Contents

1 3D Data in Computer Vision and Technology 1
1.1 Applications of 3D Reconstruction 3

2 Function Spaces and Reconstruction 5
2.1 3D Reconstruction 5
2.2 Function Spaces and Norms 6
2.3 Operators on Function Spaces 8
2.4 Distributions 10
2.4.1 Convolution 14
2.4.2 The Schwartz Space and Fundamental Solutions 14
2.5 Sobolev Spaces 16

3 Variational Methods 19
3.1 Introduction 19
3.2 Extremals of Functionals 20
3.3 Euler-Lagrange Equation 21
3.4 Generalization of Euler-Lagrange Equation 24
3.5 The Gateaux Variation 25
3.6 Surfaces and Variational Properties 26

4 Interpolation. From One to Several Variables 31
4.1 Introduction 31
4.2 The Limitations of Polynomial Approximation 33
4.3 Spline Theory 33
4.4 Regularization and Smoothing Splines 37
4.5 Extensions to Higher Dimensions 40
4.6 Matlab Codes for Chapter 4 42

5 Functionals and Their Physical Interpretations 45
5.1 Physical Interpretations of Functionals 45
5.2 Beams and Splines 46
5.3 Plate and Membrane Models 47

6 Regularization and Inverse Theory 51
6.1 Introduction 51
6.2 Computational Mathematics in Operator Language 52
6.3 Compact Operators 53
6.4 Regularization and Inverse Problems 55
6.5 Interpolation as an Inverse Problem 57

7 3D Interpolation and Approximation 59
7.1 Splines for 3D Data 59
7.2 Properties of Thin Plate Spline 62
7.3 Multivariate Approximation and Positive Definiteness 65

8 Radial Basis Functions 69
8.1 Meshless Methods 69
8.2 Radial Basis Functions and Scattered Data 70
8.3 Characterizations of Radial Basis Functions 72
8.3.1 Bochner's Characterization 72
8.3.2 Schoenberg-Micchelli Characterization 73
8.3.3 Variational Characterization 74
8.4 Regularization and Noise 75
8.5 How to Judge an Approximation 76
8.6 Matlab codes for Chap. 8 80
