

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	A Brief History of Electron Diffraction	1
1.2	RHEED Transmission Mode and Pole Figure	3
1.3	Electron Inelastic Mean Free Path	3
	References	5
<b>2</b>	<b>Crystal Lattices and Reciprocal Lattices</b>	<b>7</b>
2.1	Crystal Lattices in Real Space	7
2.1.1	Basic Vectors and the Translational Vector	7
2.1.2	Bravais Lattices	8
2.1.3	Non-Bravais Lattices	9
2.1.4	Primitive and Nonprimitive Cells	11
2.1.5	Plane and Direction in a Real Space Lattice	11
2.1.6	Alternative Way to Define Plane Direction	12
2.1.7	Plane Orientation and Interplanar Spacing Using Miller Indices	12
2.1.8	Interplanar Spacing Between the Same Miller Index Planes and the Angle Between Different Miller Index Planes	13
2.2	Reciprocal Lattices	16
2.2.1	Why Reciprocal Space?	16
2.2.2	Bragg Condition	17
2.2.3	Reciprocal Space Basic Vectors and their Relationship to Real Space Basic Vectors	18
2.2.4	Reciprocal Lattice Vector and its Relationship to Interplanar Spacing	20
2.2.5	Reciprocal Lattice Vector and Interplanar Spacing Applied to a Hexagonal Lattice	21
	References	22
<b>3</b>	<b>Kinematic Scattering of Waves and Diffraction Conditions</b>	<b>23</b>
3.1	Kinematic Formulism of Diffraction	23
3.2	Kinematic Scattering from Electrons in an Atom	23
3.2.1	One Electron	24
3.2.2	Two Electrons	24

3.2.3	N Number of Electrons .....	25
3.2.4	Electron Density .....	26
3.3	Kinematic Scattering from a Lattice with a Primitive Unit Cell .....	27
3.4	Laue Conditions .....	29
3.5	Kinematic Scattering from a Nonprimitive Unit Cell .....	30
3.5.1	Structure Factor of a Simple Cubic Structure .....	31
3.5.2	Structure Factor of a CsCl Structure .....	31
3.5.3	Structure Factor of a BCC Structure .....	32
3.5.4	Structure Factor of an FCC Structure .....	32
3.5.5	Structure Factor of a NaCl Structure .....	34
3.5.6	Structure Factor of Hexagonal Close-Packing and Indexing the Hexagonal Close-Packing Structure .....	35
3.6	Reciprocal Relationship Between the FCC and the BCC .....	37
3.7	Ewald Sphere Construction .....	37
	References .....	39
<b>4</b>	<b>RHEED Reflection Mode .....</b>	<b>41</b>
4.1	RHEED Reflection Mode .....	41
4.2	RHEED Determination of Surface Structure .....	43
4.3	RHEED Monitoring of Layer-by-Layer Growth of Epitaxial Films ..	44
4.3.1	Peak Intensity .....	44
4.3.2	Coverage and Phase-Dependent Angular-Intensity Profiles ..	45
4.3.3	2D Random-Filling Model .....	45
4.3.4	2D Random-Clustering Model .....	47
4.3.5	Intensity Oscillation for 2D Random-Clustering Model .....	49
4.3.6	Wavelength Selection in the Island-Nucleation Model .....	49
4.4	Intensity Decay in the Transition from Two-Level to Multiple-Level	50
	References .....	52
<b>5</b>	<b>X-ray Diffraction .....</b>	<b>55</b>
5.1	X-ray Generation .....	55
5.2	X-ray Characteristic Lines .....	57
5.3	Texture Classification .....	59
5.4	Poles and Pole Figures .....	60
5.5	Standard Projection of a Cubic Crystal .....	61
5.6	X-ray Experimental Parameters .....	62
5.7	Pole Figures and Various Out-of-Plane Orientations .....	63
5.8	X-ray Instrumentation .....	64
5.8.1	X-ray Point Detector .....	64
5.8.2	X-ray Area Detector .....	65
5.9	Diffraction Conic Line on an Area Detector .....	66
5.10	Operation of a Finite-Size Area Detector .....	67
5.10.1	Frame Integration of 2-D Data .....	68
5.10.2	Pole Figure and $2\theta$ Integration .....	70
	References .....	71
