1	Introduction	1
1.1	Semiconductors	3
1.2	Transition Metal Oxides	9
1.3	Zintl Intermetallics	17
	References	22
2	Critical Issues in Oxide-Semiconductor Heteroepitaxy	25
2.1	Lattice Matching Oxides and Semiconductors	27
2.2	Wetting	28
2.3	Kinetics Versus Thermodynamics: Chemical Reactivity	33
2.4	Twinning and Other Rotten Apples	35
2.5	Step Edges	38
2.6	The Role of the Interface	42
	References	43
3	Predictive Engineering of Semiconductor-Oxide Interfaces	45
3.1	Many Electron Problem and Density Functional Theory	47
3.2	Pseudopotential	48
3.3	Energy Minimization and Molecular Dynamics	50
3.4	Supercell/Slab Technique	51
3.5	Calculating Band Alignment and Dielectric Constants	53
3.6	Phonon Calculations	55
3.7	<i>Ab-Initio</i> Packages	58
3.8	Beyond the DFT-LDA	59
	References	60
4	Crystalline Functional Oxide Growth Methods	63
4.1	Molecular Beam Epitaxy	64
4.2	Pulsed Laser Deposition	67
4.3	Sputter Deposition	70
4.4	Chemical Vapor Deposition	73
4.5	Atomic Layer Deposition	77

4.6	The Growth of SrTiO ₃ Thin Films	82
4.7	Survey of Complex Oxides Grown by Various Deposition Methods	84
	References	85
5	Thin Oxide Film Characterization Methods	89
5.1	Electron Spectroscopies	89
5.2	X-ray Scattering	96
5.3	Electron Microscopy	99
5.4	Electron Diffraction	102
5.5	Optical Characterization	105
5.6	Ion Spectroscopies	106
5.7	Scanning Probe Microscopy	109
5.8	Summary	112
	References	112
6	Growing SrTiO₃ on Si (001) by Molecular Beam Epitaxy	115
6.1	The Zintl Template: Reconstruction of Sr on Si (001)	116
6.1.1	Low Temperature Sr-Induced Surface Reconstruction	116
6.1.2	Coverage Up to ½ Monolayer	119
6.1.3	Coverage from ½ to 1 Monolayer	120
6.1.4	Thermodynamics	122
6.1.5	Reconstruction at High Temperature	124
6.1.6	Electronic Structure	126
6.1.7	Conclusions	127
6.2	Looking for the Zintl Template	127
6.2.1	Experimental Details	129
6.2.2	Surface Core-Level Shifts of the Zintl Template	131
6.2.3	Effect of Sr on Work Function	133
6.2.4	Conclusions	133
6.3	Growing SrTiO ₃ on Si	134
6.4	Strain Management	137
6.5	Physical and Electronic Structure of the STO-Si Interface	143
6.5.1	Thermodynamic Considerations	143
6.5.2	Conduction Band Offsets and Interface Structure	146
6.6	Commercial Process	152
	References	154
7	Integration of Functional Oxides on SrTiO₃/Si Pseudo-Substrates	159
7.1	Integration of Anatase TiO ₂ on STO/Si	159
7.1.1	Charge Transfer and Dielectric Screening at the Interface	162
7.1.2	EELS O <i>K</i> Edge Spectra Across the Interface	165

7.1.3	Oxygen Vacancy and Fluorine Impurity at the $\text{TiO}_2/\text{SrTiO}_3$ Interface	167
7.1.4	Conclusions	168
7.2	Epitaxial Integration of Ferromagnetic Correlated Oxide LaCoO_3 with Si (100)	169
7.2.1	Magnetism in Strained LaCoO_3 : First Principles Theory	172
7.2.2	Strain-Induced Spin State Transition in LaCoO_3	173
7.2.3	Conclusions	176
7.3	Cobalt-Substituted SrTiO_3 Epitaxially Integrated with Silicon	177
7.3.1	Film Growth and Characterization	178
7.3.2	Film Crystalline Structure	178
7.3.3	Film Composition	180
7.3.4	Magnetic and Transport Properties	181
7.3.5	Electronic Structure of Co in STO	181
7.3.6	Role of Oxygen Vacancies in Ferromagnetism	183
7.3.7	Conclusions	187
7.4	Ferroelectric BaTiO_3 Epitaxially Integrated with Silicon	187
7.5	Integration of Epitaxial High-k Dielectric LaAlO_3 on Si(001)	195
7.6	Multiferroic BiFeO_3 on Si	197
7.7	Summary	198
	References	198
