

Contents

Long-Term Stability of Symmetric Partitioned Linear Multistep Methods 1
Paola Console and Ernst Hairer

Markov Chain Monte Carlo and Numerical Differential Equations 39
J.M. Sanz-Serna

Stability and Computation of Dynamic Patterns in PDEs 89
Wolf-Jürgen Beyn, Denny Otten, and Jens Rottmann-Matthes

Continuous Decompositions and Coalescing Eigenvalues for Matrices Depending on Parameters 173
Luca Dieci, Alessandra Papini, Alessandro Pugliese, and Alessandro Spadoni

Stability of Linear Problems: Joint Spectral Radius of Sets of Matrices 265
Nicola Guglielmi and Marino Zennaro

Current Challenges in Stability Issues for Numerical
Differential Equations
