

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	History of CP Violation and B Meson Physics	3
1.2	Connection to Cosmological Problems	8
	References	9
<b>2</b>	<b>Theoretical Foundations</b>	11
2.1	CP Violation in the Standard Model of Particle Physics	11
2.2	The CKM Matrix and the Unitarity Triangle	16
2.3	Time Evolution of Neutral Mesons	21
2.4	CP Violation in Meson Decays	28
2.4.1	CP Violation in the Decay	28
2.4.2	CP Violation in the Mixing	30
2.4.3	CP Violation in the Interference Between Mixing and Decay	30
2.5	Coherent $B^0\bar{B}^0$ Mixing	32
2.6	CP Violation in $b \rightarrow c\bar{c}s$ Transitions	37
2.7	CP Violation in $b \rightarrow c\bar{c}d$ Transitions	39
2.7.1	CP Violation in $B^0 \rightarrow D^+D^-$ Decays	40
2.7.2	CP Violation in $B^0 \rightarrow D^{*\pm}D^\mp$ Decays	41
	References	43
<b>3</b>	<b>The Belle Experiment</b>	45
3.1	The $\Upsilon$ -Resonances	45
3.2	KEKB Accelerator	46
3.3	Belle Detector	48
3.3.1	Beam Pipe	49
3.3.2	Silicon Vertex Detector	50
3.3.3	Extreme Forward Calorimeter	52
3.3.4	Central Drift Chamber	52
3.3.5	Aerogel Čerenkov Counter	56
3.3.6	Time-of-Flight Counter	57
3.3.7	Electromagnetic Calorimeter	58
3.3.8	Superconducting Solenoid Magnet	60

3.3.9	$K_L^0$ and Muon Detector . . . . .	61
3.3.10	Trigger and Data Acquisition System . . . . .	62
3.3.11	Illustration of a Reconstructed $B^0 \rightarrow D^{*\pm} D^\mp$ Event. . . . .	65
	References . . . . .	68
<b>4</b>	<b>Analysis Methods. . . . .</b>	<b>71</b>
4.1	Vertex Reconstruction . . . . .	71
4.1.1	Description of the Vertex Reconstruction Algorithm . . . . .	72
4.1.2	IP Tube Constraint . . . . .	73
4.1.3	B Meson Vertex Reconstruction on Reconstruction- and on Tagging-Side . . . . .	74
4.1.4	Quality of Vertex Fits . . . . .	75
4.2	Resolution Functions . . . . .	77
4.2.1	Detector Resolution. . . . .	79
4.2.2	Smearing due to Non-primary Tracks . . . . .	82
4.2.3	Kinematic Approximation . . . . .	83
4.3	Flavor Tagging . . . . .	86
4.4	Fit Models and Extraction of Signal in Time-Integrated Measurements . . . . .	90
4.4.1	Probability Density Function for Signal in $M_{bc}$ . . . . .	91
4.4.2	Probability Density Function for Background in $M_{bc}$ . . . . .	91
4.4.3	Probability Density Function for Signal in $\Delta E$ . . . . .	91
4.4.4	Probability Density Function for Background in $\Delta E$ . . . . .	92
4.4.5	Extended Likelihood Function . . . . .	92
4.5	Likelihood Function of Proper Decay Time Difference Distributions . . . . .	92
4.5.1	Probability Density Function of Signal . . . . .	93
4.5.2	Probability Density Function of Peaking Background . . . . .	96
4.5.3	Probability Density Function and Resolution Function of Background. . . . .	98
4.5.4	Probability Density Function of Outlier Components. . . . .	99
4.5.5	Signal Probability . . . . .	99
4.6	Continuum Suppression . . . . .	100
4.6.1	B Meson Flight Direction with Respect to the Beam. . . . .	101
4.6.2	Thrust . . . . .	101
4.6.3	CLEO Cones . . . . .	103
4.6.4	Fox-Wolfram Moments . . . . .	103
4.6.5	Modified Fox-Wolfram Moments . . . . .	104
4.6.6	Neural Network Continuum Suppression . . . . .	104
	References . . . . .	106

<b>5</b>	<b>Reconstruction and Selection</b>	107
5.1	Reconstructed Decay Modes	107
5.2	Study of Differences between Monte Carlo Simulations and Data	111
5.2.1	$D^0$ and $D^+$ Mass Distributions	111
5.2.2	$D^{*+}$ - $D^{0/+}$ Mass-Difference Distributions	113
5.2.3	Continuum Network	113
5.3	Selection Requirements	114
5.3.1	Track Impact Parameters	115
5.3.2	Particle Identification	115
5.3.3	$\pi^0$ Mesons	116
5.3.4	$K_S^0$ Mesons	117
5.3.5	$D^0$ and $D^+$ Mesons	118
5.3.6	$D^{*+}$ Mesons	118
5.3.7	$D_s^+$ Mesons	120
5.3.8	$B^0$ Mesons	120
5.3.9	Selection of Best $B^0$ Meson Candidates	123
5.3.10	Kinematic Vertex Fits and SVD Hit Requirements	124
5.3.11	Continuum Suppression	128
