1	Introduction to Carbon Civilization.....	1
1.1	Earth's Carbon Inventory: Its Origin and Abundance	1
1.1.1	Earth's Major Carbon Reservoirs.....	1
1.1.2	Origin of Carbon Fuels: Biotic vs. Abiotic.....	3
1.2	Carbon Fuels: The Backbone of Industrial Civilization	4
1.2.1	From Biomass to ... Biomass	4
1.2.2	Veteran Carbon Fuel: Coal.....	5
1.2.3	Oil: The Greatest Gift of Nature	7
1.2.4	Entering "Golden Age" of Gas	12
1.3	Why Are We So Addicted to Carbon Fuels?	17
1.4	Is the Depletion of Carbon Fuels a Real Problem?.....	19
1.5	Dealing with the "Tide" of Carbon Fuels	25
1.6	Environmental Impact of Carbon Fuels.....	26
1.6.1	Carbon Fuels and Climate: Facts and Uncertainties	26
1.6.2	Economy–Environment Trade-Off Dilemma.....	30
1.6.3	Local and Global Impacts of Carbon Fuels	31
1.6.4	Coping with the Environmental Impact of Carbon Fuels	34
	References.....	38
2	What Is So Unique About CO₂?.....	43
2.1	Carbon and Greenhouse Effect	43
2.1.1	Radiative Forcing Concept.....	46
2.1.2	Global Warming Potential of Carbonaceous Gases	50
2.2	Trends in Atmospheric Greenhouse Gases	51
2.2.1	Increase in Atmospheric CO ₂ : Natural vs. Human-Induced Factors.....	51
2.2.2	Role of Water Vapor.....	53
2.3	Methane: Just Another Greenhouse Gas or a Sleeping Giant?.....	54
2.3.1	Methane as a Potent Greenhouse Gas.....	54

2.3.2	Historical Trends in Atmospheric Methane Concentration	55
2.3.3	Natural Sources of Methane.....	56
2.3.4	Anthropogenic Sources of Methane.....	62
2.4	Global Carbon Cycle.....	63
2.4.1	Ocean and Terrestrial Carbon Cycles.....	64
2.4.2	Interaction Between Carbon Cycle and Climate System.....	65
2.5	Impact of Human Activities on Carbon Cycle.....	65
2.5.1	Human Activities and Carbon Cycle	66
2.5.2	Natural vs. Human-Induced Climate Drivers	67
2.5.3	Role of Feedback Mechanisms	70
	References.....	74
3	Anthropogenic CO₂ Emissions: Sources and Trends	79
3.1	Greenhouse Gas Sources: Natural vs Anthropogenic.....	79
3.2	Fossil Fuels as a Main Source of Anthropogenic CO ₂ Emissions	80
3.3	Classification of Anthropogenic CO ₂ Emissions Sources.....	81
3.3.1	Classification by CO ₂ Source Type	81
3.3.2	Classification by Industrial Sector	83
3.3.3	Classification by Scale of Emissions	84
3.3.4	Classification by CO ₂ Content	85
3.3.5	Geographical Distribution of CO ₂ Sources	86
3.4	Concluding Remarks.....	88
	References.....	89
4	Stabilization of Atmospheric CO₂: Prospects and Implications	91
4.1	Introduction.....	91
4.2	Link Between Atmospheric CO ₂ Concentration and Global Mean Temperature	92
4.3	CO ₂ Stabilization Scenarios: Paths to Different Energy Futures	95
4.3.1	6 °C Scenario (6DS).....	96
4.3.2	4 °C Scenario (4DS).....	96
4.3.3	2 °C Scenario (2DS).....	97
4.4	Two-Degrees Scenario (2DS) and Its Implications.....	97
4.4.1	Implications of 2DS for Greenhouse Gas Emissions.....	97
4.4.2	Implications of 2DS for Total Energy Supply	99
4.4.3	Implications of 2DS for Industry	100
4.4.4	Implications of 2DS for Transport	101
4.4.5	Economics of 2DS	103
4.4.6	Implications of 2DS for Energy Security.....	105
4.5	CO ₂ Stabilization Roadmaps.....	106
4.5.1	Carbon Abatement Options.....	106
4.5.2	“Stabilization Wedges” Concept.....	108
4.6	Carbon Pricing: Status, Prospects, and Challenges	109
4.7	Is Reaching Zero-CO ₂ Emissions a Realistic Goal?	111
	References.....	114
