

Contents

- 1 Stability Criteria for Insurance Companies** 1
 - 1.1 The Classical Collective Risk Model 1
 - 1.2 Definitions of the Value Functions 5
 - 1.3 Basic Properties of the Value Functions 6
 - 1.3.1 Survival Probability 7
 - 1.3.2 Optimal Dividend Payments 8
 - 1.4 HJB Equations 10
 - 1.4.1 Survival Probability 11
 - 1.4.2 Optimal Dividend Payments 12
 - 1.5 A Limit Case: Diffusion Approximation 15
 - 1.5.1 Survival Probability 17
 - 1.5.2 Optimal Dividend Payments 17
 - 1.6 Discussion on the Characterization of Value Functions 18
 - 1.7 Comments and References 20
- 2 Reinsurance and Investment** 23
 - 2.1 Reinsurance in the Classical Risk Model 23
 - 2.1.1 Survival Probability and Reinsurance 26
 - 2.1.2 Dividends and Reinsurance 32
 - 2.2 Investments in the Classical Risk Model 34
 - 2.2.1 Survival Probability and Investments 37
 - 2.2.2 Dividends and Investments 38
 - 2.3 Ito’s Lemma and Infinitesimal Generators 44
 - 2.4 Comments and References 48
- 3 Viscosity Solutions** 51
 - 3.1 Examples of Non-smooth Value Functions 51
 - 3.2 Introduction to Viscosity Solutions (First Order) 53
 - 3.3 Viscosity Solutions of First-Order Equations 56
 - 3.4 A Simple Example 58
 - 3.5 Value Functions Are Viscosity Solutions (First Order) 60
 - 3.6 Viscosity Solutions (Second Order) 68

3.7	Semiconcavity	70
3.8	Value Functions Are Viscosity Solutions (Second Order)	71
3.9	Comments and References	73
4	Characterization of Value Functions	75
4.1	Survival Probability	75
4.2	Optimal Dividends	77
4.3	Optimal Survival Probability with Reinsurance	85
4.4	Optimal Dividends and Reinsurance	89
4.5	Investments and Survival Probability	89
4.6	Dividends and Investments	94
5	Optimal Strategies	97
5.1	Dividend Band Strategies	97
5.2	Optimal Dividend Strategies	100
5.3	Optimal Dividend Strategies with Reinsurance	108
5.4	Optimal Dividend Strategies with Investments	113
5.5	Optimal Reinsurance Control for Survival Probability	119
5.6	Optimal Investment Control for Survival Probability	121
5.7	Comments and References	122
6	Numerical Examples	123
6.1	Survival Probability	124
6.1.1	Examples with Reinsurance	124
6.1.2	Examples with Investments	126
6.2	Optimal Dividends	127
6.2.1	Dividends (Bare Case)	129
6.2.2	Dividends with Reinsurance	130
6.2.3	Dividends with Investments	133
A	Probability Theory and Stochastic Processes	135
A.1	Probability Spaces, σ -Algebras, Probability Functions, and Random Variables	135
A.2	Expectation, Conditional Expectation, and Conditional Probability	136
A.3	Construction of Probability Spaces	137
A.4	Stochastic Processes and Filtrations	138
A.5	Stopping Times	139
A.6	Martingales	139
A.7	Markov Processes	140
	Bibliography	141
	Index	145

Stochastic Optimization in Insurance

A Dynamic Programming Approach

Azcue, P.; Muler, N.

2014, X, 146 p. 19 illus., 2 illus. in color., Softcover

ISBN: 978-1-4939-0994-0
