

Contents

1	The Real Numbers	1
1.1	Intervals and Absolute Value	1
1.2	Rational and Irrational Numbers	3
1.3	Sequences	5
1.4	Increasing Sequences	11
1.5	The Increasing Bounded Sequence Property	13
1.6	The Nested Interval Property	17
	Exercises	18
	References	24
2	Famous Inequalities	25
2.1	Bernoulli's Inequality and Euler's Number e	25
2.2	The AGM Inequality	28
2.3	The Cauchy–Schwarz Inequality	34
	Exercises	37
	References	50
3	Continuous Functions	53
3.1	Basic Properties	53
3.2	Bolzano's Theorem	56
3.3	The Universal Chord Theorem	59
3.4	The Intermediate Value Theorem	61
3.5	The Extreme Value Theorem	65
	Exercises	66
	References	71

4	Differentiable Functions	73
4.1	Basic Properties	73
4.2	Differentiation Rules	77
4.3	Derivatives of Transcendental Functions	80
4.4	Fermat's Theorem and Applications	83
	Exercises	87
	References	94
5	The Mean Value Theorem	97
5.1	The Mean Value Theorem	97
5.2	Applications	100
5.3	Cauchy's Mean Value Theorem	104
	Exercises	107
	References	116
6	The Exponential Function	119
6.1	The Exponential Function, Quickly	119
6.2	The Exponential Function, Carefully	122
6.3	The Natural Logarithmic Function	126
6.4	Real Exponents	130
6.5	The AGM Inequality Again	132
6.6	The Logarithmic Mean	135
6.7	The Harmonic Series and Some Relatives	137
	Exercises	142
	References	156
7	Other Mean Value Theorems	159
7.1	Darboux's Theorem	159
7.2	Flett's Mean Value Theorem	162
7.3	Pompeiu's Mean Value Theorem	163
7.4	A Related Result	165
	Exercises	165
	References	169
8	Convex Functions and Taylor's Theorem	171
8.1	Higher Derivatives	171
8.2	Convex Functions	176
8.3	Jensen's Inequality	179
8.4	Taylor's Theorem: e Is Irrational	183
8.5	Taylor Series	187
	Exercises	189
	References	207

9	Integration of Continuous Functions	209
9.1	The Average Value of a Continuous Function	209
9.2	The Definite Integral	215
9.3	The Definite Integral as Area	220
9.4	Some Applications	223
9.5	Famous Inequalities for the Definite Integral	228
9.6	Epilogue	233
	Exercises	234
	References	247
10	The Fundamental Theorem of Calculus	249
10.1	The Fundamental Theorem	249
10.2	The Natural Logarithmic and Exponential Functions Again	260
	Exercises	264
	References	279
11	Techniques of Integration	283
11.1	Integration by u-Substitution	283
11.2	Integration by Parts	287
11.3	Two Consequences	290
11.4	Taylor's Theorem Again	294
	Exercises	296
	References	309
12	Classic Examples	311
12.1	Wallis's Product	311
12.2	π Is Irrational	314
12.3	More Irrational Numbers	315
12.4	Euler's Sum $\sum 1/n^2 = \pi^2/6$	318
12.5	The Sum $\sum 1/p$ of the Reciprocals of the Primes Diverges	321
	Exercises	323
	References	328
13	Simple Quadrature Rules	331
13.1	The Rectangle Rules	331
13.2	The Trapezoid and Midpoint Rules	333
13.3	Stirling's Formula	337
13.4	Trapezoid Rule or Midpoint Rule: Which Is Better?	341
	Exercises	342
	References	354

14	Error Terms	357
14.1	The Mean Value Theorem Again	357
14.2	Jensen's Inequality Again	360
14.3	The Trapezoid Rule Again	364
14.4	The Midpoint Rule Again	367
14.5	Simpson's Rule	369
14.6	Error Terms for Other Inequalities	372
	Exercises	375
	References	390
A	The Proof of Theorem 9.1	393
A.1	Subsequences	393
A.2	Uniform Continuity	394
A.3	The Proof of Theorem 9.1	395
	Exercises	401
A.4	An Epilogue	404
	References	405
	Index	407

More Calculus of a Single Variable

Mercer, P.R.

2014, XVI, 411 p. 60 illus., Hardcover

ISBN: 978-1-4939-1925-3
