

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Almost Sure Convergence . . . . .	1
1.2	Strong Law of Large Numbers . . . . .	2
1.3	Brownian Motion and Brownian Bridge . . . . .	3
1.3.1	Brownian Motion . . . . .	3
1.3.2	Brownian Bridge . . . . .	6
1.4	Empirical and Quantile Processes . . . . .	7
1.4.1	Empirical Process . . . . .	7
1.4.2	Uniform Quantile Process . . . . .	9
1.5	Counting Process Martingale . . . . .	9
1.5.1	Definition of Counting Process . . . . .	9
1.5.2	Martingale . . . . .	11
1.5.3	Basic Counting Process Martingale . . . . .	13
1.5.4	Martingale Representation of the Kaplan–Meier Estimator . . . . .	15
1.6	Check Function . . . . .	17
<b>2</b>	<b>Inference on Mean Residual Life-Overview</b>	<b>19</b>
2.1	Mean Residual Life Function . . . . .	20
2.2	One- and Two-sample Cases . . . . .	21
2.3	Regression on Mean Residual Life . . . . .	23
<b>3</b>	<b>Quantile Residual Life</b>	<b>27</b>
3.1	Quantile Function . . . . .	28
3.1.1	Asymptotic Variance Formula . . . . .	28
3.1.2	Asymptotic Normality . . . . .	29
3.2	Quantile Residual Life Function . . . . .	31

3.3	Quantile Residual Life Process . . . . .	33
3.4	Parametric Inference . . . . .	36
3.4.1	One-Sample Case . . . . .	36
3.4.2	Independent Two-Sample Case . . . . .	40
3.5	Nonparametric Inference . . . . .	41
3.5.1	One-Sample Case . . . . .	41
3.5.2	Independent Two-Sample Case . . . . .	49
3.6	Regression on Quantile Residual Life . . . . .	55
3.6.1	Parametric Estimation of Regression Parameters . . . . .	56
3.6.2	“Setting the Clock Back to 0” Property . .	60
3.6.3	Semiparametric Regression . . . . .	65
3.7	Further Reading and Future Direction . . . . .	75
<b>4</b>	<b>Quantile Residual Life Under Competing Risks</b>	<b>77</b>
4.1	Competing Risks . . . . .	78
4.1.1	Cause-Specific Hazard and Cumulative Incidence Function . . . . .	78
4.1.2	Subdistribution Hazard Function . . . . .	80
4.1.3	Bivariate Point of View . . . . .	81
4.2	Quantile Residual Life Under Competing Risks . .	83
4.3	Parametric Inference . . . . .	85
4.3.1	One-Sample Case . . . . .	85
4.3.2	Independent Two-Sample Case . . . . .	91
4.3.3	Parametric Regression . . . . .	92
4.4	Nonparametric Inference . . . . .	98
4.4.1	One-Sample Case . . . . .	99
4.4.2	Independent Two-Sample Case . . . . .	105
4.4.3	Semiparametric Regression . . . . .	110
4.5	Further Reading and Future Direction . . . . .	117
<b>5</b>	<b>Other Methods for Inference on Quantiles</b>	<b>119</b>
5.1	Issues in Inference on Quantiles . . . . .	119
5.2	Empirical Likelihood Approach . . . . .	120
5.2.1	Empirical Likelihood Ratio for the Population Mean . . . . .	121
5.2.2	Kaplan–Meier Estimator; Nonparametric MLE . . . . .	124

5.2.3	Constrained EM Algorithm for Censored Data . . . . .	127
5.2.4	Estimating Equation for Quantile Residual Life . . . . .	133
5.2.5	Empirical Likelihood Inference on Quantile Residual Life Regression . . . . .	135
5.3	Bayesian Inference Under Heavy Censoring . . . . .	137
5.4	Further Reading and Future Direction . . . . .	139
<b>6</b>	<b>Study Design Based on Quantile (Residual Life)</b>	<b>141</b>
6.1	Sample Size Calculation in the Absence of Competing Risks . . . . .	142
6.2	Sample Size Calculation Under Competing Risks . . . . .	146
	<b>Appendix: R Codes</b>	<b>151</b>
A.1	Example 3.3 in Sect. 3.5.1 . . . . .	151
A.2	Example 3.4 in Sect. 3.5.2 . . . . .	154
A.3	Example 3.11 in Sect. 3.6.3 . . . . .	158
A.4	Example 4.3 in Sect. 4.3.1 . . . . .	166
A.5	Example 4.4 in Sect. 4.4.2 . . . . .	171
A.6	Example 5.2 in Sect. 5.2.3 . . . . .	178

Statistical Inference on Residual Life

Jeong, J.-H.

2014, XI, 201 p. 17 illus., 12 illus. in color., Hardcover

ISBN: 978-1-4939-0004-6
