

Contents

1	Introduction	1
1.1	Shape Formation in Cellular Automata.	1
1.2	The Many Faces of the Abelian Sandpile Model.	3
1.3	Overview	5
	References	6
2	The Abelian Sandpile Model	9
2.1	General Properties	9
2.1.1	Abelian Structure	12
2.2	The Abelian Group	15
2.3	The Evolution Operator and the Steady State	16
2.4	Recurrent and Transient Configurations	17
2.4.1	The Multiplication by Identity Test.	18
2.4.2	Burning Test	19
2.5	Algebraic Aspects	22
2.5.1	Toppling Invariants	22
2.5.2	Rank of \mathcal{G} for a Rectangular Lattice	26
2.6	Generalized Toppling Rules	27
	References	34
3	Algebraic Structure	37
3.1	The Extended Configuration Space	37
3.1.1	Algebraic Formalism.	37
3.1.2	Further Aspects of the Theory	41
3.2	Statement of Results	46
3.2.1	Generalization of Theorem 3.4	47
3.3	Multitopplings in Abelian Sandpiles	50
3.4	Wild Orchids: A Markov Chain Dynamics Involving Both Sand Addition and Removal	54
	References	55

4 Identity Characterization	57
4.1 Introduction	57
4.1.1 Identity and Patterns	57
4.1.2 ASM: Some Mathematics	58
4.2 Identities	60
4.3 A Prolog: Cylindric Geometries	63
4.4 Pseudo-Manhattan Lattice.	64
4.5 Proof of the Theorem.	71
4.6 Manhattan Lattice	76
4.7 Conclusions	76
References	77
5 Pattern Formation	79
5.1 Introduction	80
5.2 Experimental Protocols for Strings and Patches.	81
5.2.1 Master Protocol	82
5.2.2 Wild Orchids	86
5.3 First Results	88
5.4 Patches and Strings on the \mathbb{Z}^2 Lattice	92
5.5 Strings Construction and Vertices	101
5.5.1 Patches from Strings	108
5.6 The Sierpiński Triangle	109
5.6.1 Proof.	111
5.6.2 The Fundamental Sierpiński.	119
5.7 Conclusions	122
References	123
6 Conclusions	125
References	127
Appendix A: $SL(2, \mathbb{Z})$ a Summary	129
Appendix B: Complex Notation for Vectors in \mathbb{R}^2.	139
Appendix C: Generalized Quadratic Bézier Curve	141
Appendix D: Tessellation	145
About the Author	163

Deterministic Abelian Sandpile Models and Patterns

Paoletti, G.

2014, XII, 163 p. 64 illus., 33 illus. in color., Hardcover

ISBN: 978-3-319-01203-2
