|----------|-------------------------------------------------------------|-----|
| <b>1</b> | <b>Isospectral Matrix Reductions</b>                        | 1   |
| 1.1      | Matrices with Rational Function Entries                     | 2   |
| 1.2      | Isospectral Matrix Reductions                               | 5   |
| 1.3      | Sequential Reductions                                       | 12  |
| 1.4      | Spectral Inverse                                            | 15  |
| <b>2</b> | <b>Dynamical Networks and Isospectral Graph Reductions</b>  | 19  |
| 2.1      | Dynamical Networks as Graphs                                | 20  |
| 2.2      | Isospectral Graph Reductions                                | 22  |
| 2.3      | Sequential Graph Reductions                                 | 31  |
| 2.4      | Equivalence Relations                                       | 36  |
| 2.5      | Weight-Preserving Isospectral Transformations               | 39  |
| 2.5.1    | Branch Expansions                                           | 42  |
| 2.6      | Isospectral Graph Transformations over Modified Weight Sets | 45  |
| 2.6.1    | Branch Reweighting                                          | 46  |
| 2.6.2    | Branch Merging                                              | 47  |
| <b>3</b> | <b>Stability of Dynamical Networks</b>                      | 53  |
| 3.1      | Networks as Dynamical Systems                               | 54  |
| 3.2      | Time-Delayed Dynamical Networks                             | 63  |
| 3.3      | Graph Structure of a Dynamical Network                      | 71  |
| 3.4      | Implicit Delays and Restrictions of Dynamical Networks      | 80  |
| <b>4</b> | <b>Improved Eigenvalue Estimates</b>                        | 91  |
| 4.1      | Gershgorin-Type Regions                                     | 92  |
| 4.2      | Brauer-Type Regions                                         | 104 |
| 4.3      | Brualdi-Type Regions                                        | 111 |
| 4.4      | Some Applications                                           | 123 |

|                                                                |     |
|----------------------------------------------------------------|-----|
| <b>5 Pseudospectra and Inverse Pseudospectra</b> .....         | 129 |
| 5.1 Pseudospectra .....                                        | 129 |
| 5.2 Pseudospectra Under Isospectral Reduction .....            | 136 |
| 5.3 Inverse Pseudoeigenvalues .....                            | 139 |
| 5.4 Eigenvalue Inclusions and Equivalence of Definitions ..... | 144 |
| <b>6 Improved Estimates of Survival Probabilities</b> .....    | 147 |
| 6.1 Open Dynamical Systems .....                               | 148 |
| 6.2 Piecewise Linear Functions .....                           | 149 |
| 6.3 Nonlinear Estimates .....                                  | 159 |
| 6.4 Improved Escape Estimates .....                            | 163 |
| <b>References</b> .....                                        | 171 |
| <b>Index</b> .....                                             | 173 |

## Isospectral Transformations

A New Approach to Analyzing Multidimensional Systems  
and Networks

Bunimovich, L.; Webb, B.

2014, XVI, 175 p. 51 illus., 29 illus. in color., Hardcover

ISBN: 978-1-4939-1374-9
