

Contents

Part I Cancer Onset and Early Growth

Modeling Spatial Effects in Carcinogenesis: Stochastic and Deterministic Reaction-Diffusion	3
Roberto Bertolusso and Marek Kimmel	
Conservation Laws in Cancer Modeling	27
Antonio Fasano, Alessandro Bertuzzi, and Carmela Sinisgalli	
Avascular Tumor Growth Modelling: Physical Insights to Skin Cancer ...	63
Martina Ben Amar	

Part II Tumor and Inter-Cellular Interactions

A Cell Population Model Structured by Cell Age Incorporating Cell–Cell Adhesion	109
Janet Dyson and Glenn F. Webb	
A General Framework for Multiscale Modeling of Tumor–Immune System Interactions	151
Marina Döflin, Mirosław Lachowicz, and Zuzanna Szymańska	
The Power of the Tumor Microenvironment: A Systemic Approach for a Systemic Disease	181
Irina Kareva, Kathleen P. Wilkie, and Philip Hahnfeldt	

Part III Anti-Tumor Therapies

Modeling Immune-Mediated Tumor Growth and Treatment	199
Lisette de Pillis and Ami Radunskaya	
A Hybrid Multiscale Approach in Cancer Modelling and Treatment Prediction	237
Gibin Powathil and Mark A.J. Chaplain	
Deterministic Mathematical Modelling for Cancer Chronotherapeutics: Cell Population Dynamics and Treatment Optimization	265
Jean Clairambault	
Tumor Microenvironment and Anticancer Therapies: An Optimal Control Approach	295
Urszula Ledzewicz and Heinz Schättler	

Mathematical Oncology 2013

d'Onofrio, A.; Gandolfi, A. (Eds.)

2014, X, 334 p. 96 illus., 78 illus. in color., Hardcover

ISBN: 978-1-4939-0457-0

A product of Birkhäuser Basel
