1	Renormalization of Circle Diffeomorphism Sequences and Markov Sequences	1
	João P. Almeida, Alberto A. Pinto, and David A. Rand	
1.1	Introduction	1
1.2	Circle Diffeomorphisms	2
1.2.1	Horocycles	2
1.3	Renormalization	4
1.4	Markov Maps	5
	References	7
2	Examples of Lyapunov Exponents in Two-Dimensional Systems	9
	Francisco Balibrea and M. Victoria Caballero	
2.1	Introduction	9
2.2	Definitions and Preliminary Results	10
2.3	Two Two-Dimensional Examples	11
	References	15
3	Characteristics of the Explosive Percolation Transition	17
	R.A. da Costa, S.N. Dorogovtsev, A.V. Goltsev, and J.F.F. Mendes	
3.1	Explosive Percolation Problem	17
3.2	The Model and Evolution Equations	18
3.3	The Method	20
3.4	Characteristics of the Transition	22
3.5	Conclusions	23
	References	24
4	Controlled Markovian Dynamics of Graphs: Unbiased Generation of Random Graphs with Prescribed Topological Properties	25
	E.S. Roberts, A. Annibale, and Anthony C.C. Coolen	
4.1	Introduction	25
4.2	Generating Random Graphs via Markov Chains	26
4.3	Degree-Constrained Dynamics of Undirected Graphs	27

4.4	Degree-Constrained Dynamics of Directed Graphs	29
4.5	Numerical Examples for Directed Graphs	31
4.6	Generation of Random Graphs with Prescribed Degree Correlations via Rewiring Algorithms	31
4.7	Discussion	33
	References	33
5	A Case Leading to Rationality of the Drift	35
	Gastão Bettencourt	
5.1	Introduction	35
5.2	Background	36
5.3	Rationality of the Drift	37
	References	38
6	Remarks on the Nonwandering Set of Skew Products with a Closed Set of Periodic Points of the Quotient Map	39
	Lyudmila S. Efremova	
6.1	Introduction	39
6.2	Preliminaries	41
6.3	Weakly Nonwandering Points with Respect to the Family of Fibers Maps	43
6.4	Nonwandering Set of C^1 -Smooth Skew Products with a Closed Set of Periodic Points	53
	References	57
7	Green Route Planner	59
	João Ferreira	
7.1	Introduction	59
7.2	Related Work	60
7.3	Mobi-System	60
7.4	Network Model	61
7.5	Best Path	62
7.6	Case Study	64
7.7	Conclusion	68
	References	68
8	Families of Hyperbolic Lorenz Knots	69
	Paulo Gomes, Nuno Franco, and Luís Silva	
8.1	Introduction	69
8.2	Lorenz Knots and Links	70
	8.2.1 The Lorenz Template	71
	8.2.2 Lorenz Map	72
8.3	Symbolic Dynamics	73
	8.3.1 Symbolic Dynamics for the Lorenz Map	73
	8.3.2 The $*$ -Product	73
	8.3.3 Lorenz Braids	74

8.4	Hyperbolic Lorenz Knots	76
8.4.1	Families of Hyperbolic Knots	77
	References	79
9	Cycle Statistics in Complex Networks and Ihara's Zeta Function	81
	Clara Grácio, Anthony C.C. Coolen, and Alessia Annibale	
9.1	Introduction	81
9.2	Network and Graph Preliminaries	82
9.3	Counting k -Walks	84
9.4	Counting k -Cycles for $k > 3$	86
9.5	Conclusions	93
	References	93
10	Independence Test of Chaotic Sequences	95
	Zouhair Ben Jemaa, Daniele Fournier-Prunaret, and Safya Belghith	
10.1	Introduction	95
10.2	Independence of Random Time Series	96
10.2.1	Independence Test of Discrete Random Variables	96
10.2.2	Independence Test of Continuous Random Variables	98
10.3	Randomness of Chaotic Sequences	98
10.4	Independence Test of Two Chaotic Sequences	100
10.5	Statistics of χ^2 of Chaotic Sequences Generated by Different Chaotic Maps	101
10.6	Conclusion	105
	References	108
11	Stability Transformation Method for Unstable Periodic Orbits and Its Realization	109
	Yuki Kawai and Tadashi Tsubone	
11.1	Introduction	109
11.2	Previous Controlling Method Based on STM	110
11.3	Proposed Method Based on STM for Periodic Orbits	112
11.4	Laboratory Results	114
11.5	Conclusion	118
	References	118
12	Lorenz Attractors and Generalizations: Geometric and Topological Aspects	121
	Natalia Klinshpont	
12.1	Introduction	121
12.2	Lorenz Attractor and Geometrical Lorenz Flow	122
12.3	On the Problem of Homeomorphism of Attractors of Lorenz-Type Maps	124

12.4	On the Problem of Homeomorphism of Geometric Lorenz Attractors and Their Generalizations	127
12.4.1	Generalization of Williams's Model	128
12.4.2	Construction of a Topological Invariant	129
	References	132
13	A Nonlinear Map for the Decay to Equilibrium of Ideal Gases	133
	Ricardo López-Ruiz and Elyas Shivanian	
13.1	Introduction	133
13.2	The Nonlinear Map T	134
13.3	Some Properties of the Operator T	135
13.4	Conclusions	140
	References	140
14	On the Dynamics of a Cubic p-adic Polynomial	141
	Sérgio Mendes	
14.1	Introduction	141
14.2	Background	142
14.3	The Dynamical System $f(x) = x^3 + ax^2 + x$, $a \in \mathbb{Q}_p$	144
14.4	Siegel Disks and Attractors	145
	References	147
15	A Dynamical Approach to Congruences: Linking Circle Maps and Aperiodic Necklaces	149
	Cristina Serpa and Jorge Buescu	
15.1	Introduction and Definitions	149
15.2	Fermat's Little Theorem and a Generalization	150
15.3	Linking Circle Maps and Aperiodic Necklaces	152
	References	153
16	Complex Patterns in a Chain of Coupled Maps Based on a Neuron Model with Space and Time-Varying Couplings	155
	Yoko Uwate and Yoshifumi Nishio	
16.1	Introduction	155
16.2	Two Coupled Rulkov Maps	156
16.3	Synchronization in a Chain of Coupled Maps	158
16.3.1	Normal Coupling	159
16.3.2	Space-Varying Coupling	160
16.3.3	Time-Varying Coupling	162
16.4	Conclusions	166
	References	166
