

Contents

- 1 A Short Probability Review 1**
 - 1 Sample Space and Random Variables 1
 - 1.1 Sample Space and Probability Axioms 1
 - 1.2 Discrete Random Variables 2
 - 2 Independence 4
 - 2.1 Binomial Random Variables 5
 - 2.2 Geometric Random Variables 6
 - 2.3 A Sum of Poisson Random Variables 7
 - 3 Conditioning 8
 - 3.1 Thinning a Poisson Distribution 9
 - 4 Generating Functions 10
 - 4.1 Sum of Poisson Random Variables (Again) 12
 - 4.2 Thinning a Poisson Distribution (Again) 13
 - Problems 13
 - References 15

- 2 Discrete Time Branching Process 17**
 - 1 The Model 17
 - Problems 21
 - 2 The Probability of a Mutation in a Branching Process 24
 - 2.1 An Equation for the Total Progeny Distribution 24
 - 2.2 The Total Progeny Distribution in a Particular Case 25
 - 2.3 The Probability of a Mutation 28
 - 2.4 Application: The Probability of Drug Resistance 29
 - 2.5 Application: Cancer Risk 32
 - 2.6 The Total Progeny May Be Infinite 34
 - Problems 36
 - 3 Proof of Theorem 1.1 39
 - Problems 44
 - Notes 45
 - References 46

3	The Simple Symmetric Random Walk	47
1	Graphical Representation	48
2	Returns to 0	52
3	Recurrence	56
4	Last Return to the Origin	60
	Problems	62
	Notes	65
	References	65
4	Asymmetric and Higher Dimension Random Walks	67
1	Transience of Asymmetric Random Walks	67
2	Random Walks in Higher Dimensions	68
2.1	The Two Dimensional Walk	68
2.2	The Three Dimensional Walk	69
3	The Ruin Problem	71
3.1	The Greedy Gambler	74
3.2	Random Walk Interpretation	75
3.3	Duration of the Game	75
	Problems	77
5	Discrete Time Markov Chains	81
1	Classification of States	81
1.1	Decomposition of the Chain	82
1.2	A Recurrence Criterion	84
1.3	Finite Markov Chains	88
	Problems	90
2	Birth and Death Chains	91
2.1	The Coupling Technique	96
2.2	An Application: Quorum Sensing	98
	Problems	100
	Notes	103
	References	103
6	Stationary Distributions for Discrete Time Markov Chains	105
1	Convergence to a Stationary Distribution	105
1.1	Convergence and Positive Recurrence	105
1.2	Stationary Distributions	109
1.3	The Finite Case	113
	Problems	115
2	Examples and Applications	117
2.1	Reversibility	117
2.2	Birth and Death Chains	118
2.3	The Simple Random Walk on the Half Line	120
2.4	The Ehrenfest Chain	122
2.5	The First Appearance of a Pattern	125

Problems	126
Notes.....	128
References.....	129
7 The Poisson Process	131
1 The Exponential Distribution	131
Problems	134
2 The Poisson Process	135
2.1 Application: Influenza Pandemics	145
Problems	146
Notes.....	148
References.....	149
8 Continuous Time Branching Processes	151
1 A Continuous Time Binary Branching Process	151
Problems	153
2 A Model for Immune Response.....	155
2.1 The Tree of Types	156
Problems	160
3 A Model for Virus Survival	162
Problems	168
4 A Model for Bacterial Persistence	169
Problems	172
Notes.....	173
References.....	173
9 Continuous Time Birth and Death Chains.....	175
1 The Kolmogorov Differential Equations	175
1.1 The Pure Birth Processes.....	178
1.2 The Yule Process	180
1.3 The Yule Process with Mutations.....	181
1.4 Passage Times	182
Problems	184
2 Limiting Probabilities	186
Problems	193
Notes.....	195
References.....	195
10 Percolation.....	197
1 Percolation on the Lattice	197
Problems	202
2 Further Properties of Percolation	205
2.1 Continuity of the Percolation Probability	205
2.2 The Subcritical Phase	208
Problems	212

3	Percolation On a Tree and Two Critical Exponents	214
	Problems	216
	Notes.....	217
	References	218
11	A Cellular Automaton.....	219
1	The Model.....	219
	Problems	222
2	A Renormalization Argument.....	224
	Problems	228
	Notes.....	229
	References	229
12	A Branching Random Walk	231
1	The Model.....	231
1.1	The Branching Random Walk on the Line	233
1.2	The Branching Random Walk on a Tree	235
1.3	Proof of Theorem 1.1.....	237
	Problems	242
2	Continuity of the Phase Transitions.....	243
2.1	The First Phase Transition Is Continuous	243
2.2	The Second Phase Transition Is Discontinuous	246
	Problems	249
	Notes.....	249
	References.....	249
13	The Contact Process on a Homogeneous Tree	251
1	The Two Phase Transitions	251
	Problems	253
2	Characterization of the First Phase Transition.....	254
	Problems	255
	Notes.....	256
	References	256
A	A Little More Probability	257
1	Probability Space	257
	Problems	260
2	Borel–Cantelli Lemma	261
2.1	Infinite Products	263
	Problems	264
	Notes.....	265
	References	265
	Index.....	267

Classical and Spatial Stochastic Processes

With Applications to Biology

Schinazi, R.B.

2014, XII, 268 p. 334 illus., 206 illus. in color.,

Hardcover

ISBN: 978-1-4939-1868-3

A product of Birkhäuser Basel
