: 978-1-4614-8826-2
