

Contents

1	Introduction	1
1.1	General Overview	1
1.2	Scope of this Thesis	6
	References	9
2	Iron-Based Superconductors	13
2.1	Crystallographic and Reciprocal-Space Structure	15
2.2	Phase Diagram	16
2.3	Electronic Band Structure	20
2.4	Magnetic Properties	24
2.4.1	Antiferromagnetic Ground State	24
2.4.2	Spin Fluctuations	27
2.5	Superconducting Properties	28
2.6	Properties of the $A_2Fe_4Se_5$ -Type Compounds ($A = K, Rb, Cs$)	33
	References	39
3	Experimental and Theoretical Methods	47
3.1	Spectroscopic Ellipsometry	47
3.1.1	Formalism	52
3.2	Scattering-Type Scanning Near-Field Optical Microscopy	56
3.3	Low-Energy Muon-Spin Rotation/Relaxation	57
3.4	Drude–Lorentz Model	63
3.5	Kramers–Kronig Consistency Analysis	68
3.6	Eliashberg Theory of Superconductivity	73
	References	77

4	Results and Discussion	79
4.1	Criticality-Induced Optical Anomalies in 122 Iron Arsenides	79
4.1.1	Introduction	79
4.1.2	Superconductivity-Induced Optical Anomalies in $\text{Ba}_{0.68}\text{K}_{0.32}\text{Fe}_2\text{As}_2$	80
4.1.3	LDA Calculations	83
4.1.4	Spin-Density-Wave-Induced Spectral Weight Transfer in SrFe_2As_2	85
4.1.5	Discussion	86
4.2	Eliashberg Description of Infrared Anomalies in $\text{Ba}_{0.68}\text{K}_{0.32}\text{Fe}_2\text{As}_2$	91
4.2.1	Introduction	91
4.2.2	Experimental Details	92
4.2.3	Far-Infrared Conductivity	92
4.2.4	Interband Optical Transitions	93
4.2.5	Extended Drude Model	94
4.2.6	Effective Two-Band Model for Iron Pnictides	96
4.2.7	Comparison with Experiment	100
4.2.8	Conclusions	102
4.3	Optical Conductivity of Superconducting $\text{Rb}_2\text{Fe}_4\text{Se}_5$	103
4.3.1	Introduction	103
4.3.2	Experimental Details	104
4.3.3	Broadband Spectroscopic Ellipsometry	104
4.3.4	Terahertz Time-Domain Transmission	105
4.3.5	LDA Calculations	108
4.3.6	Conclusions	109
4.4	Nanoscale Phase Separation in $\text{Rb}_2\text{Fe}_4\text{Se}_5$	110
4.4.1	Introduction	110
4.4.2	Near-Field Optical Microscopy	111
4.4.3	Low-Energy Muon-Spin Rotation/Relaxation	114
4.4.4	Conclusions	118
	References	119
5	Summary	125
	References	127

Charge Dynamics in 122 Iron-Based Superconductors

Charnukha, A.

2014, XI, 130 p. 43 illus., 24 illus. in color., Hardcover

ISBN: 978-3-319-01191-2
