

Contents

1	Introduction	1
1.1	The Pharmaceutical World to the Material Scientist.....	1
1.2	The Engineering Concepts of Materials in Drug Delivery	2
1.3	The Rational Design and Controlled Material Properties for Drug Delivery	4
	References.....	5
2	Controlled-Release Systems	7
2.1	Engineering Concepts	7
2.2	Material Design	11
2.3	Implementation	29
2.4	Clinical Applications.....	41
2.5	Problems.....	54
	References.....	58
3	Thin-Film Materials	63
3.1	Engineering Concepts	63
3.2	Material Design	83
3.3	Implementation	93
3.4	Clinical Applications.....	106
3.5	Problems.....	110
	References	112
4	Self-Microemulsifying Materials	117
4.1	Engineering Concepts	117
4.2	Material Design	130
4.3	Implementation	150
4.4	Clinical Applications.....	162
4.5	Problems.....	166
	References	171

5 Targeted Materials	177
5.1 Engineering Concepts	177
5.2 Material Design	189
5.3 Implementation	202
5.4 Clinical Applications	212
5.5 Problems	216
References	218
6 Hydrogel Materials	225
6.1 Engineering Concepts	225
6.2 Material Design	232
6.3 Implementation	238
6.4 Clinical Applications	247
6.5 Problems	257
References	259
7 Smart Drug Delivery Systems	265
7.1 Engineering Concepts	265
7.2 Material Design	278
7.3 Implementation	296
7.4 Clinical Applications	304
7.5 Problems	308
References	310
8 Conclusion	317
8.1 Future Challenges	317
References	319
Chapter 2 Problems—Answers	321
Chapter 3 Problems—Answers	327
Chapter 4 Problems—Answers	331
Chapter 5 Problems—Answers	337
Chapter 6 Problems—Answers	341
Chapter 7 Problems—Answers	345
Index	349

Drug Delivery

Materials Design and Clinical Perspective

Holowka, E.; Bhatia, S.K.

2014, XVII, 355 p. 260 illus., 36 illus. in color.,

Hardcover

ISBN: 978-1-4939-1997-0
