|------------------------------------------------------------------------------|----------|
| <b>1 Introduction: Molecular Genetics of Acid Sensing and Response .....</b> | <b>1</b> |
| Chao-Chieh Lin, Melissa M. Keenan and Jen-Tsan Ashley Chi                    |          |

## Part I “Sensing Acidity”

|                                                                                                                |           |
|----------------------------------------------------------------------------------------------------------------|-----------|
| <b>2 The Molecular Mechanism of Cellular Sensing of Acidity .....</b>                                          | <b>11</b> |
| Zaven O’Bryant and Zhigang Xiong                                                                               |           |
| <b>3 The Molecular Basis of Sour Sensing in Mammals .....</b>                                                  | <b>27</b> |
| Jianghai Ho, Hiroaki Matsunami and Yoshiro Ishimaru                                                            |           |
| <b>4 Function and Signaling of the pH-Sensing G Protein-Coupled Receptors in Physiology and Diseases .....</b> | <b>45</b> |
| Lixue Dong, Zhigang Li and Li V. Yang                                                                          |           |

## Part II “Response to Acidity”

|                                                                                                                              |            |
|------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>5 Response to Acidity: The MondoA–TXNIP Checkpoint Couples the Acidic Tumor Microenvironment to Cell Metabolism .....</b> | <b>69</b>  |
| Zhizhou Ye and Donald E. Ayer                                                                                                |            |
| <b>6 Regulation of Renal Glutamine Metabolism During Metabolic Acidosis .....</b>                                            | <b>101</b> |
| Norman P. Curthoys                                                                                                           |            |
| <b>7 Extracellular Acidosis and Cancer .....</b>                                                                             | <b>123</b> |
| Maike D. Glitsch                                                                                                             |            |
| <b>8 A Genomic Analysis of Cellular Responses and Adaptions to Extracellular Acidosis .....</b>                              | <b>135</b> |
| Melissa M. Keenan, Chao-Chieh Lin and Jen-Tsan Ashley Chi                                                                    |            |
| <b>Index .....</b>                                                                                                           | <b>159</b> |

Molecular Genetics of Dysregulated pH Homeostasis

Chi, J.-T. (Ed.)

2014, VIII, 160 p. 16 illus., 12 illus. in color., Hardcover

ISBN: 978-1-4939-1682-5
