Section I Methods

1	Evaluation of Performance in Health Care	3
1.1	Introduction	3
1.2	Performance Measurement	4
1.3	Performance Evaluation Methods	7
1.3.1	Ratio Analysis	7
1.3.2	The Least-Squares Regression	9
1.3.3	Total Factor Productivity (TFP)	11
1.3.4	Stochastic Frontier Analysis (SFA)	12
1.3.5	Data Envelopment Analysis (DEA)	13
1.4	Measurement Difficulties in Health Care	14
1.5	Summary	14
2	Performance Measurement Using Data Envelopment	
	Analysis (DEA)	15
2.1	DEA in Health Care	15
2.2	Efficiency and Effectiveness Models	16
2.2.1	Efficiency Measures	16
2.2.2	Efficiency Evaluations Using DEA	17
2.2.3	Effectiveness Measures	21
2.3	Data Envelopment Analysis (DEA)	21
2.4	Model Orientation	23
2.5	Basic Frontier Models	23
2.6	Decision Making Unit (DMU)	24
2.7	Constant Returns to Scale CCR [CRS] Model	24
2.8	Example for Input-Oriented CCR [CRS] DEA Model	26
2.9	Interpretation of the Results	31
2.9.1	Efficiency and Inefficiency	32
2.9.2	Slacks	32
2.9.3	Efficiency Targets for Inputs and Outputs	33

2.10	Input-Oriented Model Benchmarks	35
2.11	Output-Oriented Models	36
2.12	Output-Oriented CCR [CRS] DEA Model	37
2.13	Interpretation of Output-Oriented CCR [CRS] Results	38
	2.13.1 Efficiency and Inefficiency	39
	2.13.2 Slacks	39
	2.13.3 Efficient Targets for Inputs and Outputs	40
2.14	Output-Oriented Model Benchmarks	40
2.15	Summary	42
3	Returns to Scale Models	49
3.1	Constant Returns Frontier	49
3.2	Variable Returns Frontier	50
3.3	Assessment of RTS	53
3.4	Input-Oriented BCC [VRS] Model Example	53
3.5	Input-Oriented BCC [VRS] DEA Model Results	54
3.6	Slacks and Efficient Targets for Input-Oriented BCC [VRS] Model	55
3.7	Benchmarks for Input-Oriented BCC [VRS] Model	57
3.8	Output-Oriented BCC [VRS] Model Example	57
3.9	Output-Oriented BCC [VRS] Model Results	57
3.10	Comparison of CCR and BCC Models, and Scale Efficiency	60
3.11	Summary	62
4	Weight Restricted (Multiplier) Models	65
4.1	Introduction	65
4.2	Determination of Weights	66
4.3	Assurance Regions and Cone Ratio Models	67
4.4	Assessment of Upper and Lower Bound Weights	68
4.5	Weight Restricted (Multiplier) Model Example	71
4.6	Summary	75
5	Non-oriented and Measure Specific Models	77
5.1	Non-oriented (Slack-Based) Models	77
5.2	Measure Specific Models	79
5.3	Non-discretionary Variable Models	85
5.4	Categorical Models	85
5.5	Summary	88
6	Longitudinal (Panel) Evaluations Using DEA	93
6.1	Introduction	93
6.2	Malmquist Index	93
6.3	Malmquist-DEA Efficiency Example	97
6.4	Malmquist Index with More Than Two Periods	99
6.5	Window Analysis	101
6.6	Summary	106

7	Effectiveness Dimension of Performance	109
7.1	Incorporation of Quality into DEA Models	109
7.2	Quality as an Additional Output	109
7.3	Quality as an Independent Output	111
7.4	Combining Efficiency Benchmarks and Quality Scores	114
7.5	Extended Examples of Quality Variables in DEA	115
7.5.1	Sensitivity Testing	115
7.5.2	Efficiency and Quality Inclusive Performance Models	118
7.6	Summary	119
8	Advanced DEA Models	121
8.1	Super-Efficiency DEA Models	121
8.2	Congestion DEA	124
8.3	Network DEA Models	126
8.4	Network and Dynamic DEA Models	127
8.5	Two-Stage DEA Analysis	128
8.5.1	Logistic Regression	129
8.5.2	Tobit Regression	131
8.6	Bootstrapping	132
8.7	Economies of Scope	135
8.8	Summary	137

Section II Applications

9	Hospital Applications	141
9.1	Introduction	141
9.2	Defining Service Production Process in the Hospital Sector	143
9.3	Inputs and Outputs for Acute Care General Hospitals	144
9.3.1	Hospital Inputs	144
9.3.2	Hospital Outputs	146
9.4	Acute Care General Hospital Applications	148
9.5	Large Size General Hospital Performance Evaluation	149
9.6	Federal Government Hospitals (VA and DOD)	154
9.7	Academic Medical Center Applications	156
9.8	Summary	158
10	Physician Practice and Disease-Specific Applications	165
10.1	Introduction	165
10.2	Production of Services in Physician Practice	166
10.2.1	Physician Practice Inputs	167
10.2.2	Related Costs for Visits, ER, Hospitalizations, Lab, Radiology, Medications, and Durable Medical Equipment	169
10.2.3	Physician Practice Outputs	169

10.3	Physician Practice Applications	170
10.3.1	Measuring Physician Performance for Otitis Media . .	171
10.3.2	Measuring Physician Performance for Sinusitis	176
10.3.3	Measuring Physician Performance for Asthma	178
10.3.4	Measuring Physician Performance for Diabetes Mellitus	185
10.4	Summary	187
11	Nursing Home Applications	191
11.1	Introduction	191
11.2	Nursing Home Performance Studies	192
11.3	Performance Model for Nursing Homes	195
11.4	Data for Nursing Home Performance Evaluations	196
11.5	An Example of a Performance Model for Nursing Homes . . .	197
11.5.1	Inputs and Outputs of the Nursing Home Model . . .	197
11.5.2	Homogeneous Groups and Descriptive Statistics . . .	199
11.5.3	DEA Results	199
11.5.4	Conclusion	201
11.6	A National Study of Nursing Homes Efficiency and Quality Outcomes	202
11.7	Summary	203
12	Health Maintenance Organization (HMO) Applications	205
12.1	Introduction	205
12.2	HMO Performance Studies	205
12.3	Performance Model for HMOs	207
12.4	Summary	208
13	Home Health Agency Applications	209
13.1	Introduction	209
13.2	Home Health Agency Performance Studies	210
13.3	Performance Model for Home Health Agencies	211
13.4	Data for Home Health Agency Performance Evaluations	211
13.5	An Example of a Performance Model for Home Health Agencies	212
13.5.1	Inputs and Outputs of the Home Health Agency Model	212
13.5.2	Homogeneous Groups and Descriptive Statistics . . .	213
13.5.3	DEA Results	216
13.5.4	Conclusion	218
13.6	Summary	218
14	Applications for Other Health Care Organizations	219
14.1	Introduction	219
14.2	Dialysis Centers	219
14.3	Community Mental Health Centers	221

14.4	Community-Based Youth Services	224
14.5	Organ Procurement Organizations	225
14.6	Aging Agencies	227
14.7	Dental Providers	228
14.8	Radiology Providers	229
14.9	Substance Abuse Treatment Providers	231
14.10	Health Clinics	232
14.11	Free Clinics	234
14.12	Rehabilitation Providers	235
14.13	Ambulatory Surgery Centers	236
14.14	Oncology Care	237
14.15	Summary	238
15	Other DEA Applications in Hospital Settings	239
15.1	Introduction	239
15.2	Efficiency and Effectiveness Studies	239
15.3	Efficiency of Treatment for Stroke Patients	245
15.4	Benchmarking Mechanical Ventilation Services	247
15.5	Market Capture of Inpatient Perioperative Services	248
15.6	Electronic Medical Records (EMR) and Efficiency	249
	15.6.1 EMR and Efficiency	249
	15.6.2 EMR Adaptation Strategies	250
	15.6.3 EMR Adaptation Strategy—Longitudinal	252
15.7	Physicians at Hospital Setting	252
15.8	Hospital-Acquired Infections	253
15.9	Hospital Mergers	254
15.10	Hospital Closures	255
15.11	Labor Efficiency in Hospital Markets	255
15.12	Excess Hospital Service Capacity in Local Markets	256
15.13	Geographic Hospital Clusters	259
15.14	Critical Care Hospitals	260
15.15	Faith-Based Hospitals	261
15.16	Performance Evaluation of Nursing Staff	263
15.17	Sensitivity Analysis for Hospital Service Production	264
15.18	Summary	264
16	International Country-Based DEA Health Studies	265
16.1	Austria	265
16.2	Botswana	266
16.3	Brazil	267
16.4	Canada	269
16.5	Chile	271
16.6	Germany	271
16.7	Greece	273
16.8	Italy	274

16.9	Japan	276
16.10	The Netherlands	278
16.11	Norway	279
16.12	Portugal	281
16.13	Spain	282
16.14	Thailand	283
16.15	Turkey	283
16.16	Ukraine	285
16.17	OECD and Multi-country Studies	286
16.18	Summary	289

Health Care Benchmarking and Performance Evaluation
An Assessment using Data Envelopment Analysis (DEA)

Ozcan, Y.A.

2014, XXVIII, 329 p. 138 illus., 99 illus. in color.,

Hardcover

ISBN: 978-1-4899-7471-6
