PART I APPROACHES FOR GENE CORRECTION FROM BACTERIA TO HUMAN CELLS

1 RecTE _{Psy} -Mediated Recombineering in <i>Pseudomonas syringae</i>	3
<i>Bryan Swingle</i>	
2 Genome Manipulations with Bacterial Recombineering and Site-Specific Integration in <i>Drosophila</i>	11
<i>Yi Zhang, William Schreiner, and Yikang S. Rong</i>	
3 Multiple Genetic Manipulations of DT40 Cell Line.....	25
<i>Akira Motegi and Minoru Takata</i>	
4 Gene Targeting of Human Pluripotent Stem Cells by Homologous Recombination	37
<i>Sara E. Howden and James A. Thomson</i>	

*Additional protocols described in this book for gene correction using
in vivo, ex-vivo, in vitro or in silico systems*

PART II GENE CORRECTION TOOLS USING NON-VIRAL OR VIRAL SYSTEMS

5 Methods for the Assessment of ssODN-Mediated Gene Correction Frequencies in Muscle Cells.....	59
<i>Carmen Bertonì</i>	
6 Small Fragment Homologous Replacement (SFHR): Sequence-Specific Modification of Genomic DNA in Eukaryotic Cells by Small DNA Fragments	85
<i>Andrea Luchetti, Arianna Malgieri, and Federica Sanguolo</i>	
7 Preparation and Application of Triple Helix Forming Oligonucleotides and Single Strand Oligonucleotide Donors for Gene Correction	103
<i>Md. Rowshon Alam, Arun Kalliat Thazhathveetil, Hong Li, and Michael M. Seidman</i>	
8 Triplex-Mediated Genome Targeting and Editing	115
<i>Faisal Reza and Peter M. Glazer</i>	
9 Targeting <i>piggyBac</i> Transposon Integrations in the Human Genome	143
<i>Daniel L. Galvan, Claudia S. Kettlun, and Matthew H. Wilson</i>	

10	Gene Targeting in Human-Induced Pluripotent Stem Cells with Adenoviral Vectors	163
	<i>Kobnosuke Mitani</i>	
11	Enhanced Gene Targeting of Adult and Pluripotent Stem Cells Using Evolved Adeno-associated Virus	169
	<i>Melissa A. Bartel and David V. Schaffer</i>	
12	Lentiviral Vectors Encoding Zinc-Finger Nucleases Specific for the Model Target Locus <i>HPRT1</i>	181
	<i>Laetitia P.L. Pelascini and Manuel A.F.V. Gonçalves</i>	
	<i>Additional protocols described in this book for gene correction using non-viral or viral tools</i>	
PART III BREAKING THE DNA TO STIMULATE GENE CORRECTION: NUCLEASE DESIGN, IN VIVO TEST, EFFICACY, AND OFF-TARGET EFFECT		
13	Designing and Testing the Activities of TAL Effector Nucleases	203
	<i>Yanni Lin, Thomas J. Cradick, and Gang Bao</i>	
14	A Bacterial One-Hybrid System to Isolate Homing Endonuclease Variants with Altered DNA Target Specificities	221
	<i>Rakesh Joshi and Frederick S. Gimble</i>	
15	Design and Analysis of Site-Specific Single-Strand Nicking Endonucleases for Gene Correction	237
	<i>Michael J. Metzger and Michael T. Certo</i>	
16	CRISPR-Cas-Mediated Targeted Genome Editing in Human Cells.	245
	<i>Luban Yang, Prashant Mali, Caroline Kim-Kiselak, and George Church</i>	
17	RNA-Guided Genome Editing of Mammalian Cells	269
	<i>Neena K. Pyzocha, F. Ann Ran, Patrick D. Hsu, and Feng Zhang</i>	
18	Nuclease-Mediated Double-Strand Break (DSB) Enhancement of Small Fragment Homologous Recombination (SFHR) Gene Modification in Human-Induced Pluripotent Stem Cells (hiPSCs)	279
	<i>R. Geoffrey Sargent, Shingo Suzuki, and Dieter C. Gruenert</i>	
19	AAV-Mediated Gene Editing via Double-Strand Break Repair	291
	<i>Matthew L. Hirsch and R. Jude Samulski</i>	
20	Genetic Modification Stimulated by the Induction of a Site-Specific Break Distant from the Locus of Correction in Haploid and Diploid Yeast <i>Saccharomyces cerevisiae</i>	309
	<i>Samantha Stuckey and Francesca Storici</i>	
21	A Southern Blot Protocol to Detect Chimeric Nuclease-Mediated Gene Repair	325
	<i>Céline J. Rocca, Hayder H. Abdul-Razak, Michael C. Holmes, Philip D. Gregory, and Rafael J. Yáñez-Muñoz</i>	

22	High-Throughput Cellular Screening of Engineered Nuclease Activity Using the Single-Strand Annealing Assay and Luciferase Reporter	339
	<i>Thomas J. Cradick, Christopher J. Antico, and Gang Bao</i>	
23	An Unbiased Method for Detection of Genome-Wide Off-Target Effects in Cell Lines Treated with Zinc Finger Nucleases	353
	<i>Cory R. Lindsay and David B. Roth</i>	
24	Identification of Off-Target Cleavage Sites of Zinc Finger Nucleases and TAL Effector Nucleases Using Predictive Models	371
	<i>Eli J. Fine, Thomas J. Cradick, and Gang Bao</i>	

Additional protocol described in this book for gene correction stimulated by DNA breaks

PART IV GENE CORRECTION APPROACHES FOR SPECIFIC DISEASE MODELS

25	Method for Retinal Gene Repair in Neonatal Mouse	387
	<i>Marilyn Dernigoghossian, Arthur Krigel, Francine Behar-Cohen, and Charlotte Andrieu-Soler</i>	
26	In Utero Delivery of Oligodeoxynucleotides for Gene Correction	399
	<i>Lingzhi Cai, Bhanu Munil Koppanati, Carmen Bertoni, and Paula R. Clemens</i>	
27	Portal Vein Delivery of Viral Vectors for Gene Therapy for Hemophilia	413
	<i>Alexandra Sherman, Alexander Schlachterman, Mario Cooper, Elizabeth P. Merricks, Robin A. Raymer, Dwight A. Bellinger, Roland W. Herzog, and Timothy C. Nichols</i>	
28	Gene Correction of Induced Pluripotent Stem Cells Derived from a Murine Model of X-Linked Chronic Granulomatous Disorder	427
	<i>Sayandip Mukherjee and Adrian J. Thrasher</i>	
29	Efficient Transduction of Hematopoietic Stem Cells and Its Potential for Gene Correction of Hematopoietic Diseases	441
	<i>Dolly Thomas and Gustavo Mostoslavsky</i>	

Additional protocols described in this book of gene correction for specific disease models

	<i>Index</i>	<i>451</i>
