

Contents

1 Food Allergy and Gastrointestinal Tract	1
1.1 Food Allergy.....	3
1.1.1 Basic Facts.....	3
1.1.2 IgE-Mediated Food Allergy.....	4
1.1.3 Epidemiology	7
1.1.4 Diagnosis and Management of Food Allergy	8
1.1.5 Development of Sensitization to Food Allergens	10
1.2 Oral Allergy Syndrome	11
1.3 Mucosal Immune System.....	12
1.4 Oral Tolerance	13
1.5 Antigen-Presenting Cells of the Mucosal Immune System.....	19
1.6 Microbiota and Food Allergy	20
1.7 Diet-Related Factors that Modulate Immune Response to Dietary Antigens.....	21
1.8 Adjuvants Used in Animal Models of Food Allergy	22
References	23
2 Intestinal Permeability and Transport of Food Antigens.....	29
2.1 Intestinal Permeability of Antigens	31
2.1.1 Paracellular Transport Pathways	31
2.1.2 Transcellular Transport Pathways.....	34
2.1.3 Antigen Transcytosis Through Immune Complexes	37
2.1.4 Transport of Antigens via CX3CR1 ^{hi} Cells	39
2.1.5 Transport of Antigens via Goblet Cells	40
2.1.6 Role of Mucin.....	40
2.2 Protein Degradation in the Gastrointestinal Tract.....	42
2.3 Antigen Presentation in the Gastrointestinal System: Role of APCs of the Gut	42
2.4 Intestinal Permeability in Food-Allergic Individuals.....	43
2.5 Intestinal Permeability of Modified Food Allergens.....	49
References	52

3 Biochemistry and Molecular Biology of Food Allergens	57
3.1 Characterization of Food Allergens	58
3.2 Plant Food Allergen Families	60
3.2.1 The Prolamin Family	61
3.2.2 The Cupin Family	61
3.2.3 The Profilin and Bet v 1 Family	64
3.3 Animal Food Allergens	65
3.3.1 Parvalbumin and Fish Allergens	65
3.3.2 Tropomyosins and Other Shellfish Allergens	67
3.3.3 Milk Allergens	67
3.3.4 Egg Allergens	68
References	70
 4 Methods for Allergen Identification and Quantification in Food Matrices	 77
4.1 Principles of Protein Detection and Quantification Assays	78
4.2 Antibody-Based Assays: Immunoassay and ELISA	79
4.3 MS-Based Approaches	82
4.4 Matrix Effect and Food Processing in Detection of Food Allergens	84
4.5 DNA-Based Methods for Allergen Detection	85
References	87
 5 Food Allergens Digestibility	 95
5.1 Classification of Allergens Based on Digestion Stability: Complete and Incomplete Food Allergens	97
5.1.1 Protein Digestion in the Gastrointestinal Tract	97
5.1.2 Classification of Food Allergens Based on Stability to Digestion	98
5.2 Protein Conformational Stability, Digestibility, and Immune Response	99
5.2.1 Digestion Stability of Common Plant Food Allergens	99
5.2.2 Stability of Animal Allergens to Digestion	105
5.2.3 Correlation Between Results from In Vitro Digestion Tests and Allergenicity	108
5.3 Impact of Food Processing on Digestibility and Allergenicity of Food Allergens	110
5.3.1 Food Processing and Food Allergenicity	110
5.3.2 Methods for Assessing Allergenicity of Modified Food Allergens	111
5.3.3 Modifications of Food Allergens	111
5.3.4 Enzymatic Modifications of Allergens	119
5.3.5 Thermal Treatments: Boiling, Heating, and Roasting	123
5.3.6 Hydrolysis and Pasteurization of Food Allergens	125
5.3.7 Modern Nonthermal Food Processing Methods: High Hydrostatic Pressure, Gamma Irradiation, and Sonication	125

5.4 Food Matrix and Protein Digestion.....	127
5.4.1 Noncovalent Interactions of Food Matrix Components and Food Allergens.....	127
References	130
6 Microbiota and Allergic Disease	141
6.1 The Intestinal Microbiota.....	142
6.1.1 Development of Microbiota upon Birth	143
6.2 The Intestinal Mucosa.....	144
6.3 Microbiota, the Intestinal Immune System, and Allergy	147
6.4 Probiotics and Prebiotics.....	148
6.4.1 Probiotics in Prevention of Allergic Disease.....	149
References	150
7 Phytochemicals and Hypersensitivity Disorders.....	155
7.1 Diet and Hypersensitivity Disorders	156
7.2 Dietary Phytochemicals	157
7.2.1 Flavonoids	159
7.3 Mechanisms of Polyphenol Interference with Hypersensitivity Disorders.....	164
7.3.1 Effects of Polyphenols on Antigen Presentation and Maturation of Antigen-Presenting Cells.....	164
7.3.2 Effects of Polyphenols on Release of Mediators of Allergic Inflammation	164
7.3.3 Effects of Polyphenols on Immune System Regula- tory Mechanisms, IgE and Cytokine Production.....	165
7.3.4 ROS Signaling and Polyphenols	166
7.3.5 Interactions of Polyphenols with Dietary Proteins.....	166
7.3.6 Polyphenols and Intestinal Barrier Function	168
References	169
8 Predicting Potential Allergenicity of New Proteins Introduced by Biotechnology	175
8.1 Genetically Modified Food	176
8.2 Homology and Structural Similarity: Bioinformatics of Food Allergens	180
8.2.1 Allergen Databases	181
8.3 Testing Food Allergens Digestion	183
8.4 Animal Models of Food Allergy.....	186
References	189
Index.....	193

Food Allergens

Biochemistry and Molecular Nutrition

Cirkovic Velickovic, T.; Gavrovic-Jankulovic, M.

2014, XIII, 208 p. 19 illus., 9 illus. in color., Hardcover

ISBN: 978-1-4939-0840-0
