

# Contents

<b>1</b>	<b>One-Dimensional Paradigms</b>	<b>1</b>
1.1	Integration Methods, Standard and Not	1
1.2	Green-Kernel Integration	4
1.3	The One-Dimensional Kelvin Problem	7
1.4	The One-Dimensional Mindlin Problem	10

## Part I Preliminaries

<b>2</b>	<b>Elements of Linear Elasticity</b>	<b>17</b>
2.1	Displacement, Strain, Compatibility	17
2.1.1	Compatibility	22
2.1.2	Plane Displacement Fields	23
2.1.3	Plane Strain Fields	24
2.2	Forces, Stress, Equilibrium	26
2.2.1	Cauchy's Notion of Stress	27
2.2.2	Free-Body Diagrams, Diffuse and Concentrated Forces	28
2.3	The Stress Response to Strain	30
2.3.1	Isotropic Materials	31
2.3.2	Mechanical Interpretation of the Elastic Moduli	32
2.3.3	Plane Stress Fields	36
2.3.4	Plane Strain Fields Associated with Plane Stress Fields	37
2.4	Compatibility in Stress Terms	38
2.4.1	The Three-Dimensional Case	38
2.4.2	The Two-Dimensional Case	39
	References	40
<b>3</b>	<b>Geometric and Analytic Tools</b>	<b>43</b>
3.1	Curvilinear Coordinates, Covariant and Contravariant Bases	43

3.2	Orthogonal Coordinates, Physical Bases . . . . .	44
3.2.1	Polar Coordinates . . . . .	44
3.2.2	Cylindrical Coordinates . . . . .	46
3.2.3	Spherical Coordinates . . . . .	48
3.3	Representations of Differential Operators . . . . .	51

## **Part II Three Classical Problems: Flamant's, Boussinesq's, and Kelvin's**

<b>4</b>	<b>The Flamant Problem . . . . .</b>	<b>55</b>
4.1	A Priori Representations of Displacement, Strain, and Stress . . .	55
4.2	Plane Stress Fields Balanced for Null Distance Forces . . . . .	58
4.3	The 2-D Boussinesq–Flamant Problem . . . . .	60
4.3.1	Divergenceless Plane Stress Fields . . . . .	60
4.3.2	Compatible and Divergenceless Plane Stress Fields . . . .	62
4.3.3	Compatible and Divergenceless Plane Stress Fields that Balance the Applied Force . . . . .	63
4.4	Digression . . . . .	65
4.4.1	A Weak Formulation of the Boussinesq–Flamant Problem . . . . .	65
4.4.2	Concentrated Contact Interactions . . . . .	67
4.5	The Flamant Elastic State . . . . .	70
4.5.1	The Stress Field . . . . .	70
4.5.2	The Strain Field . . . . .	70
4.5.3	The Displacement Field . . . . .	72
	References . . . . .	77
<b>5</b>	<b>The Boussinesq Problem . . . . .</b>	<b>79</b>
5.1	Preliminary Symmetry Considerations . . . . .	79
5.2	Inexistence of Center-Symmetric Solutions . . . . .	81
5.2.1	Balanced Center-Symmetric Stress Fields . . . . .	81
5.2.2	Incompatibility of Center-Symmetric Stress Fields . . . .	83
5.3	Balanced Stress Fields with Cylindrical Symmetry . . . . .	85
5.3.1	Boundary Conditions . . . . .	87
5.3.2	A Kinematic Condition . . . . .	87
5.3.3	Balanced and Compatible Stress Fields . . . . .	91
5.3.4	The Trace of the Stress Field . . . . .	94
5.4	The Boussinesq Stress Field . . . . .	99
5.4.1	Step 2 . . . . .	99
5.4.2	Step 3 . . . . .	99
5.4.3	Step 4 . . . . .	101

5.5	Digression . . . . .	102
5.5.1	Concentrated Contact Interactions . . . . .	102
5.5.2	How to Find Flamant's Stress Field Having Found Boussinesq's. . . . .	104
5.6	The Boussinesq Strain and Displacement Fields . . . . .	104
5.7	Exploiting the Boussinesq Solution . . . . .	108
5.7.1	The Pressure Bulb. . . . .	108
5.7.2	Displacements in a Half-Space Subject to a Diffused Load . . . . .	109
5.7.3	Displacements in a Half-Space Subject to a Diffused Load . . . . .	111
5.7.4	Horizontal Surface Displacements in the Flamant Problem . . . . .	112
5.8	An Alternative Representation of the Boussinesq Elastic State . . . . .	113
	References . . . . .	114
<b>6</b>	<b>The Kelvin Problem. . . . .</b>	<b>115</b>
6.1	Solution by Juxtaposition . . . . .	115
6.1.1	Continuity Conditions at Sutures. . . . .	115
6.1.2	Conditional Solvability: The Boussinesq Problem for Incompressible Materials . . . . .	117
6.2	The 2-D Kelvin Problem . . . . .	120
6.2.1	Balanced Stress Fields. . . . .	121
6.2.2	Compatible Stress Fields . . . . .	123
6.2.3	Strain and Displacements Fields . . . . .	123
6.3	The Kelvin Elastic State. . . . .	126
6.3.1	The Stress Field . . . . .	126
6.3.2	The Strain and Displacement Fields . . . . .	128
	References . . . . .	129

### **Part III Three Other Problems: Melan's, Mindlin's, and Cerruti's**

<b>7</b>	<b>The Melan and Mindlin Problems . . . . .</b>	<b>133</b>
7.1	Solution by Superposition. . . . .	133
7.2	The Melan Problem. . . . .	134
7.2.1	The Stress Field . . . . .	134
7.2.2	The Strain and Displacement Fields . . . . .	139
7.3	The Mindlin Problem. . . . .	140
7.3.1	The Stress Field . . . . .	141
7.3.2	The Strain and Displacement Fields . . . . .	146
	References . . . . .	148

<b>8 The Cerruti Problem</b> . . . . .	149
8.1 Displacement and Stress Symmetries . . . . .	149
8.2 The Stress Field of the 2-D Cerruti Problem. . . . .	151
8.3 The Diffused-Load Cerruti Problem. . . . .	154
8.3.1 The Stress and Strain Fields . . . . .	154
8.3.2 The Displacement Field . . . . .	155
References . . . . .	157
<b>Postface</b> . . . . .	159
<b>Appendix A.</b> . . . . .	161
<b>Index</b> . . . . .	177

Elasticity for Geotechnicians

A Modern Exposition of Kelvin, Boussinesq, Flamant,  
Cerruti, Melan, and Mindlin Problems

Podio-Guidugli, P.; Favata, A.

2014, XVI, 178 p. 51 illus., Hardcover

ISBN: 978-3-319-01257-5
