

Contents

1	General Information About Electro-Acoustic Transducers.	1
1.1	Terms and Definitions. Classification EAT.	1
1.2	Basic Characteristics PEAT	3
1.3	Materials for PEAT	4
	References	11
2	Piezoceramic Elements for PEAT.	13
2.1	Fluctuations of Piezoceramic Disk Polarised on a Thickness.	13
2.2	The Fluctuations of Radially Polarised Cylinder	18
2.3	Piezoelectric Resonators.	21
2.4	Piezoceramic Transformers.	23
2.5	Bimorph and Trimorph Piezoelements	26
	References	40
3	Electro-Acoustic Transducers.	41
3.1	General Information.	41
3.2	Chladni Figures and Transducers Directional Diagrams	43
3.3	Electro-Acoustic Transducers in Active Oscillators Schemes	48
	References	55
4	Hydroacoustic Transducers	57
4.1	Classification and Characteristics.	57
4.2	Ratios of Electromechanical Transformations	59
4.3	Cylindrical Piezoceramic Transducers	60
4.4	Lamellar and Spherical Piezoceramic Transducers.	61
4.5	Basic Requirements to Transducers Projected	63
4.6	Selection of Energy Transformation Method and Mode Shape	64
4.7	Certain Transducers Designs.	66
	References	70

5	Transducers with Non-Destructive Control	73
5.1	Classification of Methods of Non-Destructive Control	73
5.2	Acoustic Methods of Non-Destructive Control	74
5.3	Piezoelectric Transducers for Non-Destructive Control	76
	References	88
6	The Technologies of PEAT Synthesis	91
6.1	Spatial Energy: Force Structure of Piezoceramic Element	91
6.2	Spatial Arrangement and Conjunction Piezoelement Electrodes	96
6.3	Spatial Electromechanical Feedback	99
6.4	Inclusion of Piezoelements in Schemes of Electric Filters	104
6.5	Technology of Additional Elements	105
6.6	Technology of Synthesis of the Transducers, Considering Electric signals	110
6.7	The Combined Technology	111
	References	111
7	Methods of Low-Frequency Acoustic Vibrations Creation	115
7.1	Method of Beating	116
7.2	Piezoelectric Adders	121
7.3	Creating of Low Frequency Oscillations by Means of Peak Modulators	127
7.4	Method of Additional Oscillatory Contour	129
7.5	Creation of LF Acoustic Fluctuations with the Help of Monomorph Piezoelements	133
7.6	Creation of LF Fluctuations with Help Bimorph and Trimorph Elements	137
7.7	Application of Volume Resonators in Electro-Acoustic Transducers	139
	References	145
8	Methods of Increasing Sound Pressure	147
8.1	Method of Additional Oscillatory Contour	147
8.2	Internal Friction in Piezoceramic Elements of Electro-Acoustic Transducers	149
8.3	Piezoelectric Projectors of a Sound on a Basis of Bimorph and Trimorph Elements	155
8.3.1	Decrease of Resonant Frequency	155
8.3.2	Increase of Sound Pressure Level	156
	References	161

9	Methods of Expansion of Pass-Band PEAT	163
9.1	Decrease of Quality of Transducer	163
9.2	Connected Contours	165
9.3	Volume Resonators	167
	References	172
10	Sensors with Piezoelements in Shemes Electric Filters	173
10.1	Schemes of Electric Filters	173
10.2	Sensors with Piezoelements in Low-Pass Filters Schemes	180
10.3	Sensors with Piezoelements in High-Pass Filters Schemes	181
10.4	Sensors with Piezotransformers in Electric Filters Schemes	181
	References	188
11	Devices to Control and Diagnose Bimorph Piezoelements	191
11.1	Defects of Bimorph Piezoelements	191
11.2	Defects Diagnostics by AFC	192
11.3	Diagnostics of Defects by Pulse Characteristic	198
11.4	Diagnostics of Defects by Transitive Characteristic	204
11.5	Devices Based on Active Oscillator Circuit	208
	References	211
	Index	213
	About the Authors	217
	Authors' Patents	219

Piezo-Electric Electro-Acoustic Transducers

Sharapov, V.; Sotula, Z.; Kunickaya, L.

2014, IX, 230 p. 255 illus., 9 illus. in color., Hardcover

ISBN: 978-3-319-01197-4
