

Contents

Part I Introduction and Overview

1 Overview of Autism Spectrum Disorders and Complex Communication Needs	3
Characteristics of ASDs	3
Social-Communication Skills	4
Restrictive, Repetitive, and Stereotypical Interests and Behaviors.....	6
Challenging Behaviors and ASD.....	6
Commonly Co-occurring Conditions and Characteristics	7
Augmentative and Alternative Communication.....	7
References.....	8
2 Aided Augmentative and Alternative Communication: An Overview	13
Low-Tech Aided AAC	13
The Picture Exchange Communication System.....	14
High-Tech Aided AAC	17
Types and Organization of Symbols Used in Aided AAC.....	21
Research Support for Aided AAC	22
Conclusions and Future Research Directions	25
References.....	26
3 AAC and Assessment of People with ASD and CCN	31
Evaluating to Select an Aided AAC System.....	32
Assessment of Students with ASD Who Use AAC.....	35
Tools for Selection of Specific AAC Modes.....	35
Use of Standardized Assessments with People with ASD and CCN	36
Comprehensive Developmental and Communication Assessments	37

Informal Evaluation Procedures.....	38
Selection of AAC Goals.....	38
Conclusions.....	39
References.....	39
4 Interdisciplinary Issues and Collaboration in Assessment and Treatment.....	43
Family Role and Preference of People with ASD	
in Selecting and Implementing AAC.....	44
Role of School Psychologists.....	45
Role of Speech-Language Pathologists	46
Roles of Educators, Paraprofessionals, and Daily Service Providers	47
Conclusions.....	49
References.....	49
Part II Interventions and Techniques to Provide Aided AAC for People with ASD	
5 Naturalistic Aided AAC Instruction	55
Introduction.....	56
Naturalistic Instruction and AAC	58
Implementation in Natural Settings and Contexts	59
Modeling AAC Use and Verbalizations.....	61
Expanding, Scaffolding, and Building on Previously Acquired Skills.....	62
Implementation of Behavioral Techniques	63
Research Support for Naturalistic Interventions Involving Implementation of Aided AAC with Individuals with ASD and Other DD.....	65
Research with People with ASD.....	70
Research Involving Modeling of AAC	70
Research Involving Behavioral Techniques	70
Conclusions and Future Directions	71
References.....	72
6 AAC Intervention Mediated by Natural Communication Partners	77
Introduction.....	77
The Case for Involving Parents, Family Members, and Peers in AAC Intervention	78
Description of Peer- and Parent-Mediated AAC Interventions	79
Information About ASD and CCN and on AAC	80
Instruction and Coaching in the Intervention.....	82
Research.....	84
Peer-Mediated Interventions for ASD	84
Peer- and Parent-Mediated AAC Interventions for ASD.....	85

Peer- and Parent-Mediated AAC Interventions for Anyone with Disabilities	88
Conclusions	88
References	90
7 Functional Communication Training with Aided AAC	95
What Is Functional Communication Training	95
Functional Behavior Assessment	96
Functional Communication Training	99
Research on FCT	103
FCT Research with People with ASD	107
FCT Research Involving AAC with People with ASD	107
Conclusions	108
References	108
 Part III Controversial Issues in AAC	
8 The Controversy Surrounding Facilitated Communication	115
Introduction	115
What Is Facilitated Communication?	115
History of Use of FC	116
Founders' Claims	116
Publications Touting the Reported Benefits of FC	118
Research Negating and Cautions Related to the Dangers of FC	118
Ongoing and Recent Resurgence of Interest in FC	121
Conclusions	122
References	124
9 Sign Language Versus Aided AAC	127
Arguments for the Use of Sign Language with Individuals with ASD	128
Research on the Use of Sign Language with People with ASD	129
Assertions Regarding the Use of Sign Language to Promote Speech Acquisition	134
Research on the Impact of Sign Language Instruction on Challenging Behaviors	135
Comparisons Between Sign Language and Other Language Instruction	135
Conclusions	136
References	136
Index	139

Aided Augmentative Communication for Individuals with
Autism Spectrum Disorders

Ganz, J.B.

2014, XIII, 141 p. 10 illus., Hardcover

ISBN: 978-1-4939-0813-4
