

Contents

1	A Cost Based Reweighted Scheme of Principal Support Vector Machine	1
	Andreas Artemiou and Min Shu	
2	Power Assessment of a New Test of Independence	13
	P.N. Patil and D. Bagkavos	
3	Empirical ϕ^*-Divergence Minimizers for Hadamard Differentiable Functionals	21
	Patrice Bertail, Emmanuelle Gautherat, and Hugo Harari-Kermadec	
4	Advances in Permutation Tests for Covariates in a Mixture Model for Preference Data Analysis	33
	Stefano Bonnini and Francesca Solmi	
5	Semiparametric Generalized Estimating Equations in Misspecified Models	43
	Francesco Bravo	
6	Local Covariance Estimation Using Costationarity	53
	Alessandro Cardinali	
7	Stable Nonparametric Signal Filtration in Nonlinear Models	61
	Alexander V. Dobrovidov	
8	Block Bootstrap for the Autocovariance Coefficients of Periodically Correlated Time Series	75
	Anna E. Dudek, Jacek Leśkow, and Sofiane Maiz	
9	Bootstrapping Realized Bipower Variation	85
	Gang Feng and Jens-Peter Kreiss	

10	Multiple Testing Approaches for Removing Background Noise from Images	95
	John Thomas White and Subhashis Ghosal	
11	Peak-Load Forecasting Using a Functional Semi-Parametric Approach	105
	Frédéric Ferraty, Aldo Goia, Ernesto Salinelli, and Philippe Vieu	
12	An Open Problem on Strongly Consistent Learning of the Best Prediction for Gaussian Processes	115
	László Györfi and Alessio Sancetta	
13	Testing for Equality of an Increasing Number of Spectral Density Functions	137
	Javier Hidalgo and Pedro C.L. Souza	
14	Multiscale Local Polynomial Models for Estimation and Testing	155
	Maarten Jansen	
15	Distributions of Clusters of Exceedances and Their Applications in Telecommunication Networks	167
	Natalia Markovich	
16	Diagnostic Procedures for Spherically Symmetric Distributions	177
	Simos G. Meintanis	
17	Nonparametric Regression Based Image Analysis	185
	P.-A. Cornillon, N. Hengartner, E. Matzner-Løber, and B. Thieurmél	
18	A Nonparametric Causality Test: Detection of Direct Causal Effects in Multivariate Systems Using Corrected Partial Transfer Entropy	197
	Angeliki Papana, Dimitris Kugiumtzis, and Catherine Kyrtsou	
19	A High Performance Biomarker Detection Method for Exhaled Breath Mass Spectrometry Data	207
	Ariadni Papana Dagiasis, Yuping Wu, Raed A. Dweik, and David van Duin	
20	Local Polynomials for Variable Selection	217
	Francesco Giordano and Maria Lucia Parrella	
21	On the CLT on Low Dimensional Stratified Spaces	227
	Leif Ellingson, Harrie Hendriks, Vic Patrangenaru, and Paul San Valentin	
22	Kernel Density Outlier Detector	241
	M. Pavlidou and G. Zioutas	

23	Model Selection for Classification with a Large Number of Classes ..	251
	Justin Davis and Marianna Pensky	
24	Semiparametric Bayesian Small Area Estimation Based on Dirichlet Process Priors	259
	Silvia Polettini	
25	Bootstrap Confidence Intervals in Nonparametric Regression Without an Additive Model	271
	Dimitris N. Politis	
26	Heteroskedastic Linear Regression: Steps Towards Adaptivity, Efficiency, and Robustness	283
	Dimitris N. Politis and Stefanos Poulis	
27	Level Set Estimation	299
	P. Saavedra-Nieves, W. González-Manteiga, and A. Rodríguez-Casal	
28	Nonparametric Permutation-Based Control Charts for Ordinal Data	309
	Livio Corain and Luigi Salmaso	
29	The Latest Advances on the Hill Estimator and Its Modifications	323
	M. Ivette Gomes and Milan Stehlík	
30	Multivariate Stochastic Volatility Estimation Using Particle Filters	335
	K. Triantafyllopoulos	
31	Guaranteed Estimation of Logarithmic Density Derivative by Dependent Observations	347
	Vyacheslav Vasiliev	
32	Nonparametric Statistics and High/Infinite Dimensional Data	357
	Frédéric Ferraty and Philippe Vieu	

Topics in Nonparametric Statistics

Proceedings of the First Conference of the

International Society for Nonparametric Statistics

Akritas, M.G.; Lahiri, S.N.; Politis, D.N. (Eds.)

2014, XVI, 367 p. 64 illus., 24 illus. in color., Hardcover

ISBN: 978-1-4939-0568-3
