

Contents

1	Financial Stabilization Models	1
1.1	Financial Stabilization: The Prime Goal of Market Reforms	1
1.2	Two Macromodels Under Inflation Conditions	6
1.3	Modeling of Costs Inflation	20
1.4	Modeling of Inflationary Expectations	45
	References	68
2	Modeling of Structural, Institutional and Technological Changes	71
2.1	Main Directions of the Structural Reforms in Economics	71
2.2	Modeling of Antimonopoly Measures	74
2.3	Models for Fiscal System Optimization	89
2.4	Optimization Model of Structural and Technological Changes	108
2.5	Models and Information Technologies for Decision Support During Structural and Technological Changes	121
2.5.1	Optimization Model of Planning Structural and Technological Changes	123
2.5.2	Alternative Approach to Developing a Computational Algorithm	130
2.5.3	Software Development	135
2.5.4	Modified Intersectoral Models of Structural and Technological Changes	138
2.5.5	Conclusions and Fields of Further Studies	146
2.6	Expert Assessments Processing by Ordinal Regression Methods	147
2.7	Example of Ordinal Regression Methods Application for Defining the Limits and Status of the Suburban Area	150
	References	157

3	Modeling of Imperfect Competition on the Labor Market	161
3.1	Imperfect Competition on the Labor Market in a Transition Economy	161
3.2	Modeling of Employment and Growth Processes Under Constant Prices	166
3.3	Modeling of Employment and Growth Processes Under Variable Prices	175
3.4	Model of Interbranch Competition on the Labor Market	194
3.5	Models of Bilateral Monopolistic Competition on the Labor Market	206
3.5.1	Defining of the Branch and Regional Criteria During the New Job Creation	225
3.6	Labor Market Modeling Using a Labor Supply Function of Two-Arguments.....	241
3.6.1	Microeconomic Substantiation of the Two-Argument Function of Labor Supply	243
3.6.2	Analysis of the Relation Between Labor Remuneration and Unemployment.....	245
3.6.3	Labor Market Analysis	247
3.6.4	Analysis of Consequences of Administrative Regulation of Labor Remuneration and Employment	254
3.6.5	Conclusions	257
	References	257
4	Modeling of Foreign Economic Activity in a Transition Economy	261
4.1	Impact of Externalities on the Process of Economic Reforms	261
4.2	Account of Foreign Aspects in Production and Financial Models....	265
4.3	Export and Import Structure Optimization.....	283
4.4	Stochastic Investor's Behavior Models	294
4.5	Models of Shallow Remaking Goods Export	306
4.6	Formalization of Nontransitive Preferences in Problems of Analysis of Foreign Economic Activity.....	316
4.7	Models and Decision Support Tools for Transboundary Water Supply Problems	324
	References	332

Optimization Models in a Transition Economy

Sergienko, I.V.; Mikhalevich, M.; Koshlai, L.

2014, VIII, 334 p. 33 illus., Hardcover

ISBN: 978-1-4899-7543-0
