

# Contents

<b>1</b>	<b>Introduction to Atom-Probe Tomography</b>	<b>1</b>
1.1	Background Techniques and Processes	2
1.1.1	The Classical Field Electron Microscope	3
1.1.2	The Classical Field Ion Microscope	5
1.1.3	Emission Processes and Emission Characteristics/Products	7
1.1.4	Introduction to Field Evaporation	9
1.1.5	Classical Field Ion Mass Spectrometry	10
1.1.6	Field Ion Appearance-Energy Spectroscopy	11
1.1.7	Field Desorption Imaging	11
1.2	Field Ion Microscopy	15
1.2.1	Microscopy Practicalities	16
1.2.2	Outline of the Field Ion Imaging Process	18
1.2.3	The Identification of FIM Image Spots as Images of Atoms	21
1.2.4	Basic Interpretation of Field Ion Images	23
1.2.5	Examples of Field Ion Micrographs	25
1.2.6	Estimation of Parameters from Field Ion Images	29
1.3	Atom Probe Designs	33
1.3.1	Classical Atom Probe Designs	33
1.3.2	Wide-Angle-View Atom Probes	34
1.3.3	Local Electrode Atom Probe	36
1.3.4	Practical Considerations Relating to Pulsed Field Evaporation	37
1.3.5	Examples of APT	39
	References	47
