1	Incompressible Multipolar Fluid Dynamics	1
1.1	Introduction: The Stokes Constitutive Law and the Navier–Stokes Equations	1
1.2	Multipolar Fluid Dynamics	11
1.2.1	Introduction.....	11
1.2.2	Balance Equations and the Clausius-Duhem Inequality	13
1.2.3	The General Constitutive Equation for Multipolar Viscous Fluids	15
1.2.4	Consequences of the Clausius-Duhem Inequality	17
1.2.5	Linear Multipolar Viscous Fluids	19
1.3	The Linear Bipolar Fluid	23
1.4	The Nonlinear Bipolar Fluid	27
1.4.1	Introduction.....	27
1.4.2	The Constitutive Relation for a Viscous, Incompressible Nonlinear Bipolar Fluid	28
1.4.3	The Structure of the Higher-Order Boundary Conditions 1: Virtual Work Without the Incompressibility Constraint.....	31
1.4.4	Structure of the Higher-Order Boundary Conditions 2: Virtual Work Subject to the Incompressibility Constraint.....	35
1.5	Elementary Examples of Incompressible Nonlinear Bipolar Fluid Flow	38
1.5.1	Introduction.....	38
1.5.2	Steady Plane Poiseuille Flow	39
1.5.3	Steady (Proper) Poiseuille Flow in a Circular Cylinder	43
1.5.4	Plane Couette Flow	48
1.6	Other Extensions and Generalizations of the Navier–Stokes Model	49

1.7	Some Examples of Viscous Incompressible Flow Described by the Dipolar, Camassa-Holm, and Green and Naghdi Models	61
1.7.1	Introduction	61
1.7.2	Examples of Viscous Incompressible Flow for Dipolar Equations	61
1.7.3	Some Applications of the Viscous Camassa-Holm Equations	67
1.7.4	Fluid Dynamics Problems for the Extended Green-Naghdi Viscous Flow Model	71
1.8	A Catalog of Experimental Results Which Are Inconsistent with the Stokes' Hypothesis	76
1.8.1	Couette Flow	76
1.8.2	Poiseuille Flow	77
2	Plane Poiseuille Flow of Incompressible Bipolar Viscous Fluids	79
2.1	Introduction	79
2.2	Existence, Uniqueness, and Continuous Dependence for Steady Poiseuille Flow	82
2.3	Estimates and Generalized Reynolds Numbers for Steady Plane Poiseuille Flow	89
2.3.1	Generalized Reynolds Numbers for Plane Poiseuille Flow of a Bipolar Fluid	90
2.3.2	The Poiseuille Flow for $\epsilon = \mu_1 = 0$	92
2.3.3	Estimates for the Poiseuille Flow $u(y; \epsilon, \mu_1)$ when $\epsilon, \mu_1 \neq 0$	97
2.4	Uniqueness of Steady Poiseuille Flow in the Class of Equilibrium Flows Between Parallel Plates	109
2.4.1	Introduction	109
2.4.2	The Condition $\mathbf{w} \in \mathbf{H}^4(\Omega_a)$	111
2.4.3	Key Lemmas for Nonlinear Viscosity and the Poiseuille Flow in Ω_a	114
2.4.4	Uniqueness of Solutions	118
2.5	Existence and Asymptotic Stability of Time-Dependent Poiseuille Flows	123
2.5.1	Introduction	123
2.5.2	Some Preliminary Estimates for an Associated Parabolic Problem	124
2.5.3	Existence of Weak Solutions	126
2.5.4	Uniqueness and Stability of Solutions	132
3	Incompressible Bipolar Fluid Dynamics: Examples of Other Flows and Geometries	137
3.1	Introduction	137
3.2	Flow Between Rotating Cylinders	139
3.2.1	Introduction	139

3.2.2	The Nonlinear Boundary-Value Problem for Proper Couette Flow of an Incompressible Bipolar Fluid	141
3.2.3	The Proper Couette Flow: $\epsilon = \mu_1 = 0$	149
3.2.4	Existence, Uniqueness, and Continuous Dependence	151
3.3	Bubble Stability in an Incompressible Non-Newtonian Viscous Fluid	166
3.3.1	Introduction.....	166
3.3.2	Dynamics of a Spherical Vapor Cavity in an Incompressible Bipolar, Viscous Fluid: $\epsilon = \mu_1 = 0$	172
3.3.3	Linearized Dynamics for a Spherical Cavity in a Non-Newtonian Fluid	178
3.3.4	Liapunov Theory and Nonlinear Stability	183
3.4	Exterior Flow of a Bipolar Viscous Fluid in the Plane	187
3.4.1	Introduction.....	187
3.4.2	Formulation of the Exterior Flow Problem for a Bipolar Fluid.....	187
3.4.3	Solution of the Exterior Problem in a Truncated Domain	190
3.4.4	Solution of the Exterior Problem in an Unbounded Domain.....	196
3.4.5	Existence of a Drag Force	198
3.5	Flow Over Non-smooth Boundaries	199
3.5.1	Introduction.....	199
3.5.2	Existence and Uniqueness of Solutions	202
3.5.3	Perturbation of Domain Results	203
3.5.4	Regularity Results in Polygonal Domains	216
3.5.5	Some Specific Regularity Results	235
4	General Existence and Uniqueness Theorems for Incompressible Bipolar and Non-Newtonian Fluid Flow	239
4.1	Introduction	239
4.2	Existence, Uniqueness, and Stability of Solutions to the Initial-Boundary Value Problem for Bipolar Viscous Fluids	240
4.2.1	Introduction.....	240
4.2.2	Existence of a Weak Solution	242
4.2.3	Regularity of the Solution	248
4.2.4	Uniqueness of the Weak Solution	251
4.2.5	Stability of the Solution.....	252
4.3	Weak and Measure-Valued Solutions for Incompressible Bipolar Fluids with $\mu_1 = 0$	254
4.3.1	Introduction.....	254
4.3.2	Young Measure-Valued Solutions	255

4.3.3	Young Measures Are Dirac and the Weak Solutions are Regular for $p \geq 2$, $n = 2$	265
4.3.4	Young Measures Are Dirac for $3/2 < p < 2$, $n = 2$	270
4.3.5	Young Measures Are Dirac and the Weak Solutions Are Regular for $7/3 \leq p < 6$, $n = 3$	273
4.3.6	Young Measures Are Dirac and the Weak Solutions Are Regular for $11/5 \leq p < 7/3$, $n = 3$	277
4.3.7	Young Measures Are Dirac for $2 \leq p < 11/5$, $n = 3$	280
4.3.8	Young Measures Are Dirac for $9/5 < p < 2$, $n = 3$	281
4.4	Existence and Uniqueness for Incompressible Flow in an Unbounded Channel.....	284
4.4.1	Introduction.....	284
4.4.2	Formulation of the Problem in Hilbert Space and Some Preliminary Lemmas	285
4.4.3	The Existence Problem for a Sequence of Approximations	296
4.4.4	Existence of Incompressible, Bipolar, Viscous Flow in Ω_a	306
4.4.5	Uniqueness of Bipolar Flow in Ω_a	310
4.5	Related Work on Existence and Uniqueness for Navier–Stokes and Some Generalizations.....	312
4.5.1	Introduction.....	312
4.5.2	Existence and Uniqueness for the Incompressible Navier–Stokes Equations.....	313
4.5.3	Existence and Uniqueness for Solutions of the Ladyzhenskaya Model Equations	319
4.5.4	Existence and Uniqueness Results for Viscous Flow Models with Artificial Viscosity	322
4.5.5	Existence, Uniqueness, and Stability Theorems for Multipolar Fluids of Grade 3	325
4.5.6	Global Regularity of Solutions to the Viscous Camassa–Holm Equations	337
5	Attractors for Incompressible Bipolar and Non-Newtonian Flows: Bounded Domains and Space Periodic Problems	347
5.1	Introduction	347
5.2	Linearized Stability of Viscous Incompressible Bipolar Equations	351
5.2.1	Linearized Bipolar Equations.....	352
5.2.2	Basic Estimates for the Rate of Deformation	355
5.2.3	A Sufficient Condition for Linearized Stability	357

5.3	Bounds for the Dimensions of Attractors for Nonlinear Bipolar Fluid Flow ($0 \leq \alpha < 1$)	364
5.3.1	Some Preliminary Concepts	364
5.3.2	Absorbing Sets in \mathbf{H} and $\mathbf{H}^2(\Omega)$ and Existence of a Global Compact Attractor \mathcal{A}_{μ_1}	368
5.3.3	The Uniform Differentiability of $\mathbf{S}_{\mu_1}(t)$	376
5.3.4	Uniform Boundedness of $\mathbf{L}_{\mu_1}(t; \mathbf{u}_0)$	386
5.3.5	Hausdorff and Fractal Dimensions of the Global Attractor \mathcal{A}_{μ_1}	388
5.4	Attractors for the Bipolar and Non-Newtonian Problems ($-1 < \alpha < 0$)	398
5.4.1	Existence of Absorbing Sets and Maximal Compact Global Attractors for $\mathbf{S}_{\mu_1}(t)$, $\mu_1 \geq 0$	399
5.4.2	Uniform Differentiability of \mathbf{S}_{μ_1} on the Maximal Compact Global Attractor \mathcal{A}_{μ_1} , $\mu_1 > 0$	408
5.4.3	Uniform Boundedness of the Fréchet Differential $\mathbf{L}_{\mu_1}(t; \mathbf{u}_0)$, $\mathbf{u}_0 \in \mathcal{A}_{\mu_1}$	417
5.4.4	Bounds for $d_H(\mathcal{A}_{\mu_1})$ and $d_F(\mathcal{A}_{\mu_1})$, $\mu_1 > 0$	418
5.5	Lower Semicontinuity of the Attractors for Nonlinear Bipolar Equations	424
5.5.1	The Convergence Problem	424
5.5.2	A Basic Estimate for Solutions of the Space-Periodic Bipolar Problem	426
5.5.3	Convergence of \mathcal{A}_{μ_1} to \mathcal{A}_0 as $\mu_1 \rightarrow 0$	430
6	Inertial Manifolds, Orbit Squeezing, and Attractors for Bipolar Flow in Unbounded Channels	435
6.1	Introduction	435
6.2	Inertial Manifolds for Incompressible Bipolar Viscous Flow	436
6.2.1	Introduction	436
6.2.2	An Outline of the Methodology for Proving the Existence of an Inertial Manifold	438
6.2.3	The Lipschitz Property	443
6.2.4	The Squeezing Property for the Orbits of \mathbf{S}_{μ_1}	447
6.2.5	A Fixed Point Theorem	453
6.2.6	Existence of the Inertial Manifold \mathcal{M}	464
6.3	The \mathbf{L}^2 Squeezing Property for Bipolar Viscous Fluids	467
6.3.1	Introduction	467
6.3.2	An Estimate for Nonlinear Viscosity	468
6.3.3	An Estimate for the Quotient $\ \mathbf{u} - \mathbf{v}\ _Y / \ \mathbf{u} - \mathbf{v}\ _{L^2(\Omega)}$	477
6.3.4	The $L^2([0, T]; \mathbf{H}^3(\Omega))$ Norm of \mathbf{u} : An Alternate Derivation of the Estimate	481
6.3.5	The \mathbf{L}^2 Squeezing Property for the Orbits of \mathbf{S}_{μ_1}	487

6.4	Existence of Maximal Compact Attractors for Incompressible Viscous Bipolar Fluids in Unbounded Channels	490
6.4.1	Introduction.....	490
6.4.2	The Absorbing Sets in \tilde{H} and H^2	494
6.4.3	Existence of a Global Attractor for Flow in an Unbounded Channel	501
6.5	Some Related Work on Attractors and Inertial Manifolds for Incompressible Bipolar and Non-Newtonian Flow	510
A	Notation, Definitions, and Results from Analysis	515
A.1	Notation and Definitions	515
A.2	Basic Analysis Results	519
A.2.1	The Hölder Inequality	520
A.2.2	Cauchy's and Young's Inequalities	520
A.2.3	The Lax-Milgram Lemma	521
A.2.4	The Poincaré Inequality	521
A.2.5	Friedrich's Inequality	522
A.2.6	Fréchet Derivative	522
A.2.7	ω -Limit Sets	522
A.2.8	The Trace Theorem	523
A.2.9	Aubin's Lemma	523
A.2.10	Estimates for $b(\mathbf{u}, \mathbf{v}, \mathbf{w})$	524
A.2.11	The Uniform Gronwall Lemma	524
A.3	Some Sobolev Space Embeddings, Estimates, and Interpolation Results	525
A.4	Some Useful Lemmas in Functional Analysis	529
B	Estimates Involving the Rate of Deformation Tensor	533
C	The Spectral Gap Condition	543
