

Contents

A Historical View of Nonlinear Programming: Traces and Emergence ...	1
Giorgio Giorgi and Tinne Hoff Kjeldsen	
A Gradient Method for Approximating Saddle Points and Constrained Maxima	45
Kenneth J. Arrow and Leonid Hurwicz	
Reduction of Constrained Maxima to Saddle-Point Problems.....	61
Kenneth J. Arrow and Leonid Hurwicz	
Constraint Qualifications in Maximization Problems.....	81
Kenneth J. Arrow, Leonid Hurwicz, and Hirofumi Uzawa	
Normality and Abnormality in the Calculus of Variations	99
Gilbert A. Bliss	
A Theorem of Fritz John in Mathematical Programming	111
Richard W. Cottle	
On Conjugate Convex Functions	125
Werner Fenchel	
Programming in Linear Spaces.....	131
Leonid Hurwicz	
Extremum Problems with Inequalities as Subsidiary Conditions	197
Fritz John	
Minima of Functions of Several Variables with Inequalities as Side Conditions.....	217
William Karush	

Nonlinear Programming	247
Harold W. Kuhn and Albert W. Tucker	
Second Order Conditions for Constrained Minima	259
Garth. P. McCormick	
An Indirect Sufficiency Proof for the Problem of Lagrange with Differential Inequalities as Added Side Conditions	271
Louis L. Pennisi	
Lagrange Multipliers Revisited	293
Morton Slater	
The Kuhn-Tucker Theorem in Concave Programming	307
Hirofumi Uzawa	
The Problem of Lagrange with Differential Inequalities as Added Side Conditions	313
Frederick Albert Valentine	
Appendices	
On Linear Inequalities	359
Lloyd L. Dines and N.H. McCoy	
Nonlinear Programming: A Historical View	393
Harold W. Kuhn	
Recherches sur la Méthode de Maximis et Minimis	415
Joseph L. Lagrange	

Traces and Emergence of Nonlinear Programming

Giorgi, G.; Kjeldsen, T.H. (Eds.)

2014, XVI, 434 p., Hardcover

ISBN: 978-3-0348-0438-7

A product of Birkhäuser Basel
