Contents

1 Introduction and Related Work 1
1.1 Preliminaries on Event KBs 2
1.2 Related Work 5
References 6

2 Optimal State Change Attempts 9
2.1 Effect Estimators 12
2.2 State Change Effectiveness 13
2.3 Optimal State Change Attempts 14
2.4 Basic Algorithms for Computing OSCAs 16
References 18

3 Different Kinds of Effect Estimators 19
3.1 Learning Algorithms as Effect Estimators 19
3.2 Data Selection Effect Estimators 20
3.3 Computing OSCAs with Data Selection Effect Estimators 22
3.4 Trie-Enhanced Optimal State Change Attempts (TOSCA) 24
3.4.1 Reducing Trie Size by Bucketing Values 29
3.4.2 Annotated Tries 29
References 29

4 A Comparison with Planning Under Uncertainty 31
4.1 Obtaining an MDP from the Specification of an OSCA Problem 32
References 35

5 Experimental Evaluation 37
5.1 Question 1: Which Effect Estimator Gives the Most Accurate Results? 37
5.2 Question 2: Which Techniques Scale Best? 39
5.3 Question 3: Which Techniques Provide the Best Running Time as the Number of Attributes and Their Domain Size Increases? 43

5.4 Question 4: Which Algorithms Perform Best with Real-World Data? 44
References 45

6 Conclusions 47
