

Contents

1	Carbon Nanotubes for Neuron–Electrode Interface with Improved Mechanical Performance	1
	David Rand and Yael Hanein	
2	Nanoscale Field-Effect Transistors for Minimally Invasive, High Spatial Resolution, and Three-Dimensional Action Potential Recording	13
	Xiaojie Duan	
3	In-Cell Recording and Stimulation by Engulfment Mechanisms.....	45
	Aviad Hai	
4	Nanostructured Coatings for Improved Charge Delivery to Neurons	71
	Takashi D.Y. Kozai, Nicolas A. Alba, Huanan Zhang, Nicolas A. Kotov, Robert A. Gaunt, and Xinyan Tracy Cui	
5	Micromachining Techniques for Realization of Three-Dimensional Microelectrode Arrays.....	135
	Swaminathan Rajaraman	
6	Focused Ion Beam Technology as a Fabrication and Inspection Tool in Neuron Interfacing.....	183
	Leonardo Sileo, Ferruccio Pisanello, Luigi Martiradonna, and Massimo De Vittorio	
7	Active Pixel Sensor Multielectrode Array for High Spatiotemporal Resolution	207
	L. Berdondini, A. Bosca, T. Nieuws, and A. Maccione	

8 Multielectrode and Multitransistor Arrays for In Vivo Recording	239
Stefano Vassanelli	
9 Optogenetics	269
Allison Quach, Nicholas James, and Xue Han	
Index.....	283

Nanotechnology and Neuroscience: Nano-electronic,
Photonic and Mechanical Neuronal Interfacing
De Vittorio, M.; Martiradonna, L.; Assad, J. (Eds.)
2014, X, 285 p. 139 illus., 101 illus. in color., Hardcover
ISBN: 978-1-4899-8037-3
