

Contents

1 Parameter Optimization 1

1.1 Introduction 1

1.2 Parameter Optimization with Constraints 3

1.2.1 Lagrange Multipliers 3

1.2.2 Parameter Optimization: The Hohmann Transfer (1925) ... 5

1.2.3 Extensions of the Hohmann Transfer (1959) 10

1.2.4 The Bi-parabolic Transfer 12

1.3 Exercises 13

References 17

2 Optimal Control Theory 19

2.1 Optimal Launch of a Satellite 19

2.2 General Form of the Problem 22

2.3 The Problems of Bolza, Lagrange, and Mayer 25

2.3.1 Transformation from Lagrange to Mayer 27

2.3.2 Transformation from Mayer to Lagrange 27

2.4 A Provocative Example Regarding Admissible Functions 28

2.5 Summary 37

2.6 Exercises 37

References 38

3 The Euler-Lagrange Theorem 39

3.1 The Variation 39

3.2 The Euler-Lagrange Equation and the Brachistochrone Problem ... 41

3.3 The Euler-Lagrange Theorem 45

3.3.1 Proof Outline of the Euler-Lagrange Theorem 46

3.3.2 Summary of the Euler-Lagrange Theorem 52

3.3.3 Alternate Form of the Transversality Condition 52

3.4 Summary 56

3.5 Exercises 57

References 59

4	Application of the Euler-Lagrange Theorem	61
4.1	Introduction	61
4.2	Two-Point Boundary-Value Problem (TPBVP)	61
4.3	Two Approaches to Terminal Constraints	63
4.4	Transversality Condition	65
4.4.1	Case 1 Final Time Specified	65
4.4.2	Case 2 Final State Specified	67
4.4.3	Case 3 Final Endpoint Specified	68
4.5	General Case of Supplying Needed B.C.s	68
4.5.1	Adjoined Method	69
4.5.2	Un-adjoined Method	69
4.6	Examples	70
